Comment: There was no gross increase shown in the operating density of this property during the year ended June 30, 1916. The company succeeded, however, in increasing freight train load slightly, and the train mile earnings averaged better than during the previous year. The tonnage carried by this road is light, but the average freight rates range at unusually high figures.

* Deficit.

Note: Above figures are based on average mileage operated for each year. Margin of safety is the proportion of surplus left over after deducting fixed charges. For example, in 1916 the "balance for charges" (per mile) was $1,612; fixed charges consumed $1,200 or 74% of this, leaving $412, a "margin of safety" of 26%.

Profit and Loss Account, year ended June 30, 1916: Credit balance from income account, $32,928; donations, $196; miscellaneous credits, $513; total, $33,637. Contra: Debit balance at beginning of year, $15,387; loss on retired road and equipment, $665; miscellaneous debits, $3,640; credit balance at close of year, $13,945; total, $33,637.

Comment: Gross revenues fell off moderately on this property in the year 1916, but there was a moderate improvement in the net operating receipts and the total gross income. As interest charges were reduced considerably, the company was able to report a final surplus very much better than any shown in recent years.

Comment: There were no important capitalization changes on the Maryland and Pennsylvania in the fiscal year ended June 30, 1916. The capitalization of the property as measured on a mileage basis is rather heavy and in recent years the net income on net capital has not shown any real improvement. The company has not been able to accumulate any substantial surplus, although a fair amount of earnings has been appropriated from time to time for improvement accounts.

Note: "Average income available" is the average net income available per mile for interest charges, after deducting taxes for the nine years ending June 30, 1916. "Interest requirement" is the current requirement. The

ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

Comment: For the year ended June 30, 1916, there was a very heavy increase in freight density on this property, and the company also succeeded in reporting a better average train load than in any year since 1910. Freight rates tended to decline, but the train mile earnings were better than usual and the total tonnage underwent an increase of nearly 50%, as compared with 1915.

Note: Above table is based on average mileage operated for each year. Margin of safety is the proportion of surplus left over after deducting fixed charges. For example, in 1916 the "balance for charges" (per mile) was $1,406; fixed charges consumed $881 per mile or 63% of this, leaving $525, a "margin of safety" of 37%.

Note: Other income in 1916 included hire of equipment credits, $8,028. Fixed charges included interest, lease rentals, etc.

Profit and Loss Account, year ended June 30, 1916: Credit balance transferred from income account, $199,916; donations, $289; miscellaneous credits, $2,976; debit balance carried to balance sheet, $2,156,475; total, $2,359,656. Contra: Debit balance at beginning of year, $1,121,228; loss on retired road and equipment, $6,026; miscellaneous debits, $1,232,402; total, $2,359,656.

Comment: Gross operating revenues sharply increased on the Midland Valley property in 1916, and as operating costs did not expand rapidly, the net receipts were also far higher than in the previous year. The total balance remaining after fixed charges equaled no less than 5% on the outstanding preferred stock. This compared with only 1½% reported in 1915.

Comment: There were practically no capitalization changes on this property during the year ending June 30, 1916. The company is rather heavily capitalized and has found it difficult in some years in showing very large net income on net capital. In the year just closed, however, the average shown was far above any figures reported since 1911, and this result added substantially to the credit of the property.

Note: "Average income available" is the average net income available per mile for interest charges, after deducting taxes for the nine years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

MINNEAPOLIS & ST. LOUIS RAILROAD COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated in Iowa June 30, 1916, as a consolidation of a Minnesota company of the same name and the Iowa Central & Western Ry. The old company was successor in 1884 to the Minneapolis & St. Louis Ry. which company controlled by stock ownership the Des Moines & Fort Dodge Ry., operating about 138 miles from Ruthven to Des Moines, Ia. This property was formerly leased to the Chicago, Rock Island & Pacific Ry., but on Jan. 1, 1905, the Minneapolis & St. Louis took over the operation of the road on a lease extending to Jan. 1, 1935. In Aug., 1915, the Minn. & St. Louis R.R. acquired this property by purchase and the company was directly merged. In December, 1911, the properties of the Minnesota, Dakota & Pacific Ry. were formally merged, and the mileage placed under the new refunding and extension mortgage. On Dec. 20, 1911, the Iowa Central Railway, with its leased and operated lines, and all other property, was formally merged with the Minneapolis & St. Louis.

Purchase of Des Moines & Fort Dodge: On Aug. 9, 1915, the Des Moines & Fort Dodge R.R. formerly operated under lease, was purchased and directly merged with the Minn. & St. Louis. In the exchange of stock one share of common was given for two shares of common of Des Moines & Fort Dodge and preferred stockholders were given 50% in preferred stock and 50% in refunding 5s of the Minn. & St. Louis.

Capital Readjustment: In order to provide cash for the retirement of the old company's $2,500,000 6% notes maturing February 1, 1916, to retire floating debt and secure new working capital, the company authorized a single stock issue of $26,000,000, of which $25,692,600 was issued on the following plan:

(1) To holders of old preferred stock in exchange for former holdings, 70% in new stock, requiring $4,385,570.

(2) To holders of old preferred stock who paid a cash assessment of $20 per share, 80% additional in new stock, requiring $5,012,080.

(3) To holders of old common stock in exchange for former holdings, 22% of new stock, requiring $3,604,898.

(4) To holders of old common stock who paid a cash assessment of $20 per share, 78% in new stock, requiring $12,781,002.

Location: The directly operated lines of the Minneapolis & St. Louis R.R. consisted on June 30, 1916, of 1,646.47 miles, as follows: Lines owned, 1,500.81 miles; lines leased, 36.60 miles; trackage rights, 109.06 miles. Mileage is mainly in States of Minnesota, South Dakota and Iowa. Population of these States in 1890, 3,542,530; in 1900, 4,384,817; in 1910, 4,884,367.

Comment: A sharp increase occurred in freight density of the Minneapolis & St. Louis property for the year ended June 30, 1916. The management also succeeded in further improving the average freight train load, while train mile earnings rose to a new high figure. The freight tonnage was well diversified during the year and the total tonnage carried was very much in excess of that reported in earlier years.

Note: For 1911 and thereafter the figures cover the consolidated company, including Iowa Central; the earlier years cover Minneapolis and St. Louis only. For income figures of Iowa Central prior to 1911 see "Moody's Analyses" for 1912.

Profit and Loss Account, year ended June 30, 1916: Credit Balance June 30, 1915, $289,881; credit balance transferred from income, $639,097; unrefundable overcharges, $11,188; miscellaneous credits, $21,734; total, $961,900. Contra: Miscellaneous appropriations of surplus, $165,949; loss on retired road and equipment, $77,723; delayed income debits, $37,754; miscellaneous debits, $21,904; credit balance carried to balance sheet, $658,570; total, $961,900.

Comment: Both gross and net revenues underwent a sharp advance on this property in the year 1916, and the balance available for charges was much higher than has ever before been reported. As fixed charges did not increase, but tended to decline, the final surplus was equal to no less than 10% on the present outstanding preferred stock issue. Conditions since the close of the fiscal year have continued to be very favorable.

Note: In above balance-sheet, the figures prior to 1912 do not include those of the Iowa Central, which was merged during 1911. The large increases in capital stock and bonded debt in 1912 are due to this merger. Of funded debt for 1916, shown above, $1,275,310 was held in the treasury unpledged on June 30. The property of Des Moines and Fort Dodge was acquired Aug. 9, 1915, which accounts for the large increase in securities outstanding. New company has $25,972,600 capital stock all of one class.

Comment: The capitalization of the Minneapolis & St. Louis was radically readjusted during the fiscal year ended June 30, 1916. The bonded debt was increased as was also the capital stock, and at the present time the net capitalization as measured on the mileage basis is far higher than ever before. The earnings of the company, however, have grown so substantially that in the year just closed the net income on net capital was maintained well above the average for the decade.

The capital readjustment has had the favorable effect of providing for the matured notes and liquidating the floating debt, as well as furnishing the company with a substantial amount of new cash. Under these changed conditions the outlook for the company is much more favorable than it was a year or two ago.

Comment: During the fiscal year ended June 30, 1916, both freight and passenger density improved on the Mississippi Central R.R., and a moderately higher figure was reached for the average train load. Train mile earnings were also increased above those reported in 1915, but did not reach as high a figure as reported in earlier years. As has always been the case this company depends mainly on lumber for its freight tonnage, this type of traffic representing last year more than 80% of the tonnage.

Note: Above statement is based on average mileage directly operated for each year. Margin of safety is the proportion of surplus left over after deducting fixed charges. For example, in 1916 the "balance for charges" was (per mile) $2,153; fixed charges consumed, $1,174 or 55% of this, leaving $979, a "margin of safety" of 45%.

Note: Fixed charges included interest, and sinking fund. Other income consisted of hire of equipment credits and interest.

Profit and Loss Account, year ending June 30, 1916: Credit balance at beginning of year, $656,885; credit balance transferred from income, $99,858; donations, $480; miscellaneous credits, $16,794; total, $774.017. Contra: Surplus applied to sinking and other reserve funds, $6,415; dividend appropriations of surplus, $78,715; surplus appropriated for investment in physical property, $480; loss on retired road and equipment, $4,414; miscellaneous debits, $7,998; credit balance carried to balance sheet, $675,995; total, $774,017.

Comment: Both gross and net operating revenues increased substantially on this property during the year 1916, and as there was a sharp decline in the total fixed charges the final surplus ranged well above the figures of 1915. The balance finally reported was equal to 4.1% on the outstanding stock.

Viewing the exhibit for the entire decade, the company has not shown any real growth in earning power; while as measured on the mileage basis there has been an actual decline in revenues. Fixed charges, however, have not advanced and therefore a substantial average has been maintained for the margin of safety.

Note: Working assets in 1916 included $115,000 of the company's own bonds. Funded debt outstanding, as shown above, includes $230,500 bonds held alive in sinking fund.

Comment: There were no capitalization changes of importance on the Mississippi Central Railroad in the year ended June 30, 1916. The road is rather heavily capitalized considering its traffic density, but in recent years the company has succeeded fairly well in carrying this capitalization. It has steadily added to its profit and loss surplus which now stands at substantial figures.

Yard-tracks and sidings, 17.57 miles. Gauge, 3 feet. 40-lb. rails.

Comment: This small property has not in recent years shown any progress in its volume of business and in 1916 both the passenger and freight density were lower than during any year in the past decade. It will be noticed also that the average freight train load is very light. Freight business is all of a local nature and the only reason why the company can make any money at all is that it secures unusually high freight rates. The tonnage is well diversified, as is shown by the above classification table.

Profit and Loss Account, year ending June 30, 1916: Credit balance June 30, 1915, $91,896; miscellaneous credits, $2,390; total, $94,286. Contra: Debit balance transferred from income, $25,599; surplus appropriated for investment in physical property, $1,088; debt discount extinguished through surplus, $5,800; loss on retired road and equipment, $3,233; miscellaneous debits, $6,033; credit balance carried to balance sheet, $52,533; total, $94,286.

Comment: Gross revenues declined moderately on this property during the year ended June 30, 1916, but there was so large a reduction in maintenance and operating costs that net receipts were far above those of the previous year. The company did not, however, earn its full fixed chargess and for the third time was obliged to report a considerable deficit.

Comment: The Nevada-California-Oregon Railway reports practically no changes in its capitalization figures for the year ended June 30, 1916. The company is lightly capitalized as measured on a mileage basis and in recent years the net capitalization has steadily tended downward. But earnings have also fallen off without interruption and at the present time the net income on net capital ranges far below the figures of seven or eight years ago.

Yard tracks and sidings owned, 64.70 miles.

Comment: The operating results of this property during the year ended June 30, 1916, reflected very substantial progress, especially in its freight business. The freight density was higher than during any previous year and it will be noted that the average freight train load also improved. There was but slight change in the freight and passenger rates and a small decline was reported in the average train mile earnings. As usual, the property depended mainly upon the transportation of lumber for its freight tonnage.

Contra: Surplus appropriated for investment in physical property, $30,264; loss on retired road and equipment, $5,331; delayed income debits, $2,199; miscellaneous debits, $3,122; credit balance carried to balance sheet, $652,323; total, $693,239.

Comment: Both gross and net operating revenues underwent very substantial improvement on the New Orleans Great Northern Railroad during the year ended June 30, 1916. Income from outside sources was also higher than usual and the balance carried forward after payment of the fixed charges was, therefore, very substantial. The company reported surplus earnings of more than 3% on its outstanding stock, as compared with a moderate deficit during the previous year.

THE NEW YORK CENTRAL RAILROAD COMPANY

Origin: Incorporated under the laws of New York, Ohio, Illinois, Indiana and Pennsylvania on Dec. 22, 1914, and under the laws of Michigan on Dec. 23, 1914. The company has been formed by consolidation of the New York Central & Hudson River Railroad Co., the Lake Shore & Michigan Southern Railway Co., Geneva, Corning & Southern Railroad Co., the Terminal Railway of Buffalo, the Dunkirk, Allegheny Valley & Pittsburgh Railroad Co., the Chicago, Indiana & Southern Railroad Co., the Detroit & Chicago Railroad Co., the Detroit, Monroe & Toledo Railroad Co., the Kalamazoo & White Pigeon Railroad Co., the Northern Central Michigan Railroad Co. and the Swan Creek Railroad Co. of Toledo, under agreement for consolidation, dated April 29, 1914. In 1915 company merged the Jamestown, Franklin & Clearfield R.R., Cleveland Short Line Ry., Sturgis, Goshen & St. Louis Ry., and Elkhart & Western R.R. In July, 1916, the company sold its controlling interest in the New York, Chicago & St. Louis R.R. to Cleveland bankers for $8,500,000, of which $2,000,000 was paid in cash and balance in notes.

The agreement for consolidation, dated April 29, 1914, provided that all shares of the capital stock of any of the consolidating companies which at the time of making said agreement were held by any of said consolidating companies, should be canceled, and that the remaining outstanding shares of the capital stock of the said consolidating companies should be converted into shares of the consolidated corporation.

For each share of stock of The New York Central & Hudson River Railroad Company, one share of stock of the Consolidated Corporation.

For each share of stock of The Lake Shore & Michigan Southern Railway Company, five shares of stock of the Consolidated Corporation.

For each share of stock of Geneva, Corning & Southern Railroad Company, seven-eighths of one share of stock of the Consolidated Corporation.

For each share of stock of The Dunkirk, Allegheny Valley & Pittsburgh Railroad Company, three-eighths of one share of stock of the Consolidated Corporation.

For each share of stock of Chicago, Indiana & Southern Railroad Company, one-half of one share of stock of the Consolidated Corporation.

For each share of stock of Detroit & Chicago Railroad Company, one share of stock of the Consolidated Corporation.

For each share of stock of Detroit, Monroe & Toledo Railroad Company, two shares of stock of the Consolidated Corporation.

For each share of stock of the Kalamazoo & White Pigeon Railroad Company, one-half of one share of stock of the Consolidated Corporation.

For each share of stock of The Northern Central Michigan Railroad Company, one-half of one share of stock of the Consolidated Corporation.

For each share of stock of The Swan Creek Railway Company of Toledo, one-half of one share of stock of the Consolidated Corporation.

The agreement for consolidation provided that the amount of the capital stock of the Consolidated Corporation should be $300,000,000 divided into 3,000,000 shares of the par value of $100 each. Of this amount, $249,590,460 was issuable to stockholders of the constituent companies in exchange for outstanding stock of those companies as follows:

The New York Central & Hudson River R. R. Co. (which includes the unexchanged certificates of stock of the R., W. & O. R.R. Co. 4,164 shares, U. & B. R. R.R. Co. 959 shares, O. & R. R.R. Co. 62 shares and C., W. & S. H. R.R. Co. 22 shares)	$225,581,066
The Lake Shore & Michigan Southern Ry. Co.	23,534,500

Detroit & Chicago R.R. Co.	900
Detroit, Monroe & Toledo R.R. Co.	2,200
Kalamazoo & White Pigeon R.R. Co.	700
The Northern Central Michigan R.R. Co.	1,650
The Swan Creek Railway Company of Toledo	500
	$249,590,460

For further details regarding exchange of securities in the formation of the merger, see pages 431 and 432 of the 1915 edition of MOODY'S ANALYSES OF RAILROADS.

Location: The directly operated mileage of The New York Central Railroad Company embraces the main line from New York to Chicago, 953.47 miles, and various branches in New York State, Ohio, Indiana, Illinois, Michigan, etc., about 2,745.98 miles; proprietary and leased lines and mileage operated under contract, about 1,473.99 miles; trackage rights, 466.79 miles; making 5,640.23 miles in all. In addition, the Boston & Albany R.R., 393.97 miles is leased but separately operated. Other controlled lines separately operated constitute 6,609.91 miles; making a total in the New York Central system, as of Jan. 1, 1916 (less duplications), 12,644.11 miles.

The mileage of the New York Central R.R. is classified as follows:

Lines owned:	Miles

Trackage	467

The Controlled Separately Operated Lines are as follows: Michigan Central R.R. system; C., C., C. & St. Louis Ry. system; Lake Erie & Western R.R.; Cincinnati Northern R.R.; Pittsburg & Lake Erie R.R.; Chicago, Kalamazoo & Saginaw R.R.; Detroit & Charlevoix R.R.; Toledo & Ohio Central Railway; Kanawha & Michigan R.R.; Zanesville & Western R.R.; Indiana Harbor Belt R.R. (joint control); Rutland R.R.; Toronto, Hamilton & Buffalo R.R. (joint control). See following pages for full analyses and descriptions of these separately-operated properties.

Note: Predecessor company (The New York Central & Hudson River R.R.), incorporated under laws of State of New York for 500 years, on April 16, 1913, as a consolidation of the old New York Central & Hudson River R.R., the Rome, Watertown & Ogdensburg, the Utica & Black River, the Oswego & Rome, the Carthage, Watertown & Sackets Harbor R.R., the Little Falls & Dolgeville, and the Niagara Falls Branch R.R. Prior to this date, the old New York Central & Hudson River R.R. had formally merged the Spuyten Duyvil & Mount Morris R.R., the New York & Putnam R.R., the Mohawk & Malone Ry., Carthage & Adirondack Ry., Gouverneur & Oswegatchie R.R., the New York & Ottawa R.R., Tivoli Hollow R.R., Buffalo Erie Basin R.R., New York Central Niagara River R.R., and Tonawanda Island Bridge Co. These latter properties had previously made up a part of the directly-operated lines of the system, being controlled by either lease or stock ownership, but had maintained their separate organizations. Prior to the consolidation of subsidiaries as above, the outstanding stock of the New York Central & Hudson River R.R. Co. was $222,729,300. Under the consolidation, the amount of stock outstanding of the new company is increased to $225,581,100. The terms of consolidation were as follows: Exchange of share for share of old company for new company; 1 28-100 shares in new company for one share of Rome, Watertown & Ogdensburg R.R.; 1 80-100 shares in new company for one share of Utica & Black River R.R.; 30-100 share in new company for one share of Oswego & Rome stock; two shares in new company for one share in Carthage, Watertown & Sackets Harbor R.R.; one share in new company for one share in Little Falls & Dolgeville R.R. These exchanges involved in all, the issuance of $2,851,766 in new stock of consolidated company, beyond the amount outstanding of the original New York Central & Hudson River R.R. Co. For earlier details, see back issues of MOODY'S ANALYSES OF RAILROADS.

Fiscal year ends Dec. 31. Above figures since 1912 are those filed with Interstate Commerce Commission.

Note: The 1915 figures, as presented above, embrace the operations of the new New York Central R.R. for the six months to June 30, 1915, and are a consolidation of the results of the old New York Central & Hudson River R.R., Lake Shore & Michigan Southern R.R., Chicago, Indiana & Southern R.R., Dunkirk, Allegheny Valley & Pittsburg R.R. and Terminal Ry. of Buffalo for the last six months of 1914; these being the former separately operated properties which now constitute the New York Central R.R. Co. (See note above.)

Comment: For the year ended June 30, 1916, the tonnage figures of the New York Central Railroad Company underwent a very remarkable improvement. The freight density was far higher than ever before, while the passenger density improved considerably over recent figures. I will be noted that the company made a noticeable improvement in its average freight train load and also increased its train mile earnings to a new high figure. As usual the freight tonnage of the property was well diversified, the proportion of high-grade freight being larger this year than usual.

Note: Above exhibit for 1915 covers the mileage of the new system (including Lake Shore & Michigan Southern R.R., Chicago, Indiana & Western, etc.) for the full year ended June 30, 1915, with "directly operated" mileage of 5,980 miles. The earlier years cover the old New York Central & Hudson River R.R. only. For separate report on the years prior to 1915, on the Lake Shore & Michigan Southern, see 1915 edition of MOODY'S ANALYSES OF INVESTMENTS.

Margin of safety is the proportion of surplus left over after deducting fixed charges. For example, in 1916 the "balance for charges" (per mile) was $14,232; fixed charges consumed $7,523 of this, or about 53%, leaving $6,709, a "margin of safety" of 47%.

Note: Above income statement for 1915 covers the entire merged property for the full year to June 30th. The figures are those filed with the Interstate Commerce Commission.

Profit and Loss Account, year ended June 30, 1916: Credit balance, June 30, 1915, $25,366,666; credit balance transferred from income account, $27,907,123; profit on road and equipment sold, $41,302; unrefundable overcharges, $83,064; donations, $8,585; miscellaneous credits, $214,145; total, $53,620,885. Contra: Surplus appropriated for investment in physical property, $8,585; debt discount extinguished through surplus, $90,919; loss on retired road and equipment, $618,902; miscellaneous debits, $3,058,456; credit balance carried to balance sheet, $49,844,023; total, $53,620,885.

Comment: For the year ended June 30, 1916, the New York Central R.R. reported the best income results in the history of the property. Both gross and net revenues underwent sharp advances, the net operating receipts being more than 50% higher than those of the previous year. Fixed charges tended to decline, and it will be noted that the surplus above charges was very heavy and equalled no less than 16.2% on the outstanding capital stock.

Comment: During the year ended June 30, 1916, there were practically no capitalization changes on the New York Central Railroad. It will be noted that as measured on the mileage basis there was a slight decline in the net capitalization. The earnings of the property, however, increased so rapidly that the net income on net capital averaged no less than 10% on this net capitalization. During the year 1916 the company almost doubled its profit and loss surplus.

Note: It is not possible to base the above averages on 10-year results, because of the fact that earnings of the Lake Shore & Michigan Southern, Chicago, Indiana & Southern and other merged lines were reported separately prior to 1915. We therefore show the "income available" in all cases, as shown from the results of the consolidated property for the two years ended June 30, 1916, as reported to the Interstate Commerce Commission.

45. Auth., $167,102,400; outstanding, $65,206,000 series A; to be issued in four series as follows: Series A, $90,578,400 in exchange for Lake Shore collateral 3½s (No. 11); Series B, $19,336,000 in exchange for Michigan Central collateral 3½s (No. 12); Series C, $48,000,000 in exchange for debenture 4s due 1934 (No. 14); Series D, $9,188,000 in exchange for debenture 4s due 1942 (No. 20). Dated Aug. 1, 1913; due Feb. 1, 1998. Int. paid at Grand Central Terminal, New York. Coupon, $1,000; reg., $1,000, $5,000 and multiples. Series A bonds have been offered in exchange for N. Y. C.-Lake Shore collateral 3½s, par for par. Those which are thus exchanged are to be secured by a supplemental indenture on the Lake Shore property, subject to the Lake Shore first mortgage 3½s, Lake Shore debenture (two issues) and such of the collateral 3½s as are not exchanged. When Series B are issued a similar provision will be made with respect to the bonds on that property, and the Michigan Central collateral 3½s will be a prior lien to these bonds on the Michigan Central property. This mortgage further secures the debentures of 1934 and 1942 (Nos. 14 and 20), their lien being on an equality with the bonds issued under this mortgage.

This "Consolidation" mortgage is a direct obligation and secured on 1,843.89 miles of road as follows: Second lien on 73.57 miles, including Tupper Lake to Nyando, 69.27 miles; Tonawanda to Tonawanda Island, Tivoli Hollow R.R., Buffalo Erie Basin, etc.; third lien on 865.82 miles, including 855.74 miles covered by No. 1 and 10.08 miles covered by No. 44; fourth lien on 663.47 miles, covered by No. 1 by second lien; fifth lien on 241.03 miles, covered by No. 1 by third lien. Also a lien subject to No. 1, on the collateral, terminals and trackage rights covered by that mortgage; also a third lien on leasehold interests and trackage rights covered by No. 6. Series A are further secured subject to the N. Y. C.-Lake Shore collateral 3½s on all the Lake Shore property. The prior liens on the New York Central system, which they follow, cannot be increased (except the N. Y. C. first 3½s), but the company reserves the right to extend any of them to any date prior to Sept. 2, 2013. This "Consolidation" mortgage underlies No. 46, which provides for the retirement or refunding of this issue and all underlying and prior liens. Assumed by New York Central R.R. Nos. 14 and 20 are equally secured. Series A listed on New York Stock Exchange. Legal for S. B. in Cal., Conn., Mass., Vt. Normal income tax deducted from interest.

46. Auth., $500,000,000 (and additional amounts for refunding); now outstanding, $40,000,000 Series "A" (of which series $70,000,000 may be issued). Ultimate limit of issue shall be equal to three times the amount of stock outstanding, together with all prior liens outstanding, less bonds reserved to retire said debt. Dated Oct. 1, 1913; due Oct. 1, 2013. Int. paid at Grand Central Terminal, New York. Coupon, $100, $500 and $1,000; reg., $1,000 and multiples. Mortgage provides that any series may be convertible or callable. Series A is not convertible, but is callable at 110 on 3 months' notice. Interest rate on any series must be limited to 6%; Series A is 4½%.

* For 5%.

Note: Average income available, as shown above, for Nos. 1 to 13, is the two years average surplus of the New York Central Railroad Co. above all taxes and interest charges, but not after deducting rental items represented by guaranteed or assumed dividends on above stocks. The period covered is for the two years ended June 30, 1916. That on No. 14 is the two-year average surplus above all fixed charges including rentals and dividend payments on guaranteed stocks, etc. The dividend requirement on No. 14 is that for the past year. For 1917 the requirement will be 10% greater, as the company has just issued $25,000,000 additional stock. For Key to Stock Ratings, see pages 21-23.

Yard tracks and sidings, Dec. 31, 1915, 55.09 miles. Equipment figures include all owned or leased. Fiscal year ends Dec. 31.

Comment: For the year ended June 30, 1916 the freight density on the Cincinnati Northern reached a figure which was more than double that reported ten years ago. The average freight train load also underwent marked improvement and notwithstanding the fact that freight rates averaged lower than usual, the train mile earnings reached a new high figure. As usual the freight business was made up mainly of transportation of coal, which represented during the past year more than 71% of the total business done.

Profit and Loss Account, year ended June 30, 1916. Credit balance June 30, 1915, $21,723; credit balance transferred from income, $329,333; unrefundable overcharges, $113; donations, $2,602; miscellaneous credits, $77; total, $353,848. Contra: Dividend appropriations of surplus, $90,000; surplus appropriated for investment in physical property, $2,144; loss on retired road and equipment, $24,252; miscellaneous debits $2; credit balance carried to balance sheet, $237,450; total, $253,848.

Comment: Gross and net operating revenues on the Cincinnati Northern for the year ended June 30, 1916, were the best ever reported. The balance available for charges was also far higher than in any previous year, and although the fixed charges increased somewhat, yet the final surplus equalled over 11% on the outstanding stock. During the year a dividend of 3% was paid from the surplus account. This is the first disbursement since 1913.

Comment: The chief capitalization change in the Cincinnati Northern during the year ended June 30, 1916, was an increase in the funded debt caused by the sale of a substantial amount of the equipment notes. The property, however, is very lightly capitalized and even in the poorest years the company has succeeded in earning a fair net income on this net capital. For the year just closed the percentage was nearly 13%.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. CLEVELAND, CINCINNATI, CHICAGO & ST. LOUIS RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated June 27, 1889, under Ohio laws as a consolidation of the Cincinnati, Indianapolis, St. Louis & Chicago, the Cleveland, Columbus, Cincinnati & Indianapolis and the Indianapolis & St. Louis Ry. Cos. The following year the company acquired the Cincinnati, Sandusky & Cleveland, the Columbus, Springfield & Cincinnati, the Cairo, Vincennes & Chicago, the Cincinnati, Lafayette & Chicago, the White Water R.R., the Cincinnati & Springfield Ry., the Cincinnati, Wabash & Michigan Ry., and the main line of the St. Louis, Alton & Terre Haute R.R.

Location: The directly operated lines of the system consisted on Dec. 31, 1915, of 2,384.88 miles, as follows: Main lines owned, 1,451.99 miles; branches owned, 235.88 miles; proprietary lines, 126.09; leased lines, 204.40; trackage rights, 165.15 miles. The Peoria & Eastern Ry., consisting of 201.37 miles from Pekin, Ill., to Indianapolis, is now directly operated under contract. The lines radiate throughout the States of Ohio, Indiana and Illinois, entering Cleveland, Columbus, Cincinnati, Chicago, St. Louis, Cairo, Louisville, etc. Population of these three States in 1890, 9,691,071; in 1900, 11,495,557; in 1910, 13,106,588.

Controlled Roads: In addition to its directly operated properties, the C., C., C. & St. L. Ry. Co. controls the Cincinnati Northern R.R., the Mount Gilead Short Line R.R. and has a half interest with the Chesapeake & Ohio in the Louisville & Jeffersonville Bridge Co., guaranteeing interest on $3,000,000 bonds of the latter. The company also has an interest in the Central Indiana Ry. and in a number of terminal and union station companies.

Control: The New York Central Railroad Co. owns $30,207,000 out of $47,056,300 common stock.

Yard tracks and sidings, June 30, 1916, 1,303 miles.

Comment: For the year ended June 30, 1916 the Cleveland, Cincinnati, Chicago & St. Louis Railway reported a very pronounced improvement in both passenger and freight density. The freight density well exceeded figures of any previous years, while the average freight train load was moved up to a new high figure. Although there was no important change in passenger or freight rates it will be noted that the train mile earnings ranged at a high level and far above the average for the decade.

Note: Foregoing table is based on average mileage operated for each year. Margin of safety is the proportion of surplus left over after deducting fixed charges. For example, the "balance for charges" (per mile) in 1916 amounted to $5,993; fixed charges consumed $3,012 of this or about 50%, thus leaving $2,981, a "margin of safety" of 50%.

Note: Fixed charges, as shown above, include interest charges, rentals of leased lines, hire of equipment, loss on operation of Central Indiana Ry., joint facilities, rents, and in 1911, the "equipment reserve" item of $446,316. The latter was the company's proportionate obligation for the year of the New York Central Equipment Trusts. The figures as shown above for 1913, 1914, 1915 and 1916, are those submitted to the Interstate Commerce Commission.

Profit and Loss Account, year ended June 30, 1916. Credit balance transferred from income, $6,866,275; unrefundable overcharges, $5,872; donations, $11,297; miscellaneous credits, $204,703; total, $7,088,147. Contra: Debit balance at beginning of year, $4,358,493; appropriations for property, $19,899; loss on retired road and equipment, $939,732; miscellaneous debits, $6,090; credit balance carried to balance sheet, $1,763,933; total, $7,088,147.

Comment: Both gross and net operating revenues increased sharply on the Cleveland, Cincinnati, Chicago & St. Louis property during the year ended June 30, 1916. The total net income after payment of taxes was nearly 80% above the figures of 1915 and almost five times the figures reported in 1914. Fixed charges tended to decline during the year and therefore the balance carried over reached a remarkable total. This surplus was equal to no less than 71% on the outstanding preferred stock. With this result accomplished the company was fully justified in resuming preferred dividends during the year and is at present in a very strong position to begin payments on the outstanding common stock.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

Note: The bond obligations of the C., C., C. & St. Louis Railway, for the most part, stand on a strong investment plane. Nos. 16 to 19 are obligations of the Peoria & Eastern Ry., but the latter road is now directly operated by the C., C., C. & St. Louis Ry., which guarantees the interest on Nos. 16 to 18 under terms of the lease.

INDIANA HARBOR BELT RAILROAD

Origin: Incorporated under Indiana laws May 16, 1896, under name of East Chicago Belt R.R. Name changed to above on June 29, 1907. On the latter date the company took over the rights of the Michigan Central Railroad in thetracks of the Chicago Junction Railway, operating from Whiting, Ind., to Franklin Park, Ill.; also the property from Hammond to Grasselli, Ind., and the Terminal Railroad extending from the Union Station Stock Yards to Argo, Ill. That section of the Chicago Junction Railway known as the "Outer Belt," which originally belonged to the Chicago, Hammond & Western Railroad, was sold in June, 1907. Until 1911 the Indiana Harbor Belt Railroad was owned jointly by the Lake Shore & Michigan Southern Railway and the Michigan Central Railroad. In April, 1911, however, an agreement was made between the Chicago, Milwaukee & St. Paul, the Chicago & Northwestern, the Michigan Central, and the Lake Shore & Michigan Southern, whereby the two latter companies sold in equal proportions to the former companies 40% of their entire holdings in the capital stock of the Indiana Harbor Belt Railroad, and a similar interest in certain other obligations of the company. The Lake Shore & Michigan Southern guaranteed the bond issue of the Indiana Harbor Belt, and to the extent of 20% each, the Chicago, Milwaukee & St. Paul and the Chicago & Northwestern further agree to protect the guarantors of these bonds.

Location: Lines of road operated 109.54 miles, consisting of 45.47 miles owned and balance operated under contract and trackage rights. The entire system forms the Outer Belt Line around the City of Chicago. Total track, including second track, sidings, etc., 412.44 miles.

Management: OFFICERS: Alfred H. Smith, Pres., New York, N. Y.; W. K. Vanderbilt, Jr., Vice-Pres., New York, J. J. Bernet, Vice-Pres., Chicago, Ill.; D. W. Pardee, Sec.; M. S. Barger, Treas., New York, N. Y. DIRECTORS: H. B. Ledyard, Detroit, Mich.; A. H. Smith, W. C. Brown, Wm. H. Newman, Wm. K. Vanderbilt, Wm. Rockefeller, New York, N. Y.; Marvin Hughitt, Wm. A. Gardner, A. J. Earling, E. D. Sewall, Chicago, Ill. Annual meeting, first Tuesday in October. OFFICE, Gibson, Ind.

Note: The Indiana Harbor Belt Railroad being a switching and terminal company, its reports to the Interstate Commerce Commission do not contain statistics as to classification of freight tonnage and operation, such as freight density, average rate per ton mile, etc. Table A is therefore omitted as no data are available for the compilation of this table other than figures as to mileage operated. Equipment: Locomotives, 51; cars, 159.

* Deficit.

Note: Above figures are based on average mileage operated each year. Margin of safety is the proportion of surplus left over after deducting fixed charges. For example, in 1916 the "balance for charges" (per mile) was $13,398; fixed charges consumed $11,981, leaving $1,417, or a "margin of safety" of 11%. In earlier years full fixed charges have not been covered.

Profit and Loss Account, year ending June 30, 1916: Debit balance at beginning of year, $2,394,453; loss on retired road and equipment, $658; miscellaneous debits, $2,086; total, $2,398,197. Contra: Credit balance transferred from income, $155,862; unrefundable overcharges, $844; miscellaneous credits, $849; debit balance carried to balance sheet, $2,240,642; total, $2,398,197.

Comment: While the Indiana Harbor Belt property has shown great growth in earning power during the past ten years, yet the fixed charges have grown proportionately, and not until 1916 did the company report any final surplus. The properties are, however, of great value to the owners, and the strength of the bond obligations is based on the joint guarantees.

Credit balance from income account, $1,210,588; profit on road and equipment sold, $8,735; unrefundable overcharges, $3,409; miscellaneous credits, $3,062; total, $1,225,794. Contra: Debit balance at beginning of year, $521,339; loss on retired road and equipment, $38,243; miscellaneous debits, $8,988; credit balance at close of year, $657,224; total, $1,225,794.

Comment: Both gross and net revenues increased sharply on the Lake Erie & Western property in the year ended June 30, 1916, the net revenues being nearly double those reported for 1915. As the company actually decreased its fixed charges to some extent a very large surplus was reported. This surplus equalled over 10% on the outstanding preferred stock, as compared with deficits during the three previous years.

Note: Above balance sheet does not include the bonds of the Northern Ohio Railway, which are a guaranteed liability.

Comment: There was no capitalization change in the Lake Erie & Western during the year ended June 30, 1916. The road is not heavily capitalized as measured on a mileage basis, which heretofore has been a light earner and the net income on net capital has, therefore, ranged low. For the year just closed, however, this net income equalled 6.7%, which is the best exhibit ever shown by the property.

Yard tracks and sidings, June 30, 1916, 612.41 miles.

Comment: During the year ended June 30, 1916, the freight density on the Pittsburgh & Lake Erie property was moved up to the highest figure ever reported. The company also succeeded in further increasing its freight train load, which is now higher than that of any other important railroad in the country. It will be noted also that the train mile earnings reached a new high figure and this was accomplished in spite of the fact that there was no improvement whatever in average freight rates.

For a property of its type, the Pittsburgh & Lake Erie has made a truly remarkable exhibit during the entire decade. The profitable nature of its business is indicated by the unusually high train mile earnings which have been reported each year.

Note: The dividend in 1912 as above includes in addition to the regular dividend of 10% paid from current surplus, an extra dividend of 12%, which was charged against "accumulated surplus" in the profit and loss account. An extra dividend of 5% was paid in 1913.

Above table is based on average mileage operated for each year. Margin of safety is the proportion of surplus left over after deducting all fixed charges. For example, in 1916 the "balance for charges" (per mile) amounted to $57,338; fixed charges (which includes rentals, etc.) consumed $12,170 per mile, or 21% of this balance, leaving $45,168, a "margin of safety" of 79%.

Note: In 1915 and 1916 "Other Income," as shown above, included, in addition to dividends and interest on investments, a large amount from rental of equipment. Fixed charges included interest on bonds, rentals of leased lines, joint facilities, rents, transfer of income to other companies. Latter comprised in 1916 over one-half of the total charges.

Profit and Loss Account, year ended June 30, 1916: Credit balance July 1, 1915, $17,398,176; credit balance transferred from income, $7,163,441; unrefundable overcharges, $6,429; miscellaneous credits, $1,846; total, $24,569,892. Contra: Loss on retired road and equipment, $21,485; miscellaneous debits, $90,766; credit balance carried to balance sheet, $24,457,641; total, $24,569,892.

Comment: Gross revenues underwent a sharp advance on this property during the year ended June 30, 1916, and the net receipts increased at an even greater ratio. The figures as reported were more than double those shown in 1915, and even exceeded the high figures of 1914. While there was a large increase in fixed charges, the final surplus carried forward was nevertheless double that of the previous year. The company reported a surplus equal to nearly 34% on its present outstanding capital stock.

Note: Funded debt in balance sheet does not include bonds of leased lines, which are, however, a guaranteed liability.

Comment: There were no important capitalization changes in the Pittsburg & Lake Erie during the year ended June 30, 1916. As measured on a mileage basis the capitalization of this road appears very high, yet the proportion of the bonded debt is relatively small and the earning power of the property is so great that the net capitalization is easily carried. During the year just closed the net income on net capital exceeded 31%, which was far higher than the average for the past decade.

Yard tracks and sidings, June 30, 1916, 1,527.51 miles. Beginning with 1913, equipment figures, as shown above, include equipment leased under equipment trusts, these amounted, in 1915, to 240 locomotives, 135 passenger cars, and 9,468 freight and company cars. Fiscal year ends Dec. 31.

Comment: For the year ended June 30, 1916, the freight and passenger density on this property underwent marked improvement. The freight density especially reflected great prosperity and the high train mile earnings reported indicate that the business done was all done on a profitable basis. The company succeeded in raising its average freight train load to a new high total. It will be noted that the freight tonnage on this property is unusually well diversified and during the year just closed the proportion of high-grade freight was larger than usual.

Profit and Loss Account, year ended June 30, 1916: Credit balance June 30, 1915, $11,952,142; credit balance transferred from income, $4,642,590; unrefundable overcharges, $924; miscellaneous credits, $137,193; total, $16,732,849. Contra: Dividend appropriations of surplus, $187,361; debt discount extinguished through surplus, $150,744; miscellaneous appropriations of surplus, $44,323; miscellaneous debits, $314,454; credit balance carried to balance sheet, $16,036,234; total, $16,732,849.

Comment: Both gross and net revenues underwent very pronounced improvement on the Michigan Central System during the year ended June 30, 1916. The net revenues were over 70% higher than those during the previous year and although fixed charges increased rather sharply, the final balance carried forward was equal to nearly 30% on the outstanding stock. During the year the company increased its dividend rate to 5% and at the present time seems justified in paying even a larger rate.

Comment: The chief capitalization change in the Michigan Central property during the year ended June 30, 1916, was a considerable increase in the total funded debt. This increase was caused mainly by the sale of additional equipment trusts. While the net capitalization of the property now ranges far higher than in earlier days, yet it will be noticed the sharp recent recovery in earning power has made it a comparatively simple matter for the company to carry this increased capitalization. During the year recently closed the net income on net capital was 11.7%, which is much above the average for the decade.

Note: The par value of stocks owned by the Michigan Central R. R. at end of 1915 was $19,412,841,67, and of bonds $1,214,000. Book value, $9,609,694.50. This included stock of Canada Southern Ry., of which the company owns $7,810,000 out of $15,000,000. In detail, the investments held were as follows:

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

New Refunding and Improvement Mortgage. In February, 1917, it was proposed to authorize a new refunding and improvement mortgage, under which bonds to an amount not exceeding $100,000,000 may be issued. The debentures of 1909 (No. 13) will be equally secured under the new mortgage with any bonds that may be issued. After $10,000,000 of such bonds have been issued other than for refunding purposes, additional issues for improvements and betterments or new acquisitions shall be limited to 70% of the cost thereof. The leaseholds of the Canada Southern Railway and the Detroit River Tunnel Company will be subject to the new mortgage, but any expenditures on these properties will be taken care of out of the proceeds of their unissued bonds and issues under the new mortgage shall not be used for that purpose.

COMPANIES CONTROLLED AND OPERATED BY MICHIGAN CENTRAL R.R.

CANADA SOUTHERN RAILWAY

Origin: Incorporated under the laws of the Dominion of Canada, February 28, 1868. Absorbed the Erie & Niagara Ry. in July, 1893, and the Leamington and St. Clair Ry., and the Sarnia, Chatham and Erie Railway on August 1, 1904. The agreement under which this company's system was operated since Jan. 1, 1883, by the Michigan Central R. R. Co. expired Jan. 1, 1904. A new agreement was entered into by which the company leased its property for 999 years from Jan. 1, 1904, to the Michigan Central R. R., rental being dividends at the rate of 2½% per annum until 1910, and at the rate of 3% thereafter, besides assuming all obligations of this company. This agreement was confirmed by an Act of the Dominion Parliament passed in 1904. At the same time an agreement was confirmed for trackage over the Canada Southern Ry. from the St. Clair River to the Niagara River, with the Pere Marquette R.R. Co., at a rental of $165,000 a year, interest on the cost of improvements and a share of the taxes and expenses, this latter agreement running for 99 years. This agreement was modified from Jan. 1, 1908, the Pere Marquette R.R. abandoning its right to use the St. Clair Branch of the Canada Southern Ry., reducing the rental by $50,000 per annum for five years and $27,000 per annum thereafter.

On March 1, 1913, the Canada Southern Ry. turned over to the Michigan Central R.R. Co. all the stocks and bonds of the Canada Southern Bridge Company and the St. Clair & Western R.R. Co. and all the stock and $1,500,000 bonds of the Toledo, Canada Southern and Detroit Ry., in consideration of the guarantee by that company of the principal and interest of $4,500,000 4% Toledo, Canada Southern and Detroit Ry. 4s of 1906.

DETROIT RIVER TUNNEL COMPANY

Origin: Consolidation, Aug. 15, 1905, of the Canada & Michigan Bridge and Tunnel Co., a corporation of the Dominion of Canada, and the Michigan & Canada Bridge and Tunnel Co., a corporation of the State of Michigan. Company was organized for the purpose of building a tunnel under the Detroit River from Windsor, Ont., to Detroit, Mich., and acquiring terminal facilities. The Canadian Railway Commission authorized the use of the tunnel Oct. 14, 1910, and regular passenger and freight service was inaugurated two days later. It was leased to the Michigan Central R.R. for 999 years from Jan. 1, 1907, which company operates and maintains the property and guarantees the Tunnel Company's first mortgage bonds both as to principal and interest, and also a dividend of at least 4% per annum on the capital stock outstanding. The terminal station building at Detroit was put in use Dec. 26, 1913. Length of road, 2.42 miles.

Capital Stock: Authorized and outstanding, $3,000,000. Par $100. 6% dividend paid in 1916. All owned by the Michigan Central R.R.

THE TOLEDO & OHIO CENTRAL RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Successor in 1885 of Ohio Central Railroad. Acquired Columbus & Northwestern Railway in 1906. In 1899 the Middle States Construction Co. acquired in the interest of the Hocking Valley all but $54,100 of the common and all but $11,600 of the preferred stock of the road. This control was declared illegal by the Ohio courts in 1909, and in March, 1910, the Lake Shore & Michigan Southern Ry. acquired practically all the stock, which is now owned by the New York Central R.R.

The Toledo & Ohio Central Railway owns all the stock and bonds of the Zanesville & Western Railway, operating 89 miles from Thurston and Shawnee to Zanesville, Ohio. The company has now also acquired from the Chesapeake & Ohio Railway, the half-interest in the Kanawha and Michigan Railway. See that company. This mileage is separately operated.

Location: The directly operated lines extend from Toledo, south to Columbus, Ohio, with extension to Ohio River, with branches, 435.69 miles in all. Population of Ohio in 1890, 3,672,316; in 1900, 4,157,545; in 1910, 4,767,121.

Management: OFFICERS: Alfred H. Smith, Pres.; W. K. Vanderbilt, Jr., Vice-Pres.; John Carstensen, Chas. F. Daly, Albert H. Harris, Vice-Pres.; F. B. Sheldon, Vice-Pres.; Dwight W. Yard tracks and sidings, on June 30, 1916, 263.85 miles. Fiscal year Dec. 31.

Comment: For the year ended June 30, 1916, the freight density of the Toledo & Ohio Central far exceeded that of the previous year and was even better than the figures reported in 1913. The average freight train load was also greatly improved, and also freight rates tended to decline. Train mile earnings were moved up well above recent figures. As usual the company depended primarily on the transportation of coal for its freight business.

*Deficit.

Note: Above table is based on mileage directly operated for each year. "Margin of safety" is the proportion of surplus left over after deducting all fixed charges. For example, in 1916 the "balance for charges" (per mile) amounted to $4,736; fixed charges consumed $3,328 or 70% of this, leaving a "margin of safety" of $1,408 or 30%. In 1914 and 1915 there was no margin of safety.

Note: The high fixed charges shown in 1914, 1915 and 1916 were caused by special charges, including loss on Zanesville & Western R. R. The figures are those submitted to the Interstate Commerce Commission. Fiscal year ends Dec. 31st.

Profit and Loss Account, year ended June 30, 1916: Credit balance at beginning of year, $3,946,951; credit balance transferred from income, $613,692; unrefundable overcharges, $465; miscellaneous credits, $1,394; total, $4,562,502. Contra: Debt discount extinguished through surplus, $31; loss on retired road and equipment, $15,987; miscellaneous debits, $19,212; credit balance carried to balance sheet, $4,527,272; total, $4,562,502.

Comment: Both gross and net operating revenues underwent marked improvement on the Toledo & Ohio Central property during the year ended June 30, 1916. This income was also very much better than recently and the final surplus available for charges was therefore far above the results of recent times. Fixed charges declined as compared with 1915, and the balance left over was equal to over 16½% on the outstanding preferred stock. No dividends were paid during the year.

Comment: Practically no change occurred in the capitalization figures of the Toledo & Ohio Central during the year ended June 30, 1916. As measured on a mileage basis the company is not heavily capitalized and as usual succeeded in reporting a substantial net income in its net capital. During the year recently closed this net income equalled 13.2%.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issues, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

Profit and Loss Account, year ended June 30, 1916: Credit balance transferred from income, $13,445; unrefundable overcharges, $17; miscellaneous credits. $949; total, $14,421. Contra: Loss on retired road and equipment, $13,642; miscellaneous debits, $779; total, $14,421.

Comment: The direct operations of the Zanesville & Western property in recent years have usually resulted in a loss, as the gross revenues have not equalled operating expenes since 1913. But "other income" has recently become important and in the past three years a surplus above charges has each year been shown. The property is undoubtedly of some value to the Toledo & Ohio Central, which owns its stock and bond issues.

THE KANAWHA AND MICHIGAN RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Dfinitions and Key to Ratings, see pages 19-26.

Origin: Incorporated April 23, 1890, under laws of Ohio and West Virginia, as successor to the Kanawha & Ohio Railway Co. In 1916 acquired the Kanawha & West Virginia R.R.

Location: The directly operated lines consist of 176.6 miles, radiating throughout the Kanawha coal district of West Virginia and entering Ohio, where connection is made with the lines of the Toledo & Ohio Central Ry. The mileage is classified as follows: Main lines: Corning to Hobson, 56.8 miles (Ohio); Kenauga to Gauley Bridge, 96.7 miles (W. Va.); branch from Smithers to Marting, 4.4 miles; trackage rights, 18.7 miles. In addition the company owns a branch from Gloucester to Carrington, 11 miles, which is leased to the Zanesville & Western and the Toledo & Ohio Central companies. In 1916 acquired the Kanawha & West Virginia R.R. extending from Charleston to Blakely, W. Va., 34.5 miles, and branch 4 miles, not included in above mileage. Population of Ohio and West Virginia in 1890, 4,435,020; in 1900, 5,116,345; in 1910, 5,988,240.

Control: Was formerly controlled by the Hocking Valley Ry. Co., which had acquired a majority of the stock from the Toledo & Ohio Central interests. In August, 1906, it was proposed to consolidate the property directly with the Hocking Valley, but this was forbidden by the Ohio State court. In March, 1910, control was acquired jointly by the Chesapeake & Ohio and the Lake Shore & Michigan Southern interests. At the same time, the former acquired control of the Hocking Valley lines and the latter control of the Toledo & Ohio Central lines. In November, 1913, the lower Federal Court held this control to be illegal, and in 1914 the interest of the Chesapeake & Ohio was acquired by the Toledo & Ohio Central, thus making the road a subsidiary of the New York Central system.

Yard tracks and sidings, Dec. 31, 1915, 131.8 miles. Fiscal year ends Dec. 31.

Comment: Both passenger and freight density underwent substantial improvement on the Kanawha & Michigan during the year ended June 30, 1916. The company succeeded also in reporting a higher freight train load and much better train mile earnings. As usual the company depends primarily on the transportation of soft coal for its business and in the year just closed this type of freight represented nearly 82% of the total business done.

Comment: Both gross and net revenues improved decidedly on the Kanawha & Michigan property during the year ended June 30, 1916. The outside income was also better than usual and the balance carried forward was therefore far in excess of the fixed charges. The final surplus equalled nearly 14% on the outstanding stock. During the year the company disbursed dividends of 6¼%.

Comment: There was a slight decrease in the bonded debt of the Kanawha & Michigan property during the year ended June 30, 1916. As measured on a mileage basis the road appears to be heavily capitalized but its volume of business is large and the net income on the net capital has in all recent years ranged at high figures.

* **Note:** "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19-21.

RUTLAND RAILROAD COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated under Vermont laws in July, 1867, as successor of the Rutland & Burlington Railroad. In 1901 the company absorbed the Rutland-Canadian R.R., the Bennington & Rutland Ry., the Ogdensburg & Lake Champlain Ry., and the Chatham & Lebanon Valley R.R. Owns entire capital stock of Ogdensburg Terminal Co., Rutland Transit Co. and entire stock and bonds of the Rutland & Noyan R.R. In January, 1905, control of the company was acquired by the New York Central & Hudson River R.R., through the purchase of $4,704,100 out of $9,057,600 preferred stock. In February, 1911, one-half of the New York Central stock holdings was sold to the New York, New Haven & Hartford R.R. In December, 1911, the latter company applied to the Public Service Commissioners of New York State for permission to purchase the remaining half of the preferred stock, at a price not exceeding cost to New York Central, with carrying charges; permission was granted on May 9, 1912, but in July, 1912, the Supreme Court of New York sustained an injunction brought by the minority stockholders of the Rutland R.R. to prevent the New Haven from purchasing the remaining stock. The injunction was sustained.

Location: Directly operated lines consist of 468.11 miles, as follows: Main line, White Creek, Vt., to Canadian line, 161.42 miles; Chatham, N. Y., to Bennington, Vt., 57.21 miles; Bennington to North Bennington, 4.67 miles; Rutland to Bellows Falls, 52.21 miles; Alburgh, Vt., to Ogdensburg, N. Y., 121.60 miles. Leased lines, 18 miles; trackage rights, 53 miles. Lines chiefly in Vermont and northern New York. Population of Vermont in 1890, 332,422; in 1900, 343,641; in 1910, 355,956.

Management: OFFICERS: A. H. Smith, Pres.; Geo. T. Jarvis, Vice-Pres. and Gen. Mgr.; Howard Elliott, Vice-Pres.; D. W. Pardee, Clerk; A. G. Adams, Asst. Clerk; M. S. Barger, Treas. DIRECTORS: A. H. Yard tracks and sidings, 125.34 miles on June 30, 1916.

Comment: During the year ended June 30, 1916, the Rutland Railroad reported a moderate improvement in its freight density, but there is practically no change in the volume of passenger business. Train mile earnings improved somewhat and the average freight train load was raised to a new high figure. The tonnage of this property is well diversified, but its earning power has been light, chiefly because of low average freight rates, which do not appear to show much improvement.

Note: Above table is based on average mileage operated for each year. Margin of Safety is the proportion of surplus left over after deducting all fixed charges. For example, in 1916 the "balance for charges" (per mile) was $2,660; fixed charges consumed $1,203, or 46% of this, leaving $1,457 a "margin of safety" of 54%.

Profit and Loss Account, year ended June 30, 1916: Credit balance at beginning of year, $928,299; credit balance transferred from income account, $625,212; miscellaneous credits, $2,205; total, $1,555,716. Contra: Credit balance transferred to balance sheet, $1,555,716; total, $1,555,716.

Comment: Both gross and net operating revenues underwent decided improvement on the Rutland Railroad property during the year ended June 30, 1916. As there was a slight decrease in net fixed charges the company was able to report a final surplus nearly double that shown during 1915. This surplus equalled more than 7½ on the outstanding preferred stock.

Comment: There was slight reduction in the bonded debt in the Rutland Railroad during the year ended June 30, 1916. The property is not heavily capitalized as measured on a mileage basis, but in recent years has shown only moderate improvement in its general carning power. For the year just closed the net income on the net capital, however, reached the best figure reported during the decade.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

NEW YORK, CHICAGO & ST. LOUIS RAILROAD COMPANY

Note: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated under laws of New York, Pennsylvania, Ohio, and Indiana, Sept. 17, 1887, and succeeded to the property of the old New York, Chicago & St. Louis Railwny, which wns sold under foreclosure May 19, 1887. The company was formerly controlled by The New York Central Railroad Co., which owned $2,503.000 out of $5,000,000 first preferred, $6,275,000 out of $11,000,000 second preferred, and $6,240,000 out of $14,000,000 common stock. This stock interest was sold in 1916 (see below).

Location: The operated lines of the company consist of 523.02 miles, as follows: Main line, Buffalo to Silver Creek, N. Y., 30.69 miles, and Dunkirk, N. Y., to Illinois State line, 464.03 miles; Chicago & State Line R.R., Illinois State line to Grand Crossing, Ill., 9.96 miles; New York Central R.R., Silver Creek to Dunkirk, N. Y., 7.84 miles; trackage rights in Buffalo, 1.60 miles; in Chicago, 8.90 miles. Population of New York, Indiana, and Ohio in 1890, 12,298,257; in 1900, 14,759,553; in 1910, 16,581,611.

New Control: The New York Central R.R. in July, 1916, sold its controlling interest in the company to Cleveland interests represented by O. P. and M. J. Van Sweringen for $8,500,000, of which $2,000,000 was paid in cash and the remainder in ten notes of $650,000 each, the first maturing in five years and the remaining ones at intervals of one year thereafter. Owing to the consolidation of the Lake Shore and New York Central, the New York, Chicago & St. Louis became a parallel competing line and the New York Central could not retain its control without violating the law. In Dec. 1916 the Nickel Plate Securities Corp. was incorpornted in Delaware to hold control of the property.

Management: Officers: O. P. Van Sweringen, Chairman; J. J. Bernet, Pres.; W. S. Hayden, Vice-Pres.; J. R. Nutt, Vice-Pres.; M. J. Van Sweringen, Vice-Pres.; W. D. Turner, Sec.; Otto Miller, Treas. Yard tracks and sidings, June 30, 1916, 272.15 miles. Equipment figures, as shown above, include that owned and leased.

Comment: For the year ended June 30, 1916, a very heavy increase occurred in freight density of this property. The figures reached the highest average ever reported, while there was also a further substantial improvement in both train mile earnings and average freight train load. The company's tonnage was during the year well diversified and there was as usual a substantial proportion of the business represented by high-grade freight.

Note: Fixed charges include rentals of leased lines, interest on debt, etc. Above figures are based on average mileage directly operated each year. Margin of safety is the proportion of surplus left over after deducting all fixed charges. For example, in 1916 the "balance for charges" (per mile) amounted to $7,299; fixed charges equalled $3,290 per mile, or 45% of this, leaving $4,009 a "margin of safety" of 55%.

Note: The above income figures for 1913, 1914, 1915 and 1916, do not cover the fiscal year, which ends December 31, but are those filed with the Interstate Commerce Commission as of June 30th. Fixed charges include rentals, sinking funds, interest, joint facility rents, etc. The decline in the dividend item in 1914 was due to the fact that the company omitted all payments on the common stock and paid only 2½% on each issue of preferred.

Profit and Loss Account, year ended June 30, 1916: Credit balance at beginning of year, $826,597; credit balance carried from income account, $2,111,326; profit on road and equipment sold, $314; unrefundable overcharges, $4,488; miscellaneous credits, $8,107; total, $2,950,832. Contra: Surplus applied to sinking fund and other reserve funds, $49,198; dividends, $124,948; loss on retired road and equipment, $271,956; miscellaneous debits, $4,701; credit balance carried to balance sheet, $2,500,029.

Comment: During the year ended June 30, 1916, the operating results of the New York, Chicago & St. Louis property were very satisfactory. It will be noted that the net operating revenues were nearly double those of the previous year and after payment of fixed charges the balance carried forward was equal to more than 45% on the first preferred stock. Since the close of the fiscal year the volume of gross business has been fully maintained, but there has been a tendency toward higher operating costs.

While the company experienced a very severe setback in its profits during the years 1914 and 1915 and was forced to suspend all dividend payments for the time, it has now fully recovered. The results shown for 1916 were far better than ever before reported, the surplus available for charges being much heavier than those reported in 1910 and 1911, when full dividends were being paid on all three issues of stock.

Comment: There was practically no change in the exhibit of the New York, Chicago & St. Louis during the year ended June 30, 1916. As measured on a mileage basis the road is heavily capitalized, but recent improvement in earning power has made it easier for the company to carry this capitalization. The company at the present time is in an unusually strong financial condition.

THE NEW YORK, NEW HAVEN & HARTFORD RAILROAD

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated Aug. 6, 1872, under laws of Connecticut, Massachusetts, and Rhode Island, as a consolidation of the New York & New Haven R.R. Co. (which was chartered in Connecticut in May, 1844, and in New York in January, 1846) with the Hartford & New Haven R.R., which had been chartered in Connecticut in May, 1833, and was opened in May, 1839. The Massachusetts section was built under the charter of the Hartford & Springfield R.R., and was opened in December, 1844. In 1848 an agreement was made with the New York & Harlem R.R. Co. whereby the tracks of the latter are used from Woodlawn to the Grand Central Terminal in New York, 12.03 miles. The main line of the company, as consolidated in 1872, consisted of 122.44 miles from Springfield, Mass., to Woodlawn, with short branches aggregating 19.04 miles. The old New York & New Haven R.R. also leased the Shore Line Ry. from New Haven to New London, 48.53 miles, and this lease was assumed by the consolidated company. The Harlem River & Portchester R.R. was leased Oct. 1, 1873; the Boston & New York Air Line on Oct. 1, 1882; the Stamford & New Canaan on Oct. 1, 1884; the New Haven & Northampton R.R., the Naugatuck R.R. and the Hartford & Connecticut Valley R.R. on April 1, 1887; the Housatonic R.R. and its leased lines on June 30, 1892; the New York, Providence & Boston R.R. and its leased lines on July 1, 1892; the Old Colony R.R. and its leased lines on March 1, 1893; the New England R.R. and its leased lines and the Shepaug, Litchfield & Northern R.R. on July 1, 1898, and the Middletown, Meriden & Waterbury on Nov. 1, 1898. Many of these companies have since been formally merged, and in addition the following have now been directly merged with the main company, viz.: Providence & Springfield R.R., Rhode Island & Mass. R.R., Woonsocket & Pascoag, New Haven & Derby, Rockville R.R., Colchester R.R., Providence Terminal Co., Boston & New York Air Line R.R., Pawtuxet Valley R.R., Torrington & Winchester Street Ry., Meriden, Southington & Compounce Tramway, Stafford Springs Street Ry., Farmington Street Ry., Berkshire R.R., Rhode Island & Mass. R.R., Milford & Woonsocket R.R., Milford, Franklin & Providence R.R., and others. In 1909, the New York, New Haven & Hartford purchased at foreclosure sale the property of the Newport & Wickford R.R. & Steamboat Co.

Consolidated Ry.: To control its various street railway and public utility interests, the New York, New Haven & Hartford caused to be incorporated Aug. 31, 1901, under Connecticut laws, the Consolidated Railway, having a capital stock of $10,000,000, all of which was owned by the New York, New Haven & Hartford R.R. This company purchased or leased a large number of street railway and other properties in Connecticut, and acquired control of others in Massachusetts. In May, 1907, however, the Consolidated Railway was formally merged into the New York, New Haven & Hartford R.R. The operating electric traction companies of the Consolidated Ry. are now integral parts of the New Haven system. For disintegration details, see below. Other electric and public utility companies, controlled by stock ownership, and separately operated, are described in "Moody's Analyses of Investments—Public Utilities and Industrials."

Steamship Lines: The New England Navigation Company and the Hartford & New York Transportation Co. are controlled through stock ownership, but under the disintegration plans have now to be segregated. See below. The New England Navigation Co. operates through the New England Steamship Co., the Fall River Line, the Norwich Line, the New Haven Line, the Bridgeport Line, the Providence Line, the New Bedford Line, the Providence-Block Island Line, and the New London-Block Island Line. The Hartford & New York Transportation Co. operates a line between Hartford and New York. In 1907, the New England Navigation Co. acquired the capital stock of the Boston & Philadelphia Steamship Co., operating steamer lines between Boston, Providence and Philadelphia. A half-interest in the Merchants & Miners Transportation Co. was next acquired, which has since been sold. The New England Navigation Co., on June 30, 1916 owned one-half the preferred, two-thirds of the common and $2,500,000 of the bonds of the Eastern Steamship Corporation, latter to be sold by July 1, 1917. The latter company is being reorganized and time limit for sale of securities extended. Also controls the New Bedford, Martha's Vineyard & Nantucket Steamboat Co.

Boston Railroad Holding Co.: On June 30, 1916, the New York, New Haven and Hartford R.R. still owned the entire common stock ($3,106,500), and $24,493,900 out of $27,054,400 preferred stock of the Boston Railroad Holding Co. The latter company in turn owned a majority of the total capital stock of the Boston & Maine R.R. For details regarding "trusteeing" of Boston & Maine stock, see that company and below.

Subsidiary Companies: Other controlled companies of the New York, New Haven & Hartford R.R. are the Central New England Ry., the Connecticut Company, the Rhode Island Company, the Berkshire Street Ry., the New York & Stamford Ry., the Westchester Street R.R., the Millbrook Co., and the Housatonic Power Co.; also, independently reported, the New York, Ontario & Western Ry.

Disintegration Plan—Agreement with Government: The Directors of the company were authorized by the stockholders on April 21, 1914, to complete negotiations and to arrange for the segregation of the various subsidiaries that were under dispute with the Department of Justice. The Department filed its petition in the District Court of the United States, Southern District of New York, on July 23, 1914, and the company filed its answer on Sept. 17, 1914. As agreed the decree, which was signed Oct. 17, 1914, will produce the following results:

First. The New Haven Company transfers to Frank P. Carpenter, of Manchester, New Hampshire, Henry B. Day, of Newton, James L. Doherty, of Springfield, Charles P. Hall, of Newton, and Marcus P. Knowlton, of Springfield, all in Massachusetts, as trustees, 31,065 shares of the common stock and 244,939 shares of the preferred stock (being all of the common and all but 28,000 shares of the preferred stock) of the Boston Railroad Holding Company, the latter being the holder of 6,543 shares of the preferred and 219,189 shares of the common stock (a majority of all outstanding stock) of the Boston & Maine Railroad, in trust to sell the Boston & Maine shares under the order of the Court. The trustees shall hold the shares and exercise all the powers the owners of the shares of the Holding Company are entitled to exercise, excepting the right to sell or dispose of them until otherwise ordered.

No order directing the sale of any of the shares of the Holding Company shall be made by the Court until after July 1st, 1915, unless the New Haven Company shall in writing consent thereto. If no sale is made before July 1st, 1915, the Court, on application of any party, and after a hearing at which the Commonwealth of Massachusetts shall be invited to appear shall determine when a sale shall be made and fix the terms and conditions thereof. The trustees shall also use their best efforts to complete the sale of the shares of the Boston & Maine Railroad before Jan. 1st, 1917.

Second. The New Haven Company transfers to the same trustees, the following shares of corporations, the railroad lines of which are leased to the Boston & Maine or Maine Central Railroad Company:

922 shares of capital stock of the Northern Railroad (of New Hampshire),
1,015 shares of capital stock of the Connecticut River Railroad Company,
63 shares of capital stock of the Manchester & Lawrence Railroad,
246 shares of capital stock of the Hereford Railway Company,
2,469 shares of capital stock of the Concord & Montreal Railroad,
184 shares of capital stock of the Vermont & Massachusetts Railroad Company,
193 shares of capital stock of the Lowell & Andover Railroad Company,
412 shares of capital stock of the Boston & Lowell Railroad Corporation,
710 shares of capital stock of the Pemigewasset Valley Railroad,
1,464 shares of capital stock of the Connecticut & Passumpsic Rivers Railroad Company,
73 shares of capital stock of the Upper Coos Railroad,
18 shares of capital stock of the Concord & Portsmouth Railroad,
98 shares of capital stock of the Wilton Railroad Company,
86 shares of capital stock of the Peterborough Railroad,
84 shares of capital stock of the Nashua & Lowell Railroad Corporation, and
354 shares of capital stock of the Massawippi Valley Railway Company.

The trustees shall hold these shares and exercise all the powers in the management of the corporations which the owners of the shares are entitled to exercise. They shall sell the shares, whenever in their judgment such sale or sales can be made to the best advantage, so long as they remain subject to sale and upon such terms as the New Haven Company shall request in a writing signed by its President or Chairman of the Board of Directors and approved at a meeting by said Board. The trustees shall exercise their best efforts to complete the sale of said shares before January 1st, 1917.

Third. The New England Navigation Company transfers to Lyman B. Brainerd, of Hartford, Charles Cheney, of South Manchester, George E. Hill, of Bridgeport, William W. Hyde, of Hartford, and Walter C. Noyes, of New London, all in Connecticut, as trustees, 400,000 shares, being all of the capital stock of The Connecticut Company. The trustees shall hold these shares and exercise all the powers in the management of The Connecticut Co., which the owners of the shares therein are entitled to exercise. The trustees shall sell said shares for such prices and upon such terms as shall be named by the New Haven Co., and the Navigation Co. in a writing signed by their respective President or Chairman of their Boards of Directors, and approved at a meeting by their Boards. The trustees shall exercise their best efforts to complete the sale of said shares before July 1, 1919.

Fourth. The New Haven Company transfers to John O. Ames, John P. Farnsworth, Rathbone Gardner, Theodore Francis Green, and Charles C. Mumford, all of Providence, R. I., as trustees, 96,855 shares, being all of the capital stock of The Rhode Island Company, and The New England Navigation Company transfers to the same trustees 9,132 shares in the capital stock of the Providence & Danielson Railway Company, bonds of said company to the par value of $600,000, 7,000 shares in the capital stock of the Sea View Railroad Company, and bonds of said company to the par value of $600,000. The trustees shall hold said shares and bonds and exercise all the powers in the management of these trolley companies which the owners of shares therein are entitled to exercise. The trustees shall sell said shares and bonds at such time or times as shall be named by the New Haven Company in a writing signed by its president or the chairman of its Board of Directors, and approved at a meeting by said Board. The trustees shall exercise their best efforts to complete the sale of the said shares and bonds before July 1, 1919.

Fifth. The 53,981 shares of the capital stock of the Berkshire Street Railway Company and the 6,500 shares of capital stock of The Vermont Company, owned by the New Haven Company, shall be sold before July 1, 1919; provided, however, such sale shall not be proceeded with until action shall have been taken by the Commonwealth of Massachusetts authorizing a sale of the shares of the Berkshire Street Railway Company, or until the Court, on the application of any party, and after a hearing at which the Commonwealth of Massachusetts shall be invited to appear, shall by further order so direct.

Sixth. The New England Navigation Company shall sell, on or before July 1, 1917, the 15,000 shares of preferred and 20,000 shares of common stock in the Eastern Steamship Corporation and bonds of said corporation to the par value of $2,500,000, held by it, and pending such sale the New Haven Company and the Navigation Company are enjoined from voting upon the capital stock of said Eastern Steamship Corporation.

Seventh. The New Haven Company shall sell on or before July 1, 1919, 5,000 shares of the capital stock of the New York and Stamford Railway Company, and bonds of the said company to the par value of $678,000, also the rights to the capital stock and other securities of the Westchester Street Railroad Company, now owned by it, and the Navigation Company shall sell on or before July 1, 1919, the rights to the capital stock and other securities of the Shore Line Electric Railroad, a corporation of New York, when the same may be issued, and the gold notes of the New England Investment & Security Company, a voluntary association, to the par value of $13,709,000, now owned by it.

Eighth. The times within which the sales heretofore ordered shall be made may be extended in each case by the Court for good cause shown upon the application of any party or any body of liquidators or trustees, and if they are not sold by the trustees 60 days before the last date fixed for the sale they shall be sold at public auction.

Ninth. None of the shares or other securities hereinbefore ordered sold shall be offered to the stockholders of the New Haven Company as a class either in proportion to their stockholdings or otherwise, or be sold to the New Haven Company or to any person or persons, corporation or corporations, to be held in its interests, directly or indirectly, or so as to re-establish in any manner the combination and control which it is the purpose of the decree to terminate.

There is now pending before the Interstate Commerce Commission an application of the New Haven Company, under Act of Congress approved Aug. 24th, 1912, known as the Panama Canal Act, for authority to retain stocks and other securities and continue control of its steamship lines including the New England Steamship Company and The Hartford & New York Transportation Company. Similar applications are required by law from all railroad companies having an ownership in steamship lines.

The contract between the New York Central & Hudson River Railroad Company and the New Haven Company for sharing in the financial results of the operation of the Boston & Albany Railroad, has already been canceled, and the Company has disposed of its interest in the Merchants & Miners Transportation Company.

In view of the present conditions and the policy of the Federal Government and its various departments, the directors felt that it was wise to agree with the Department of Justice and to divest itself of ownership in these various properties, and therefore, made every reasonable concession toward a peaceful adjustment.

A summary of the properties covered by the decree, and the book value thereof, including stocks, bonds, notes and advances, as shown on the books of the New Haven Company and the Navigation Company is as follows:

Electric and Gas Companies: The New York, New Haven & Hartford R.R. Co., acting with the Connecticut Company, and the Housatonic Power Company, has, in the form of a sub-lease, practically divested itself of the large electric and gas companies acquired some years ago when the property of the Connecticut Ry. and Lighting Company was leased. The new lease is made to the United Electric Light & Water Company, a new Connecticut corporation. This sub-lease is dated Oct. 1, 1911, runs 994 years, and covers the systems for the distribution of electrical energy, for other than railway purposes, in the towns of Waterbury, Naugatuck, Watertown, Cheshire, New Britain, Newington, Berlin, Plainville, Southington, Norwalk, Wilton, New Canaan and Greenwich; the gas plants and distributing systems in the towns of Norwalk, Greenwich and Naugatuck; and the right to furnish gas and electricity in the town of Weston. The lease made to the United Electric Light and Water Co. calls for the payment by the lessee of $365,000 a year in monthly *pro rata* amounts.

Location: The directly operated lines of the New York, New Haven & Hartford R.R. extend from New York City to Providence and Boston, radiating throughout the States of Connecticut, Rhode Island and Massachusetts, and entering all important cities and towns. The total main track operated June 30, 1916, was 2,004.84 miles, of which 1,193.52 was directly owned, 760.21 operated under leases, and 51.11 miles under trackage rights. Population of Mass., Rhode Island and Connecticut in 1890, 3,330,707; in 1900, 4,142,322; in 1910, 5,023,782.

Total revenue tonnage: 24,996,838 in 1914; 23,842,023 in 1915; 28,285,411 in 1916. Traffic is well diversified and high-grade tonnage predominates. Traffic is mainly local and passenger business represents more than one-half the business done. No classification available prior to 1914.

Yard tracks and sidings, June 30, 1916, 1,485 miles. The equipment figures shown above include all owned by the main company and its directly operated leased lines.

Comment: For the year ended June 30, 1916 both the passenger and freight density underwent substantial improvement in the New Haven System. The freight train load was maintained at recent high totals and train mile earnings were advanced to a substantially better figure than heretofore. The tonnage of this road is very widely diversified and the proportion of high-grade freight represents more than 50% of the total business done.

Note: Above table is based on the average mileage directly operated for each year, including that of leased lines, trackage rights, etc. Margin of safety is the proportion of surplus left over after payment of all fixed charges. For example, in 1916 the "balance for charges" (per mile) was $14,384; fixed charges consumed $12,232 of this, or 85%, leaving $2,152, a "margin of safety" of 15%.

Note: Fixed charges include interest on bonded and other debt, rentals of leased lines, miscellaneous rents, etc. Fixed charges in 1916 included interest on bonds and other debt, $11,307,901; rentals of leased lines, $6,156,401; equipment rentals, $2,700,888; joint facility rents, $2,938,564; loss on Boston R.R. Holding Co. guarantee, $117,595; N. Y., Westchester & Boston bond int., $864,000.

Profit and Loss Account, year ended June 30, 1916: Credit balance on June 30, 1915, $3.733,034; credit balance transferred from income account, $4,315,757; profit on road and equipment sold, $113,558; unrefundable overcharges, $26,404; donations, $35,789; miscellaneous credits, $446,778; total, $8,671,320. Contra: Debt discount extinguished through surplus, $4,400; loss on retired road and equipment, $112.050; delayed income debits, $23,502; miscellaneous debits, $100,879; credit balance carried to balance sheet, $8,430,489; total, $8,671,320.

Comment: Both gross and net revenues increased substantially on the New Haven road for the year ended June 30, 1916. As outside income was also better than in 1915 the net income reached a figure almost equal to that of 1913. The fixed charges, however, tended to advance sharply and therefore the balance left over amounted to less than 3% on the outstanding capital stock. Since the close of the fiscal year the volume of business has been maintained at recent high levels.

Note: In the above tabulation the figures showing "capital stock outstanding" include the premium realized on capital stock sold since July 1, 1909. The net amount of stock outstanding June 30, 1916 (par value), was $157,117,900. Prior to 1915, stock in treasury was included. See Note under stock table. The funded debt, as shown above, in 1914 does not include $4,251,958 of loans and bills payable, but this latter is included in the bond column of the ten-year comparative table above. It does include, however, all note issues, debentures, etc.

Funded debt for 1915 includes, $27,227,000 short-term notes, carried as "loans and bills payable." Bond column in Table C includes "loans and bills payable," consisting of $27,227,000 short-term notes included in balance sheet, and $2,912,000 6-month notes; total, $30,139,000. Securities owned consist of unencumbered securities of the book value of $184,004,457. Variation in relative amount of "property investment" and "working assets," in 1915, as compared with former years, is apparently due to inclusion in "property investment" in 1915 of securities formerly carried as "loans and bills receivable" in "working assets." Exact amount of such securities not ascertainable. Funded debt in 1916 includes $25,007,000 short-term notes carried as "loans and bills payable." Bond column in Table C includes same amount; $18,272 grants in aid of construction also included in funded debt.

Comment: There were no radical capitalization changes on the New Haven property during the year ended June 30, 1916. As measured on the mileage basis the property is very heavily capitalized and as the bonded debt and rental charges represent a large proportion of this capitalization the company has not been able in recent years to show any improvement in the net income on net capital. During the year 1916, however, substantial progress was made in this respect.

What will be the ultimate outcome of the New Haven situation cannot be accurately forecast at present. The company still has ahead of it some far-reaching financial problems to solve, and sooner or later must largely increase its permanent capital obligations. The prospects of the capital stock being restored to a dividend basis are not favorable. The company must pay for the financial mistakes and erroneous financial policy of the past for many years to come.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

Yard track and sidings on June 30, 1916, 149.04 miles. * Operated.

Comment: The Central New England Railway has shown very substantial growth in its volume of business during the past few years, the freight density now being nearly three times as great as ten years ago. The freight train load is also far higher than formerly, and notwithstanding declining freight rates, train mile earnings now range at much higher levels.

This company's lines form an important connection for the New York, New Haven & Hartford system, as they cross the Poughkeepsie Bridge into New York State and make connection at Campbell Hall with the main line of the New York, Ontario & Western system. In this way, the New Haven has a direct connection with the Scranton, Pa., coal fields.

Note: The above exhibit is based on the average mileage directly operated. "Margin of safety" is the proportion of surplus left over after deducting fixed charges. For example, in 1916 the "balance for charges" (per mile) amounted to $7,438; fixed charges consumed $4,219 per mile, or 57% of this, leaving $3,219, a "margin of safety" of 43%.

Public Utilities

If you are interested in any way in the securities of Gas, Electric Light, Electric Traction, Telephone and Telegraph or Power Companies, the "Public Utilities and Industrials" Edition of "MOODY'S ANALYSES OF INVESTMENTS" will prove indispensable. This whole field is covered in the same comprehensive and accurate way that Steam Railroads are covered in the Railroad Edition. In fact, the two volumes constitute a complete Service for the Banker and Investor. Separately, the editions sell at $15 each; in combination, they are supplied at $25, when ordered in advance.

Contra: Loss on retired road and equipment, $11,696; miscellaneous debits, $4,303; credit balance carried to balance sheet, $1,363,947; total, $1,379,946.

Comment: The volume of business has shown steady improvement on the Central New England Railway during recent years. Both gross and net revenues are ranking far higher than was the case a few years ago, while fixed charges have increased more slowly. It will be noted that in 1916 the final surplus reported was equal to more than 26% on the preferred stock and nearly 16% on the common stock. The company is now paying, without any difficulty, 2% on the common stock besides the regular 6% on the preferred.

OLD COLONY RAILROAD

Origin: Incorporated under Massachusetts laws, April 24, 1844. Leased to the New York, New Haven & Hartford R.R. Co. for 99 years from March 1, 1893, the rental being 7% per annum on the capital stock, and assumption of all liabilities. The lessee assumes all liabilities of the company, and the agreement also provided for an exchange of stock on the basis of 9 shares of New Haven stock for 10 shares of Old Colony, up to June 30, 1906. In November, 1905, the company sold its holdings in the capital stock of the Old Colony Steamboat Co. to the New England Navigation Co. for a bond of that company for the sum of $3,600,000 which has been deposited in place of the shares under the lease of the N. Y., N. H. & H. R.R. Co. The latter agrees that this company shall have the option at the expiration of the lease to receive the amount of the bond in cash or in property, suitable for running a steamboat line, at an appraised valuation, and meanwhile the Fall River Line shall not be discontinued without the consent of this company.

Location: The lines of the Old Colony Railroad extend from Newport, R. I. to Boston, Mass., and radiate throughout the southeastern part of the State of Massachusetts and in Rhode Island. Total lines owned, June 30, 1916, 763.72 miles; sidings, 280.53.

NEW YORK, ONTARIO & WESTERN RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated Jan. 21, 1880, under New York laws as successor to the New York & Oswego Midland R.R. In addition to its directly owned property, the company controls by lease the Ellenville & Kingston R.R., the Ontario, Carbondale & Scranton, the Pecksport Connecting Ry., the Port Jervis, Monticello & Summitville, the Romo & Clinton, the Utica, Clinton & Binghamton, and the Wharton Valley Ry.

Location: The directly operated mileage of the New York, Ontario & Western Ry. for the year ended June 30, 1916, consisted of 568.46 miles, as follows: Main lines and branches owned, consisting of line from Cornwall to Oswego, with branches to Ellenville, Delhi and New Berlin, 318.86 miles; leased lines, 193.73 miles; trackage rights from Weehawken, N. J., to Cornwall, N. Y. (53.07 miles), and in Scranton, 0.45 mile; other, 2.35 miles. This includes the mileage of the Rome & Clinton R.R. and the Utica, Clinton & Binghamton R.R., which are subleased from the Delaware & Hudson Company. Population of New York State in 1890, 5,997,853; in 1910, 7,268,894; in 1910, 9,113,614.

Control: In October, 1904, the New York, New Haven & Hartford R.R. acquired a majority of the capital stock, which it still owns. In 1911 an arrangement was made to dispose of this control to the New York Central & Hudson River R.R., but this plan was not carried through, and the control of the property therefore still remains in the hands of the New York, New Haven & Hartford R.R.

Management: OFFICERS: Howard Elliott, Chairman; John B. Kerr, Pres.; Richard D. Rickard, Sec. and Treas. DIRECTORS: John B. Kerr, L. M. Gillet, J. H. Harding, F. L. Lovelace, F. T. Maxwell, H. K. Total revenue tonnage in 1915 was 5,911,196 tons; in 1916, 5,644,550 tons. The company has not furnished any tonnage statistics in its reports, and the above are those reported to the Interstate Commerce Commission.

Yard tracks and sidings, June 30, 1916, 279 miles. In the above equipment classification, prior to 1908, certain cars now included under passenger equipment were then classed as freight equipment. This explains the apparent sharp rise in the number of passenger cars in 1909.

Comment: For the year ended June 30, 1916, there was no improvement in passenger and freight density on this property but the company succeeded in raising its average freight train load to a much better figure than during the previous year. The train mile earnings also averaged slightly higher than in 1915. As usual the bulk of the company's business was represented by mining products.

Profit and Loss Account, year ended June 30, 1916: Credit balance at beginning of year, $6,005,621; credit balance transferred from income, $402,598; unrefundable overcharges, $1,301; miscellaneous credits, $18,524; total, $6,428,044. Contra: Loss on retired road and equipment, $59,392; miscellaneous debits, $1,008; credit balance carried to balance sheet, $6,369,644; total, $6,428,044.

Comment: There was practically no change in the gross revenues of the New York, Ontario & Western for the year ended June 30, 1916, but the net receipts underwent a substantial advance. As fixed charges were reduced slightly, the balance carried forward was well in excess of the figures of the previous year, and equal to 1.69% on the outstanding stock.

Note: The securities owned on June 30, 1916, amounted to $8,551,015, and included chiefly bonds and stocks of directly operated subsidiaries.

Comment: There were no improvements in capitalization charges on the New York, Ontario & Western property in 1916. As measured on a mileage basis the net capitalization is very high and in recent years the company has not been able to show much improvement in its net income. In 1916, however, the earnings justified the payment of a small dividend.

NORFOLK SOUTHERN RAILROAD COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past nine years.
For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated under Virginia laws, April 28, 1910, as successor through reorganization of the Norfolk & Southern Ry. Co. The company leases the Atlantic & North Carolina R.R. until 1996, rental being guaranty of int. and taxes, and a further surplus varying from $53,916 per annum up to $107,832 per annum. In November, 1911, the Aberdeen & Ashboro R.R., the Durham & Charlotte R.R. and the Raleigh & Southport R.R. were acquired, and in February, 1912, these companies, with the Sanford & Troy R.R., were consolidated under the name of the Raleigh, Charlotte & Southern R.R.; in the fall of 1912, the latter company was merged into the Norfolk Southern R.R. Owns entire stock and $4,788,000 first mortgage bond of John L. Roper Lumber Co. (For latter company, see "Moody's Analyses of Public Utilities and Industrials.")

Location: Lines operated on June 30, 1916, consisted of 907.71 miles, of which 44.82 miles, from Norfolk to Virginia Beach, were operated by electricity. The other lines extend southward, radiating throughout the State of North Carolina. The total steam mileage, 862.89 miles, is divided into three divisions, *viz:* Northern division, 308.20 miles; Central division, 258.04 miles; Western division, 296.64 miles. Of this mileage, 794.03 miles are owned, 108.33 miles are leased, and 5.34 miles consist of trackage rights.

Yard tracks and sidings, 186.77 miles. Mileage operated in 1916 includes electric lines, not shown in previous years.

Comment: During the year ended June 30, 1916, the Norfolk Southern Railroad recovered very sharply in its volume of business, both passenger and freight. The freight density reached the highest figures ever recorded and the company reported also a better train load than in 1913. The average freight rates, however, tended to decline rather sharply, and therefore the train mile earnings were not up to the level of recent years. However, the character of the company's tonnage changed considerably, low grade freight representing a much larger proportion of the total business than ever before.

Note: Foregoing account covers steam lines only prior to 1916. Net income from operation of electric division is included in "Other income," for years prior to 1916. For 1912 the net corporate income of the electric lines was $12,849. Hire of equipment: credits in 1914, included in "Other income" amounted to $332,182. Fixed charges in 1915 included $869,041 for interest on debt; $77,956 for lease rentals, and $260,750 for hire of equipment debit.

Profit and Loss Account, year ended June 30, 1916: Credit balance, June 30, 1915, $873,632; credit balance transferred from income account, $391,010; profit on road and equipment sold, $1,335; donations, $4,712; miscellaneous credits, $153,000; total, $1,423,689. Contra: Loss on retired road and equipment, $8,114; miscellaneous debits, $96,853; balance carried to balance sheet, June 30, 1916, $1,318,722; total, $1,423,689.

Comment: Both gross and net operating revenues underwent a substantial improvement on this property in the year ended June 30, 1916. Outside income fell off, however, but the total income available for 1916 was nevertheless well above the results of the past two years. The net fixed charges were much lower than in 1915, and the company therefore succeeded in reporting a surplus which was equal to 2.4% on the outstanding stock. Conditions since the close of the fiscal year have continued to be very favorable.

Yard tracks and sidings, June 30, 1916, 1,313.36 miles.

Comment: A very great growth occurred in the volume of freight business done by the Norfolk & Western Railway during the year ended June 30, 1916. The freight density reached figures far higher than those of any previous year, being more than double the density of ten years ago. Average freight train load was also further increased and now ranges at a very high total. It will be noted that the train mile earnings improved to a marked degree. As usual the company's freight business was mainly that of transportation of soft coal, this representing over 68% of the total freight business done.

Profit and Loss Account, year ended June 30, 1916: Credit balance at beginning of year, $14,384,134; credit balance transferred from income account, $19,704,387; adjustment of ledger value of equipment, $106,353; repayment of Pocohontas Coal & Coke Co. advances for bond interest, $40,000; miscellaneous credits, $185,447; total, $34,420,321. Contra: Dividend appropriations of surplus, $8,312,964; surplus appropriated for investment in physical property, $9,053,279; loss on retired road and equipment, $29,819; miscellaneous debits, $33,507; credit balance carried to balance sheet, $16,990,752; total, $34,420,321. Comment: Both gross and net revenues underwent a remarkable improvement on the Norfolk & Western property during the year ended June 30, 1916. The total income available for charges was more than $10,000,000 higher than that reported in 1915, and after the payment of the reduced fixed charges, the surplus finally carried forward was equal to nearly 90% on the outstanding preferred stock and nearly 17% on the outstanding common stock. The increase in dividends of this company for the year was therefore fully justified.

Controlled Properties: The Norfolk & Western Ry. Co. owns a controlling interest in the capital stock of the Guyandot & Tug River R.R. Co. and the entire capital stocks of the Pocahontas Coal & Coke Co. and the Virginia Company (except qualifying shares owned by directors). The Pocahontas Coal & Coke Co. is the owner of an extensive area of coal and other lands in West Virginia, and of mineral rights, leases, royalties, and other property. This property has been made the basis of a joint and several mortgage executed by the Pocahontas Coal & Coke Co. and the Norfolk & Western Ry. Co. in favor of the Girard Trust Co., Philadelphia, Pa., as trustee, to secure an issue of purchase money first mortgage bonds to the amount of $20,000,000, of which $17,407,000 were outstanding June 30, 1916. See Bond Table below. (For statement of the Pocahontas Coal & Coke Co., see "Moody's Analyses of Public Utilities and Industrials.")

Comment: The chief capitalization changes in the Norfolk & Western exhibit for the fiscal year 1916 was a substantial reduction in the outside funded debt, and a further increase in the outstanding stock. This change was brought about chiefly through the conversion of bonds into common stock.

It will be noted in view of this heavy volume of business, that this property is not very heavily capitalized. The net income on net capital has tended to increase steadily during the past few years, and for 1916 was practically double that reported in 1908.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

NORTHERN PACIFIC RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated under Wisconsin laws in July, 1896, as successor to the original Northern Pacific Railroad Co., which was incorporated by special Act of Congress July 2, 1864. On July 1, 1900, the St. Paul & Duluth Railroad was absorbed, and its bond issues assumed. In 1903, the Bellingham Bay & Eastern R.R. and the Washington Railway & Navigation Co. were absorbed, and in 1904 the Seattle & San Francisco Ry. & Navigation Co. and the Monte Cristo Ry. were acquired. On July 1, 1907, the Washington & Columbia River R.R. was purchased.

Location: The total mileage operated by the Northern Pacific Railway Company on June 30, 1916, was 6,504.84 miles, classified as follows: Main line, Ashland, Wis., to Portland, Oregon, with lines to St. Paul, Duluth, etc., and branches, 2,882.36 miles; branches owned, 3,622.48 miles. In addition, the company owns 401.36 miles which are operated by "other companies." Of these, 354.65 miles are located in the Province of Manitoba, and have been leased to the Manitoba Government for 999 years from May 31, 1901, at an annual rental of $210,000 for the first ten years, $225,000 for the second ten years, $275,000 for the third ten years, and $300,000 per annum thereafter, the lessee having the right to purchase the lines at any time for $7,000,000. These lines are now subleased by the Manitoba Government to the Canadian Northern Ry. Co. Other controlled lines separately operated are the Minnesota & International Ry., 167.42 miles. The Spokane, Portland & Seattle Ry., 40.57 miles, is jointly controlled by the Northern Pacific and the Great Northern. Lines extend westward from St. Paul and Duluth to Portland, Seattle, etc., crossing States of Minnesota, North Dakota, Montana, Idaho and Washington. Population of these States in 1890, 2,050,379; in 1900, 2,993,764; in 1910, 4,496,400.

Control of Chicago, Burlington & Quincy System: Jointly with the Great Northern Railway Co., the Northern Pacific Railway owns $107,611,000 capital stock out of $110,839,100 of the Chicago, Burlington & Quincy Railroad, which is deposited as collateral under the 4% joint bonds of these companies.

Northwestern Improvement Co.: In 1897 this company was organized for the purpose of acquiring certain properties of the Northern Pacific Ry., and took over the lands of the St. Paul & Duluth R.R. The Northwestern Improvement Co. has outstanding $6,775,000 capital stock, and $2,960,000 bonds, all of which are owned by the Northern Pacific Railway.

Land Department: In its land department the company reported on June 30, 1916, 6,586,898 acres still undisposed of. The net acreage of land sold during the year was 1,492,267 acres, and the amount realized was $6,432,498.

Yard tracks and sidings June 30, 1916, 2,578 miles. There are no equipment trusts.

Comment: For the year ended June 30, 1916, the Northern Pacific Company reported the heaviest freight density in its history, and also moved its average freight train load up to a new high figure. As usual the freight tonnage of this property was very well diversified, the company not depending primarily on one type of business for its tonnage. Considering the diversity of the tonnage, the freight rates received appear to be fair and profitable. Train mile earnings last year were very much better than at any previous time during the decade.

Comment: Both gross and net revenues underwent a notable advance on the Northern Pacific property during the year ended June 30, 1916. Although income from outside sources was lower than in 1915, yet the balance carried forward was far in excess of any previous year, and the surplus for payment of the full fixed charges exceeded 10% on the outstanding capital stock. Since the close of the fiscal year the earnings have been maintained at recent high levels.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

Of the bonds issuable under the mortgage, $421,292,500 are reserved for refunding purposes. The total authorized issue is limited, so that the

amount thereof, at any one time outstanding, together with all outstanding prior debt of the company as defined in the mortgage, after deducting therefrom the amount of all bonds reserved under the provisions of the mortgage, to retire debt at or before maturity, shall never exceed three times the company's outstanding capital stock; but if, at any time, the amount of bonds outstanding, when added to the aggregate amount then reserved to refund prior debt, shall be $500,000,000, no additional bonds shall thereafter be issued, in respect of work or property, in any amount exceeding 80% of the cost thereof, certified to the Corporate Trustee pursuant to provisions of the mortgage regulating the issue of bonds for future acquisitions by the company. Of the bonds in excess of the $421,492,500 reserved for refunding, $20,000,000 were issued immediately. The remainder of the bonds are issuable only to pay for work or property adding to or bettering the mortgaged estate, and coming under the lien of the mortgage. Follows Nos. 1 to 10, and provide for retirement of all. Legal for S. B. in Cal., Conn., Me., Mass., Mich., Minn., N. H., N. J., N. Y., R. I., Vt., Wis. Listed on New York Stock Exchange. Normal income tax deducted from interest.

Comment: The business of this company is more largely passenger than freight, and in recent years the passenger density has been maintained at relatively high figures. In 1916, however, a notable improvement was shown in the freight density, and the average freight train load was moved up to a new high figure. The business is evidently profitable, as shown by the relatively high passenger rates and the substantial train mile earnings. The freight traffic, although light, is well diversified.

Comment: There was a moderate increase in the funded debt of the Northwestern Pacific Railroad during the year ended June 30, 1916. As measured on the mileage basis, this property is very heavily capitalized and as the earning power is rather light the company has in some years shown a very small net income on net capital.

THE PENNSYLVANIA RAILROAD COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated April 3, 1846, under Pennsylvania laws. The original line extended from Harrisburg to Pittsburgh, and was opened for traffic Feb. 15, 1854. The distance was 249.29 miles. In the meantime a division from Harrisburg eastward to Hollidaysburg was under construction. This latter connected with the Portage Railroad, then owned by the State of Pennsylvania, and known by the name of the Philadelphia & Columbia R.R. The latter was purchased by the Pennsylvania R.R. Co., in 1857, and in the meanwhile the Harrisburg, Portsmouth, Mt. Joy & Lancaster R.R. was leased. With these acquisitions the company had a complete system extending from Philadelphia to Pittsburgh.

Additional lines were acquired from time to time as part of the directly operated system, which on Dec. 31, 1915, aggregated 4,541.04 miles, and was made up as follows:

(1) Eastern Pennsylvania Division—Lines owned, 1,200.95 miles; lines operated under contract, 82.93 miles; used under traffic rights, 55.67 miles; total, 1,339.55 miles.

(2) Western Pennsylvania Division—Lines owned, 733.91 miles; used under traffic rights, 7.78 miles; total, 741.69 miles.

(3) New Jersey Division—Lines owned, 5.34 miles; lines operated under contract, 459.16 miles; used under traffic rights, 76.58 miles; total, 541.08 miles.

(4) Central Division—Lines owned, 603.12 miles; lines operated under contract, 458.59 miles; used under traffic rights, 50.91 miles; total, 1,112.62 miles.

(5) Northern Division—Lines owned, 225.34 miles; lines operated under contract, 550.81 miles; used under traffic rights, 29.95 miles; total, 806.10 miles.

In addition to above, the Pennsylvania R.R. operates, as part of its New Jersey Division, the Delaware & Raritan Canal, 66 miles, and the Hudson River ferries. It also owns 13.39 miles of lines in Pennsylvania, which are operated by other companies in the general system.

Location: The directly operated lines of the company extend throughout the States of Pennsylvania and New Jersey, including the main line from New York City *via* Philadelphia to Pittsburgh. Population of these States in 1890, 6,702,947; in 1900, 8,185,784; in 1910, 10,222,278.

Controlled Companies: Including its directly operated lines as above, the Pennsylvania Railroad Company controls the following properties: (Those which are separately operated from the main system, are all independently described and analyzed on the following pages.)

Interest in Other Companies: Prior to 1913, the Pennsylvania R.R. owned a large amount of both common and preferred stock of the Baltimore & Ohio R.R., but in 1913 the entire holdings were exchanged, by an agreement with the Union Pacific R.R., for a substantial interest in the stock of the Southern Pacific Company. For full details of this exchange, see Southern Pacific and Union Pacific analyses in this volume. The Pennsylvania R.R. at the opening of 1916, held $38,573,400 common and $6,320,000 preferred stock of the Norfolk & Western R.R., while the Northern Central Ry. and the Pennsylvania Company held additional amounts. See list of all investment holdings on pages 544 to 546.

Yard tracks and sidings, June 30, 1915, 4,386 miles; June 30, 1916, 4,434 miles.

Comment During the year ended June 30, 1916, the Pennsylvania Railroad Company reported a decided increase in its freight density, bringing the average figures even above the high exhibit of 1913. The company also reported an increase in its passenger density and its average freight train load moved up to a new high figure. The train mile earnings were the best ever reported by the company. As usual the company depended primarily on the transportation of low grade freight for its volume of business.

Note: Above table is based on the average mileage directly operated, including owned, leased and otherwise controlled or used mileage. The figures for 1913, 1914, 1915 and 1916 are those submitted to the Interstate Commerce Commission. The company's own fiscal year ends Dec. 31. Margin of safety is the proportion of surplus left over after deducting fixed charges. For example, in the year to June 30, 1916, the "balance for charges" (per mile) was $17,823; fixed charges consumed 34% of this, or $6,056, leaving $11,767, a "margin of safety" of 66%.

* Outside operations included in above figures for gross, etc.

Note: Fixed charges include interest, lease rentals, sinking funds, joint rents, etc. The figures of 1913, 1914, 1915 and 1916 are not those of the fiscal year, as submitted to the stockholders; latter ends Dec. 31st, see below.

Income Account, year ended December 31, 1916. Gross revenues, $230,278,533; operating expenses including taxes, $175,186,981; operating income, $55,056,011; other income, $23,164,885; total net income, $78,220,896.

Profit and Loss Account, year ending June 30, 1916: Credit balance at beginning of year, $27,097,657; credit balance from income account, $3,996,260; unrefundable overcharges, $9,193; miscellaneous credits, $608,125; adjustment of appropriated surplus, $2,313,853; total, $34,025,088. Contra: Debt discount, $2,926,932; loss on retired road and equipment, $410,927; miscellaneous debits, $1,145,399; credit balance at close of year, $29,541,830; total, $34,025,088.

Comment: The gross revenues on the Pennsylvania Railroad for the year ended June 30, 1916, rose far above any figures ever before reported. The net earnings also reached a new high total, being over 40% in excess of those during the previous year. As outside income underwent a further advance, the balance carried forward available for charges equaled over $81,000,000 as compared with less than $56,000,000 for the year ended June 30, 1915. While fixed charges increased substantially, yet the surplus carried forward available for dividends equaled nearly 11% on the stock as compared with about 6 2-3% during the previous year. Since June 30, the business on the lines of this company has continued to show unusual improvement.

Note: In the years 1909, 1910 and 1911 the stock of the Pennsylvania Railroad was further increased, but the bonded debt, through retirement of bonds and notes, was materially reduced. The rental payments have been lower in recent years. In above table, capital stock column does not include "premiums."

Note: In above balance sheet, "capital stock" includes "premium on stock," amounting to about $7,000,000. The "property investment" item includes securities of affiliated companies unpledged, also pledged securities. See details below of investments owned. The radical change in the "property investment" and "working assets" accounts in 1915 is chiefly due to changes in form of statement.

Comment: During the fiscal year ended June 30, 1916, there were only moderate changes in the capitalization figures of the Pennsylvania Railroad. The property appears to be heavily capitalized as measured on the mileage basis, but the earning power is so large that this capitalization is carried with great ease. During the year the company added very substantially to its surplus accounts which now range at the highest figures in its history.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

UNITED NEW JERSEY RAILROAD AND CANAL COMPANY

Origin: The Camden & Amboy R.R. Co. and Delaware & Raritan Canal Co. were both chartered on the 4th of Feb. 1830, and in Feb., 1831, the capital stocks of these two companies were consolidated. Their affairs were managed jointly by the directors of both companies and they were to share equally in profits. In 1863, the joint companies acquired a controlling interest in the stock of the Philadelphia & Trenton R.R. Co., and arranged with that company for an equal division of their joint profits. In Jan., 1867, a through New York-Philadelphia route was formed by an agreement with the United Cos. and the New Jersey R.R. and Transportation Company, which owned the line between New Brunswick and Jersey City, and under this agreement the profits were divided between the four companies. On June 30, 1871, the entire property was leased to the Pennsylvania R.R. Co., for 999 years, at an annual rental equal to 10% on the aggregate capital stock.

Location: Line of road, Jersey City, N. J., to Penn. State Line, at Trenton, N. J., 56.72 miles; South Amboy to Camden, N. While net operating results of the road do not show any surplus for the full charges, the policy of the Penn. R.R. has no doubt been to expend heavy sums in the maintenance and improvement of the property, as is shown by the very heavy operating ratio. The bonds are entitled to a fair rating in view of the true earning capacity of the road.

Yard tracks and sidings, 257 miles. Fiscal year ends Dec. 31.

Comment: During the year to June 30, 1916, the passenger density of the Long Island Railroad reached a new high figure, and there was also some improvement in the freight density. It will be noted that the bulk of this company's business is passenger business, the volume of freight always being light. Passenger rates are relatively low, while freight rates are high, but in recent years there has been a tendency toward substantial improvement in the train mile earnings.

Securities Owned: The company owned Dec. 31, 1915, $3,316,800 in par value of stocks and $6,437,951 in par value of bonds; total securities owned, $9,754,751.

Note: The "working liabilities" item in the above balance sheet includes loans and bills payable. For many years the Pennsylvania R.R. has been making advances to this company for improvements, etc., and the $12,248,000 debenture 4s of 1909 were issued to the Penn. R.R. to liquidate a part of these advances. Increase in funded debt in 1916 due to further issue of debenture 4s to liquidate indebtedness to Penn. R.R. These debentures were taken by the latter company at par.

Comment: The chief change in the financial statement of the Long Island property during the year to June 30, 1916, was a large increase in the funded debt, which was due to the issue of debenture bonds to the Pennsylvania Railroad for the purpose of liquidating the company's indebtedness to the latter. As measured on the mileage basis the capitalization is very high indeed, and in recent years the net income on net capital has not shown much improvement. In 1916 this net income equaled 6%, which is just under the average for the decade.

Capital Readjustment: In January, 1917, the Pennsylvania Railroad submitted the following plan of readjustment to the minority stockholders of the company:

(1) The Long Island R.R. to issue 5% debenture bonds for $5,202,100 (this being equal to amount of stock held by other owners than Pennsylvania R.R.).

(2) To issue common stock for the balance of its debt approximating $25,000,000. The Pennsylvania R.R. Co. agrees to accept the debentures and common stock at par for that amount of the debt due to it by the Long Island Rilroad Company.

(3) The Pennsylvania R.R. Co. is to exchange the debentures, par for par, for the common stock of the company held by other owners than itself. These debentures are to run for 20 years, and are to be secured by any future mortgage placed upon the property. They are redeemable after five years, at the option of the company, at 102½.

The success of the plan depends upon its acceptance by the minority stockholders, because the Pennsylvania R.R. Co. has not obligated itself to carry any part of it into effect unless the owners of a satisfactory amount of the stock of the Long Island R.R. Co., held by others than itself, consent to its terms, and agree to exchange their stock for debenture bonds.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

* Company operates steamboats, tugs, and barges on 36 miles of water route. † Exclues 36 miles of water route.

‡ Averages not comparable with those of other roads on account of inclusion of results of operation of water lines. Yard tracks and sidings on June 30, 1916, 83.95 miles.

Comment: During the year ended June 30, 1916, the New York, Philadelphia & Norfolk Railroad reported a very heavy increase in its freight density, but the passenger density tended to again decline. The average freight train load, however, was far higher than ever before reported and the train mile earnings also ranged at a new high level. The company's freight business is quite well diversified although the property continues to depend to a large degree on lumber products for its tonnage.

Contra: Loss on retired road and equipment, $7,768; credit balance at close of year, $1,899,598; total, $1,907,366.

Comment: For the year ended June 30, 1916, New York, Philadelphia & Norfolk Railroad reported a very substantial increase in its gross revenues, while its net operating revenues almost doubled. The total net income available for fixed charges was very heavy and as fixed charges increased only slightly the final balance equaled no less than 45 1-3% on the outstanding stock. Since the close of the year the operations of the property have continued to show marked improvement.

Comment: There were only slight changes in the financial statement of this company during the year ended June 30, 1916. It will be noted that the property is very lightly capitalized in view of its earning power, and that in recent years, there has been no tendency toward increase in this capitalization. The net income on net capital has always ranged high, and in the year just closed reached the high figure of 24.5%.

Yard tracks and sidings, June 30, 1916, 385 miles. Fiscal year ends Dec. 31.

Comment: For the year ended June 30, 1916, as reported to Interstate Commerce Commission, the Philadelphia, Baltimore & Washington reported substantial improvement in both passenger and freight density, while the company's average freight train load rose to a far higher figure than ever before. The company also reported better average passenger and freight rates. Its train mile earnings were well in excess of those reported in 1915. As usual the company's tonnage was well diversified, high grade freight representing more than one-third of the total tonnage of the year.

Securities Owned: The par value of stocks owned by the company at the close of 1915 amounted to $12,649,730; and of bonds, $1,920,480; making a total of $14,570,210. The investments include a one-half interest in the capital stock of the Washington Terminal Co., the other half of which is owned by the Baltimore & Ohio R.R., the two companies jointly guaranteeing the entire issue of bonds of the latter.

Comment: There were practically no changes in the capitalization statement of the company during the year to June 30, 1916. The company is really not heavily capitalized in view of its earning power, and during the past decade has each year reported a very substantial income on net capital. In 1916, this percentage reached a new high figure, and was no less than 14.7%.

WEST JERSEY & SEASHORE RAILROAD COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated May 4, 1896, under New Jersey laws as a consolidation of the Camden & Atlantic R.R., the West Jersey R.R., the Alloway & Quinton R.R., the West Jersey & Atlantic R.R., the Chelsea Branch R.R., and the Philadelphia, Marlton & Medford R.R. Control of the Delaware River R.R. was acquired May 1, 1900. The main line between Camden & Atlantic City is operated by electricity. In addition to the rail lines, the company operates two ferries on the Delaware River.

Location: The directly operated lines consisted on Dec. 31, 1915, of 360.39 miles, including 35.85 miles of traffic rights and two miles of ferries. The system extends from Camden to Atlantic City and to Cape May, with branches to Salem, Bridgton, Ocean City, etc. The main business is the passenger traffic between Philadelphia and the various South New Jersey coast resorts. Population of New Jersey in 1890, 1,444,938; in 1900, 1,883,666; in 1910, 2,537,167.

Control: The Pennsylvania R.R. Co. on Dec. 31, 1915, owned $4,904,700 out of $9,641,600 common and $45,350 out of $82,350 special guaranteed stock of the West Jersey & Seashore R.R.

Yard tracks and sidings, Dec. 31, 1915, 120 miles; June 30, 1916, 138 miles. Fiscal year ends Dec. 31.

Comment: The passenger density on the West Jersey & Seashore Railroad during the year ended June 30, 1916, underwent substantial recovery while the freight density was better than ever before recorded. The company depends very largely on passenger business for its prosperity, but in recent years the proportion of freight business has been tending to increase. Freight tonnage is very well diversified, high grade freight representing more than 40% of the total business done.

Note: Funded debt in 1916 includes $1,338,000 loans and bills payable.

Comment: There was a slight decrease in the funded debt of the West Jersey & Seashore Railroad in 1916, but no change in the capital stock. The company is rather lightly capitalized in view of its earning power, and in the past few years has reported an increasing net income on net capital. In 1916, this was in excess of 10%.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

Outstanding, $20,450 West Jersey R.R. special guaranteed; $83,550 West Jersey & Seashore R.R. special guaranteed, and $11,531,000 common stock; par, $50. Nos. 1 and 2 are entitled to 6% per annum, and No. 3 has received 5% per annum regularly from 1909 to date. The Pennsylvania R.R. on Dec. 31, 1915, owned $4,904,700 common and $45,350 special guaranteed. In 1913, it was proposed to lease the property to the Pennsylvania R.R. for 999 years at rental of interest and principal on bonds and 6% dividends on stock; but the New Jersey Public Utility Commissioners declined to approve the lease, and it has not become operative. Authorized amount of common is $13,000,000. Amount outstanding, as above, includes $1,890,000 new stock issued in Aug., 1916, to stockholders at par. The stock is listed on the Philadelphia Stock Exchange.

PENNSYLVANIA COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated April 1, 1870, under Pennsylvania laws, as a holding company, in the interest of the Pennsylvania Railroad for the purpose of controlling and managing the various lines leased and controlled by the latter, which were located west of Pittsburgh and Erie. The company as now constituted has leased and directly operates various of these Western lines, and in addition controls certain other companies which are directly operated.

Location: The directly operated lines of the Pennsylvania Company on Dec. 31, 1915, consisted of 1,948.52 miles classified as follows: Pittsburgh, Fort Wayne & Chicago Ry., 470.53 miles, embracing main line from Pittsburgh to Chicago, and branches; Pittsburgh, Youngstown & Ashtabula, 137.56 miles; Erie & Pittsburgh R.R., 82.97 miles; Cleveland & Pittsburgh R.R., 205.34 miles; Toledo, Columbus & Ohio River R.R., 345.31 miles; Massillon & Cleveland R.R., 12.23 miles; New Castle Branch of Western New York & Penn. R.R., 51.52 miles; Pittsburgh, Ohio Valley & Cincinnati R.R., 15.09 miles; South Chicago & Southern R.R., 23.05 miles; Marginal R.R., 3.44 miles; Youngstown & Ravenna R.R., 2.28 miles; Cleveland, Akron & Cincinnati Ry., 335.21 miles; trackage rights, 263.99 miles. (See terms of control of these companies, etc., under their own headings.) These directly operated lines extend from Pittsburgh to Chicago, Cleveland, Cincinnati, etc., mileage being chiefly in Ohio, Indiana and Illinois. Population of these States in 1890, 9,691,021; in 1900, 11,555,597; in 1910, 13,106,588.

Separately Operated Lines: In addition to the above, the Pennsylvania Company controls the following separately operated properties:

(1) Pittsburgh, Cincinnati, Chicago & St. Louis Ry. (including Ohio Connecting Ry., Pittsburgh, Wheeling & Kentucky R.R., Little Miami R.R., Chicago, Indiana & Eastern Ry., etc.), 1,422.18 miles.

(2) Grand Rapids & Indiana Ry. (including Muskegon, Grand Rapids & Indiana R.R., Traverse City R.R., Cincinnati, Richmond & Fort Wayne R.R.), 567.50 miles.

(3) Vandalia R.R. (including Terre Haute & Peoria R.R., and trackage on Evansville and Terre Haute lines), 800.59 miles.

(4) The following smaller companies, some of which are jointly controlled with other railroads: Waynesburg & Washington R.R., Pittsburgh, Chartiers & Youghiogheny R.R., Toledo, Peoria & Western Ry., Cincinnati, Lebanon & Northern Ry., Central Indiana Ry., Ohio River & Western Ry., Wheeling Terminal Ry., Pennsylvania Terminal Ry., and Manufacturers Ry. of Toledo; in all, 600.03 miles. Is also jointly interested with the New York Central R.R. in the Lake Erie & Pittsburgh Ry., from Lorain to Youngstown and Cleveland, 120 miles.

Note: For details of recent merger of Pittsburgh, Cincinnati, Chicago & St. Louis Ry. and the Vandalia R.R. see those companies.

Control: The Pennsylvania Railroad Co. owns the entire $80,000,000 capital stock of the Pennsylvania Company.

In above table, cars held under equipment trusts are included in 1910 and after.

Comment: The operating results of the Pennsylvania Company lines for the year ended June 30, 1916, as reported to the Interstate Commerce Commission, reflected a remarkable improvement in freight business as compared with 1915. The freight density rose to a figure nearly as high as that of 1913, while the freight train load was far better than ever before. It will be noted also that the company was able to report a better average in both freight and passenger rates, and the train mile earnings were therefore substantially improved. As has been the case in recent years, more than two-thirds of the tonnage transported was represented by products of mines.

Note: Above table is based on average mileage directly operated for each year. In 1912, the directly operated mileage was considerably increased by the inclusion of the Cleveland, Akron & Cincinnati lines.

Margin of safety is the proportion of surplus left over after deducting fixed charges. For example, in 1916 the "balance for charges" amounted to $19,238; fixed charges consumed $11,121, leaving $8,117, a "margin of safety" of 42%.

† Deficit.

Note: Other Income is made up chiefly of income on stocks and bonds owned. Fixed charges include: rentals of leased lines (a heavy item), interest on bonds, joint facility rents, etc. Fiscal year ends Dec. 31st (see below).

Income Account, year ended December 31, 1916: Gross revenues, $75,569,026; operating expenses and taxes, $55,242,607; operating income, $20,320,735; other income, $12,280,928; total net income, $32,601,663.

Profit and Loss Account, year ended June 30, 1916: Credit balance at beginning of year, $6,393,395; credit balance transferred from income, $2,812,636; delayed income credits, $264,700; miscellaneous credits, $19,055,260; total, $28,525,991. Contra: Surplus applied to sinking and other reserve funds, $7,000,000; surplus appropriated for investment in physical property, $7,700,000; loss on retired road and equipment, $690,092; miscellaneous debits, $1,999,165; credit balance carried to balance sheet, $11,136,734; total, $28,525,991.

Comment: For the year ended June 30, 1916, the gross revenues of the Pennsylvania Company lines underwent a very sharp improvement, while the net operating revenues were nearly doubled as compared with 1915. The total net income was far higher than ever before reported by the company, and although fixed charges increased sharply, the balance carried forward was equal to nearly 18% on the outstanding stock. Conditions since June 30th have continued to improve, and currently the company is undoubtedly making a better showing than it did in the earlier months of the calendar year.

Comment: There was a considerable increase in the funded debt of the Pennsylvania Company lines for the year ended June 30, 1916. As measured on the mileage basis, the company is heavily capitalized, but the earning power is also very heavy, and therefore this capitalization was carried without difficulty. Notwithstanding the large increase of last year in the net capitalization, it will be noted that the net income on net capital was higher than in other years of the present decade.

HOW TO ANALYZE RAILROAD REPORTS

By JOHN MOODY

THIS attractive book, which has just been issued, covers in a complete and popular way the entire subject of railroad operation and finance. It is intended primarily for the Investor who holds railroad stocks or bonds, and supplies a long-felt want for every one who is in any way interested in railroad securities.

Every stockholder receives his annual report from the railroad in which he has invested his money, but very few stockholders have the time or the technical knowledge to clearly analyze the meaning of the figures presented. This little book explains the principles whereby every statement and figure in the report can be clearly understood, and the significance properly judged.

HOW TO INVEST MONEY WISELY

By JOHN MOODY

DIVERSIFIED investing is something which no investor, large or small, should ignore. The general plan of this book is based on principles for intelligently diversifying investment capital, a subject which the writer has been carefully studying for many years in connection with his work as an analyst and investigator of investments for bankers, institutions, and individual investors both at home and abroad. These methods for wisely and intelligently investing money on comprehensive and intelligent principles of diversification have within the past few years been adopted by numerous institutions and many thousand individual investors with advantage and profit.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

THE CLEVELAND, AKRON & CINCINNATI RAILWAY COMPANY

Origin: Incorporated June 26, 1911, as a consolidation, effective July 1, 1911, of the Cleveland, Akron & Columbus Ry. and the Cincinnati & Muskingum Valley R.R. (See these companies in earlier editions of the Analyses.) In the consolidation the old stockholders of the Cleveland, Akron & Columbus received 137½% of new stock for 100% of the old, and stockholders of the Cincinnati & Muskingum Valley received 100% in new stock for 100% in old. By agreement with the Pennsylvania Company, the latter began operating the consolidated property from January 1, 1912, on the basis of paying the Cleveland, Akron & Cincinnati the net earnings.

Location: The directly owned lines consist of 335.21 miles, including the line from Trinway to Morrow, Ohio, 148.46 miles (the old Cincinnati & Muskingum Valley); the line from Hudson to Columbus, 143.79 miles, and branches, 42.96 miles. Mileage all in Ohio. Population of Ohio in 1890, 3,672,316; in 1900, 4,157,545; in 1910, 4,767,121. In addition to above, company holds a one-fourth interest in the Akron & Barberton Belt R.R. and a half interest in the Zanesville Terminal Ry. The Pennsylvania Company owns $7,498,487 out of $7,500,000 capital stock of the Cleveland, Akron & Cincinnati Ry., and now directly operates the property. Prior to 1912, the road was independently operated. For statistics for years prior to date, see "Moody's Analyses of Railroads for 1914."

GRAND RAPIDS & INDIANA RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated under laws of Michigan and Indiana in July, 1896, as successor to railroad, which was sold under foreclosure. Besides its own line, the original company operated the Cincinnati, Richmond & Fort Wayne, the Muskegon, Grand Rapids & Indiana, and the Traverse City R.R., and the new company assumed these contracts.

Location: The directly operated lines consist of 575.03 miles, classified as follows: Lines owned, including main line from Fort Wayne, Ind., to Mackinaw City, Mich., and branches, 419.03 miles; Cincinnati, Richmond & Fort Wayne R.R., Richmond to Adams, Ind., 85.77 miles; Muskegon, Grand Rapids & Indiana R.R., Muskegon Junc. to Muskegon, Mich., 36.85 miles; Traverse City R.R., Walton to Traverse City, Mich., 25.86 miles; trackage rights, 7.50 miles. Mileage mainly in Michigan. The Cincinnati, Richmond & Fort Wayne R.R. is operated by the Grand Rapids & Indiana, at a rental equaling net earnings. Of its $2,186,600 stock, Pennsylvania Company owns $1,277,000. Muskegon, Grand Rapids & Indiana is operated without lease, its earnings being applied to interest on its bonds. Traverse City R.R. is leased for net earnings. Population of this State in 1890, 2,093,889; in 1900, 2,420,982; in 1910, 2,810,173.

Control: The Pennsylvania Company owns $2,966,600 out of $5,791,700 stock of the Grand Rapids & Indiana Ry.

Yard tracks and sidings, 266.90 miles. Of the total mileage operated, 419.03 miles is owned, balance being otherwise controlled.

Comment: The operating record of the Grand Rapids & Indiana Railway for the year ended June 30, 1916, as reported to the Interstate Commerce Commission, was a very satisfactory one so far as the freight business of the company was concerned. It will be noted that the freight density rose to the highest figure ever reported, while there was a substantial improvement in the average freight train load. There was practically no change in average freight rates, but the company reported better train mile earnings than in recent years. As usual the freight tonnage of the property was largely diversified, high grade freight representing a large proportion of the total business done.

Comment: There were practically no capitalization changes in this company for the year ended June 30, 1916. The property is lightly capitalized as measured on the mileage basis, and although it has never been a heavy earner, the company has had little difficulty in showing a fairly good net income on net capital. During the year under discussion this net income was equal to 7.3%.

LITTLE MIAMI RAILROAD

Origin: Incorporated under laws of Ohio, March 11, 1836. Main line was opened throughout in 1846. The Dayton, Xenia & Belpre R.R. was purchased at foreclosure in Jan., 1865. The Dayton & Western R.R. was leased Jan. 1, 1865, and the Columbus & Xenia Nov. 30, 1868. The Richmond & Miami Ry. was leased Jan. 1, 1865. The entire system was leased for 99 years from Dec. 1, 1869, to the Pittsburgh, Cincinnati & St. Louis Ry., now the Pittsburgh, Cincinnati, Chicago & St. Louis Ry., rental being interest on bonds, rental of leased lines, 8% dividends on stock and $5,000 for maintenance of organization. The Little Miami R.R., as lessor, receives the entire rental, and is responsible to the other companies for their proportion. The lease was amended May 1, 1889, to provide for the retirement of certain bonds which had matured, and for the acceptance by the lessee of 3½% non-convertible bonds of this company ,in lieu of 7% bonds convertible into stock of the Little Miami R.R. On April 29, 1907, the provisions of the lease were further modified, it being agreed that either bonds or special betterment stock can be issued hereafter in payment of betterments made by lessee, such bonds or betterment stock to bear interest at not exceeding 4% per annum.

PITTSBURGH, CINCINNATI, CHICAGO & ST. LOUIS RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated Oct. 1, 1890, under laws of Penn., West Va., Ohio, and Indiana, as a consolidation of the Chicago, St. Louis & Pittsburgh R.R., the Cincinnati & Richmond R.R., the Jeffersonville, Madison & Indianapolis, and the Pittsburgh, Cincinnati & St. Louis Ry. In 1907, the Chartiers Ry. was absorbed. In addition, the company operates the lines of the Chicago, Indiana & Eastern Ry., which is controlled by the Pennsylvania Company.

Location: The directly operated lines consisted on Dec. 31, 1915, of 1,488.98 miles, of which 1,143.68 miles were directly owned and embraced the main lines from Pittsburgh *via* Columbus to Indianapolis and Chicago, with various branches; also 278.50 miles of lines operated under contract, including the Little Miami R.R. and leased lines from Columbus to Cincinnati and branches; also 66.80 miles of trackage rights. Operated mileage chiefly in Ohio and Indiana. Population of these States in 1890, 5,864,720; in 1900, 6,674,007; in 1910, 7,467,997.

Control: The company is controlled through ownership of a majority of capital stock by the Pennsylvania Company, whose stock is in turn all owned by the Pennsylvania R.R.

Merger: In October, 1916, the stockholders approved the consolidation with the Vandalia R.R., the Pittsburgh, Wheeling & Kentucky R.R., the Chicago, Indiana & Eastern Rys., and the Anderson Belt Ry., under the name of the Pittsburgh, Cincinnati, Chicago & St. Louis R.R. The new company will assume the obligations of the merged companies. The terms of exchange of old stock, etc., for new stock are as follows: P. C. C. & St. L., $110 and $100 of new stock for $100 old pref. and $100 old common; Vandalia R.R., $85 of new stock for $100 of old; Pitts., Wheeling & Ky., $150 of new stock for $50 of old; Anderson Belt Ry., $100 in new stock for $100 of old; Chic., Ind. & East. Ry., one $100 share for entire $1,000,000 old stock, $250,000 in new stock for $500,000 old mortgage bonds. The merger, having been effected, the new company began operation Jan. 1, 1917. The consolidated company has $84,860,200 capital stock all of one class.

Yard tracks and sidings, Dec. 31, 1915, 1,017 miles. The Little Miami R.R. Co., which is leased and operated, owns or leases 77 locomotives, 56 passenger, and 718 freight and company cars. These have been included in above table since 1914.

Comment: The operating exhibit of the Pittsburgh, Cincinnati, Chicago & St. Louis for the year ended June 30, 1916, was very favorable, indeed, and equaled those of the best years of the past decade. Freight density was higher than in any recent year, except 1913, while the train load rose to a far better figure than ever before reported. Train mile earnings were also much better than in any recent year. The company's freight tonnage was widely diversified as has usually been the case, the main item of tonnage being products of mines.

Profit and Loss Account, year ended June 30, 1916: Credit balance, June 30, 1915, $1,767,027; credit balance transferred from income account, $2,917,955; profit on road and equipment sold, $59; miscellaneous credits, $824,808; total, $5,509,849. Contra: Dividend appropriation of surplus, $366; loss on retired road and equipment, $25,975; miscellaneous debits, $223,512; credit balance carried to balance sheet, $5,259,996; total, $5,509,849.

Comment: For the year ended June 30, 1916, the gross and net revenues of this property underwent very sharp improvement as compared with recent years. The total net income was during the year more than double the increased fixed charge requirements, and the final balance carried forward was therefore equal to over 21% on the outstanding preferred stock. Conditions since June 30, 1916 have continued to be most satisfactory.

Comment: There were practically no capitalization changes in the Pittsburgh, Cincinnati, Chicago & St. Louis property during the year ended June 30, 1916. Since the latter date, however, a consolidation has taken place whereby the Vandalia and certain smaller lines have been merged into this system. This will considerably change the capitalization features of the property. As measured on the mileage basis, the net capitalization of the company appears high, but the earning power has always been substantial; even in poor years the net income on net capital has been high. During the year just ended it averaged over 9%.

Note: "Average income available" is the average net income available per mile for interest charges, after deducting taxes for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

Comment: There was no change in the capitalization exhibit of the Vandalia Railroad during the year ended June 30, 1916. Since the latter date the company has been merged into the Pittsburgh, Cincinnati, Chicago & St. Louis, and is at the present time a part of the latter system. The basis of the merger is evidently a fair one in view of the general average earning power of the property.

PITTSBURGH, SHAWMUT & NORTHERN RAILROAD COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past nine years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated Aug. 1, 1899, under laws of New York and Pennsylvania as a consolidation of the Mill Creek Valley R.R., Buffalo, St. Marys & Southwestern R.R., Mount Jewett, Clairmont & Northern R.R., Smethport & Olean R.R., Central New York & Western R.R., Central New York & Northern R.R., and Shawmut Connecting R.R. Company controls the Shawmut Mining Co., the Kersey Mining Co., the Kersey R.R. Co. and the Clarion River Ry. It also leases the Pittsburgh & Shawmut R.R. at a rental equal to the net earnings of the latter, plus ten cents per ton on coal delivered to the Pittsburgh, Shawmut & Northern by the Pittsburgh & Shawmut R.R. In Sept., 1916, this lease was abrogated and the Pittsburgh & Shawmut is now operated by its own officers.

Location: Operated lines consist of 299.71 miles, including main lines and branches owned, 159.97 miles from Wayland Junc., N. Y., to Hyde, Pa., etc.; 24.08 miles proprietary roads leased; 89.97 miles leased lines (including Pittsburgh & Shawmut R.R.; 79.59 miles), and 10.24 miles of trackage rights; leased lines, 15.45; total operated, 299.71; sidings, 120.61 miles.

Receivership: On Aug. 1, 1905, Frank Sullivan Smith was appointed receiver of the property. The Pittsburgh & Shawmut line, which has been under construction from 1908, was leased to the receiver, who operated it in connection with the main company until Sept., 1916, when the lease was abrogated. No plan of reorganization had been announced up to January, 1916.

Management: OFFICERS: Frank Sullivan Smith, Receiver and Acting Pres.; L. F. Wilson, Sec.; Henry S. Hastings, Aud. and Compt. DIRECTORS: F. S. Smith, F. H. Davis, C. W. Gould, Geo. B. Sheppard, F. W. Frost, L. F. Wilson, F. H. Ridgway, Geo. C. Atkins, W. W. Wilson, Edwin E. Tait, N. G. Wells, R. E. Palmer, Chas. Walters. Annual meeting, last Monday in January. MAIN OFFICE, Angelica, N. Y. NEW YORK OFFICE, 60 Wall Street.

Tonnage: Year ended June 30, 1915, total tons carried, 2,722,931, of which 80% were products of mines, 5% of forests, 10% manufactures. Year ended June 30, 1916, total tons carried, 3,783,403, of which 84% were products of mines, 3% products of forests, 10% manufactures.

Comment: This property which has been in the hands of receivers for a great many years, reported very substantial improvement in its freight business during the year ended June 30, 1916. The freight train load was moved up to a new high average, and train mile earnings were better than ever before. As usual the bulk of the company's business was represented by products of mines.

Note: Fixed charges in 1916 included rentals, $570,978; interest on equipment trusts, receivers' certificates, etc., $182,784. No interest has been paid on the first 5s nor refunding 4s since Aug. 1, 1905.

Profit and Loss Account, year ended June 30, 1916: (Company) debit balance at beginning of year, $6,981,361; debit balance transferred from income, $587,684; loss on retired road and equipment, $46,889; total, $7,616,115. Contra: Debit balance carried to balance sheet, $7,616,115; total, $7,616,115.

Receivers' Profit and Loss Account, year ended June 30, 1916: Credit balance at beginning of year, $646,064; credit balance transferred from income, $69,396; miscellaneous credits, $1,694; total, $717,154. Contra: Loss on retired road and equipment, $403; miscellaneous debits, $12,693; credit balance carried to balance sheet, $704,057; total, $717,154.

Comment: Both gross and net revenues reached new high totals on this property during the year ended June 30, 1916, and as there was also a substantial improvement in outside income, the total balance available for charges was well in excess of the enlarged requirements. No movement, however, was made to take this property out of the hands of receivers during the year.

Company's Balance Sheet, as of June 30, 1916: Assets, property investment, $29,162,777; working assets, $292; profit and loss deficit, $7,616,115; total, $36,779,184; liabilities, capital stock, $15,000,000; funded debt, $14,655,600; working liabilities, $6,307,356; accrued liabilities, not due, $244,944; deferred credit items, $571,284; total, $36,779,184.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes for the nine years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

The obligations of the Pittsburgh & Shawmut R.R. are included in the above table for the reason that the property was leased and directly operated by the receiver of the Pittsburgh, Shawmut & Northern Ry. in the interests of the latter company until Sept., 1916, the only income shown by the Pittsburgh & Shawmut for year ended June 30, 1916, and prior years, being the rental received from the lessee. The lease has since been abrogated and the property is now separately operated. The Pittsburgh & Shawmut R.R. is separately described on the following page.

REFERENCE NOTES ON BOND ISSUES

1. In four series as follows: $875,000 6s, dated March 1, 1916; due March 1, 1918. Int. paid Mar. and Sept. 1 at Columbia Trust Co., New York. $525,000 5s, dated June 1, 1914; due June 1, 1917. Callable at 105 and int. on 60 days' notice. Sinking fund of $100,000 per annum began Dec. 1, 1914, to purchase bonds at 105 or less. Coupon and reg., $1,000. First lien on the entire mileage completed, 95.04 miles and on further mileage under construction; also secured by pledge of $58,000 of No. 6 and $11,953,000 of No. 7; by pledge of $3,607,262 capital stock of Allegheny River Mining Co., the latter company owning in fee over 22,000 acres of coal lands on or near the lines of the company. Interest paid without deduction for normal income tax.

4. Auth. and issued, $4,500,000. Dated May 1, 1914; due May 1, 1917. Int. paid at Guaranty Trust Co., New York. Coupon or reg., $1,000; interchangeable. First collateral lien on $3,000,000 first mortgage bonds of Allegheny River Mining Co., $4,000,000 of No. 3 (above); equipment valued at $600,000, and other securities valued at $2,500,000. Issued to provide funds for maturities, for improvements and additional construction. Normal income tax deducted from interest.

5. Equipment 5s, dated Nov. 1, 1912; due $10,000 each May and Nov. 1, to Nov. 1, 1922. Original amount, $200,000; now outstanding, $120,000. Int. paid May and Nov. 1, at Columbia Trust Co., New York. Coupon, $1,000. First lien on 250 coal cars, costing, $250,250. Equipment 5s, dated Nov. 1, 1913; due $23,000 each May and Nov. 1 to Nov. 1, 1923. Int. May and Nov. at Columbia Trust Co., New York. Original amount, $460,000; now outstanding, $322,000. Coupon, $1,000. First lien on 500 50-ton steel hopper bottom coal cars, costing, $578,200. Equipment 5s, dated Nov. 1, 1914; due $30,000 each May and Nov. to Nov. 1, 1924. Original issue, $600,000; now outstanding, $480,000. Cover 750 cars, costing $717,375. Int. on all issues payable without deduction for income tax.

6. Outstanding, $164,000; dated Feb. 1, 1899; due Feb. 1, 1949. Int. defaulted since Aug. 1, 1905. Original amount, $6,000,000, all but above amount having been exchanged in 1902-3 for No. 7 (below). Secured by lien on the owned lines of the company, 159.97 miles, including Wayland Junc. to Hyde, Pa., Prosser to Olean, N. Y., on 12.08 miles from Paine Junc. to Cardiff, Pa., and on the coal lands in Elk and Jefferson counties, Pa., owned by the Kersey Mining Co. Subject, however, to all of the receivers' certificates (No. 1), and, as to interest, subject to No. 2. Underlie No. 7. The Pittsburg & Shawmut R.R. owns $58,000 of the issue pledged under No. 3. Interest payable without deduction for normal income tax.

7. Auth., $15,000,000; outstanding, $14,491,600, of which $11,953,000 are owned by Pittsburgh & Shawmut R.R. and deposited under No. 3. Dated Feb. 1, 1902; due Feb. 1, 1952. Int. defaulted since Aug. 1, 1905. Coupon, $500, $1,000. Follows No. 6 on same property, being subject to Nos. 1 and 5, and, as to interest, to No. 2. Interest payable without deduction for normal income tax.

COMPANY AFFILIATED WITH THE PITTSBURGH, SHAWMUT & NORTHERN RAILROAD COMPANY

THE PITTSBURGH AND SHAWMUT RAILROAD

Origin: Incorporated under laws of Pennsylvania July 21, 1903, as the Brookville & Mahoning Railroad; name changed as above on December 27, 1909. The company owns the entire capital stock and the first mortgage bonds of the Allegheny River Mining Co.; it also owns $58,000 first 5s and $11,953,000 ref. 1st 4s of the Pittsburgh, Shawmut & Northern R.R., having issued $9,608,800 of its own stock to acquire the latter. For the stock of the Allegheny River Mining Co. it gave $216,062 in cash, and $3,291,300 of its own stock. Its advances to the Allegheny River Mining Co. for development aggregate in excess of $2,000,000 to date, for which it is now receiving first mortgage bonds of that company.

Location: Lines in operation, June 30, 1916: Erie Junc., to Cadogan, Pa., 79.59 miles; branches completed, 15.45 miles; total, 95.04 miles; still under construction, Cadogan to Freeport, Pa., 8.43 miles. Sidings, 40.17 miles. Formerly leased to the Pittsburgh, Shawmut & Northern R.R. from Feb. 1, 1908, rental being net earnings and ten cents per ton on all coal delivered by the Pittsburgh & Shawmut R.R. to the Pittsburgh, Shawmut & Northern R.R. and property was directly operated by receiver of lessee until Sept., 1916, when lease was abrogated.

Contracts: Traffic originating from Allegheny River Mining Co. as well as from any additional coal lands acquired, to be secured to the road by two contracts: With the Allegheny River Mining Co., whereby that company agrees to mine and deliver to the railroad a minimum of 1,500,000 gross tons of bituminous coal each year, from Jan. 1, 1912, to and including 1960. The Pittsburgh & Shawmut R.R. Co. receives (in addition to its proportion of the through rate) an arbitrary rate of 10 cents per gross ton on all coal originating on its line and delivered to the Pittsburgh, Shawmut & Northern R.R. The assumption of this contract by order of the Courts, is to be made a condition of the acquisition of the property of the Pittsburgh, Shawmut & Northern R.R. by any successor company.

READING COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated as the Excelsior Enterprise Co., May 24, 1871, under Pennsylvania laws. On Jan. 19, 1872, the name was changed to the National Company. On Dec. 6, 1896, name was again changed to the Reading Company, and the capital stock increased from $100,000 to $40,000,000. The company then acquired practically all the capital stocks of the newly reorganized Philadelphia & Reading Railway Co. and the Philadelphia & Reading Coal & Iron Co., the capital stocks being further increased to $140,000,000. The Philadelphia & Reading Railway Co., thus acquired, was itself incorporated under Pennsylvania laws Nov. 17, 1896. The Reading Company also acquired control of the Reading Iron Company, and later, the Central Railroad of New Jersey.

Location: The directly operated lines of the Philadelphia & Reading Railway Co. consisted, June 30, 1916, of 1,127.27 miles, as follows: Main lines and branches owned, 387.19 miles. These include, besides the main stems, the Lebanon Valley branch, the Lebanon & Tremont branch, the Mahanoy & Shamokin branch, and the Schuylkill & Susquehanna branch. Leased lines, directly operated, 705.62 miles. These include the Allentown R.R., the Allentown Terminal R.R., the Catawissa R.R., the Delaware & Bound Brook R.R., the East Pennsylvania R.R., the Little Schuylkill Navigation & R.R., the Mine Hill & Schuylkill Haven R.R., the North Pennsylvania R.R., the Philadelphia, Germantown & Norristown R.R., Schuylkill & Lehigh, Shamokin, Sunbury & Lewisburg, Wilmington & Northern and other small companies. There were also 34.46 miles used under traffic rights. Other companies controlled by the Reading Company, but separately operated, are the Chester & Delaware River R.R., the Gettysburg & Harrisburg Ry., the Northeast Pennsylvania R.R., the Perkiomen R.R., the Atlantic City R.R., the Philadelphia, Newton & New York R.R., the Port Reading R.R., the Reading & Columbia R.R., etc. See on following pages.

Coal Statistics: 1899: Anthracite coal carried, 9,533,693 tons; bituminous coal, 4,201,662 tons; in 1908: Anthracite coal carried, 13,537,462 tons; bituminous coal, 10,816,439 tons; in 1911: Anthracite coal carried, 11,675,405 tons; bituminous coal carried, 13,848,189 tons; in 1912: Anthracite coal carried, 11,244,945 tons; bituminous coal carried, 14,806,222 tons; in 1913: Anthracite coal carried, 12,860,092 tons; bituminous coal, 16,115,417 tons; in 1914, 11,091,290 tons anthracite and 16,735,104 tons bituminous; in 1915: Anthracite coal carried, 10,441,944 tons; bituminous coal carried, 15,672,001 tons; in 1916: Anthracite coal carried, 11,586,742 tons; bituminous coal carried, 19,024,308 tons.

Comment: The operating exhibit of the Philadelphia & Reading Railway System during the year ended June 30, 1916, was a very gratifying one. The freight density reached a new high figure and the average freight train load was also far better than in any recent years. It will be noted that in spite of the fact that the average freight rates continued low, the train mile earnings were well above those of 1915, or of any earlier year. As usual about two-thirds of the freight business done was represented by mining products.

Note: The income figures, as shown above, include the gross earnings of the Philadelphia & Reading Railway and its directly operated leased lines; the maintenance items refer to the operations of the same lines of railway, and the net earnings as shown are those of the Philadelphia & Reading Railway and directly operated leased and controlled lines; total net income includes receipts from investments, such as dividends on Central of New Jersey stock owned; net receipts from Philadelphia & Reading Coal & Iron Co., and other sources. Fixed charges include hire of equipment, and similar charges, net interest and rentals, etc., of both the railway and the holding company, and taxes in 1907, 1908 and 1909. The dividend column covers the dividends paid on the Reading Company stock. In the reports of the company certain important items representing additions and improvements have been included in operating expenses each year, but in the above table such charges are not included. The average mileage directly operated was considerably increased in 1914 by transfer to "main track mileage," 106.57 miles formerly classified as "sidings and laterals." This materially changes all the "per mile operated" figures.

Comment: During the year ended June 30, 1916, the operating results of the Philadelphia & Reading System underwent vast improvement and the net operating revenues were more than 50% higher than those of the previous year. Total net income available for charges was also 50% higher than in 1915, and although fixed charges advanced sharply, the balance carried forward was very heavy. Conditions on the property since June 30, 1916, have continued to be most favorable. The income account of the Reading Railway itself also reflected great prosperity and the surplus above the dividend requirements on the several stock issues was much higher than in 1915.

Note: The above is a "composite" exhibit of the Reading Company, Philadelphia & Reading Railway, and Philadelphia & Reading Coal & Iron Company. The stock column includes the three issues of Reading Company stock, reduced to the mileage basis of the Philadelphia & Reading Railway. The bonded debt column includes all the out-

standing bond obligations of the Reading Company, the Philadelphia & Reading Railway, and the Philadelphia & Reading Coal & Iron Co. (net). The rental column includes the leased line rentals of the Philadelphia & Reading Railway, capitalized at 5%. The investments (owned by company as per balance sheet) include the bonds and stocks held by the Reading Company and the Philadelphia & Reading Railway.

Comment: The financial statement of the Reading Company underwent practically no change during the year ended June 30, 1916. As measured on the mileage basis, the capitalization of the property appears very high, but the earning power is also large and the company has never had any difficulty in carrying its high net capitalization.

* Note: "Average income available" is the amount per mile available for fixed charges after deducting taxes for the ten years ended June 30, 1916, allowance for taxes being approximated for the years 1907, 1908 and 1909 as separate data for taxes is not available.

Note: The ratings are based not merely on the statistical exhibits, but other factors, such as the character of the mortgage or the relative value of the mileage to the system, are all taken into consideration. In the case of the Reading Company issues, all directly assumed or guaranteed bonds of either the holding company or the railway are on very high investment plancs. For Key to Bond Ratings, see pages 19 to 21.

THE CENTRAL RAILROAD COMPANY OF NEW JERSEY

NOTE: The analysis is based on official documents of the company, including the annual reports for the past ten years.
For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated Feb. 22, 1849, under New Jersey laws, as a consolidation of the Elizabeth & Somerville R.R. and the Somerville & Easton R.R. Main line opened from Elizabeth to Phillipsburg, N. J., in 1852; extension to Jersey City opened in 1864; branch to Newark in 1872. From time to time the company acquired additional lines by lease or otherwise, including a one-half interest in the New York & Long Branch R.R. The company also owns $8,439,650 out of $9,212,500 stock of the Lehigh & Wilkes-Barre Coal Co. (See Public Utility and Industrial Section.)

Location: The total mileage operated consisted, June 30, 1916, of 683.93 miles, classified as follows: Lines owned in fee, 156.63 miles; lines controlled by ownership of capital stocks, 227.79 miles; lines operated under leases or agreements, 253.68 miles; trackage rights, 45.83 miles. The above includes the mileage of the New York & Long Branch R.R., which is leased jointly with the Penn. R.R. Mileage confined to New Jersey and Pennsylvania. Population of these States in 1890, 6,702,947; in 1900, 8,185,784; in 1910, 10,222,278.

Control: The Central Railroad of New Jersey is controlled by the Reading Company, which owns $14,504,000 out of $27,436,800 capital stock, this stock being deposited under the Reading Company-Jersey Central coll. 4s.

Government Suit: In Oct., 1915, the United States District Court at Philadelphia ordered the company to dispose of its interest in the Lehigh & Wilkes-Barre Coal Co. on the ground that the union of the latter company with the Philadelphia & Reading Coal & Iron Co. through the instrumentality of the Reading Co. was a combination in restraint of trade. The Court further enjoined the Lehigh & Wilkes-Barre Coal Co. from paying and the Central Railroad of New Jersey from receiving any dividends on its holdings of the former company's stock. The case has been appealed and the matter is now pending.

Character of Freight Traffic: The reports of the Central Railroad of New Jersey are in many respects incomplete and unsatisfactory. No table of tonnage transported is furnished, and the above figures for 1915 and 1916 are those filed with the Interstate Commerce Commission. In 1914, anthracite coal tonnage represented about 34% of the total gross business (passenger and freight). Merchandise freight represented about 42% of the total business and 58½% was mineral products.

Yard tracks and sidings, June 30, 1916, 811 miles. The above operated mileage includes 38 miles operated by the company jointly with the Pennsylvania for the New York & Long Branch R.R.

Comment: During the year ended June 30, 1916, the freight density of the Central Railroad of New Jersey reached a new high figure, and the average freight train load was also moderately improved. There were practically no changes in the average passenger and freight rates, but train mile earnings averaged better than in recent years. It will be noted that the proportion of high grade freight was larger than during the year 1915, while products of mines tended to fall off considerably.

Note: Above table is based on average mileage operated for each year. Margin of safety is the proportion of surplus left over after deducting all fixed charges. For exapmle, in 1916, the balance for charges (per mile) was $17,066; fixed charges consumed, $8,334 per mile, or 49%, leaving $8,732, a "margin of safety" of 51%.

Note: Fixed charges, as shown above, include taxes, interest on bonds and guarantees, and rentals of leased lines. Interest on funded debt, amounted to $2,196,200 in 1916; rentals of leased lines, $2,663,529. The dividends paid amounted to 12%, of which 8% was paid from operation of railroad property and 4% from dividends received from Lehigh & Wilkes-Barre Coal Co.

Profit and Loss Account, year ended June 30, 1916: Credit balance, June 30, 1915, $15,232,283; credit balance transferred from income, $2,680,157, donations, $4,293; miscellaneous credits, $4,044,905; total, $21,961,637. Contra: Surplus appropriated for investment in physical property, $5,195,984; loss on retired road and equipment, $386,951; miscellaneous debits, $3,603,018; credit balance carried to balance sheet, $12,775,685; total, $21,961,637.

Comment: Both gross and net revenues underwent sharp advances on the Central Railroad of New Jersey during the year ended June 30, 1916. There was, however, a sharp decline in outside income and therefore the final net income available for charges was practically no higher than in previous years. Fixed charges, however, also tended to decline with the result that surplus above charges increased substantially and equalled over 21¾% on the outstanding stock.

Note: In 1916, the total book value of securities owned amounted to $25,207,118, and the par value, $32,336,691. Property investment, 1915 and 1916, includes securities formerly carried as "current assets." In working assets, $1,988,020 cash is included.

Comment: There was a slight increase in the funded debt of the company during the year ended June 30, 1916. As measured on the mileage basis the capitalization of the property is high, but the earning power is also heavy and the company has had no difficulty in carrying the capitalization as is shown by the high percentage of net income on net capital.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

Yard tracks and sidings, on June 30, 1916, 16.35 miles.

Comment: This is one of the subsidiary properties of the Reading Co., but is separately operated. The company has reported a steady growth in its freight density in recent years, and has practically doubled its average freight train load since 1907. Train mile earnings are also better today than in earlier years. The tonnage of this property is widely diversified, and the proportion of high grade freight is unusually heavy. Average freight rates, however, are low.

The foregoing table does not include any equipment statistics, as all equipment used on the road is owned by the Reading Company.

Profit and Loss Account, year ended June 30, 1916: Credit balance on June 30, 1915, $577,582; credit balance transferred from income, $261,191; unrefundable overcharges, $41; miscellaneous credits, $95; total, $838,909. Contra: Dividend appropriations of surplus, $405,000; miscellaneous debits, $252; credit balance carried to balance sheet, $433,657; total, $838,909.

Comment: The gross revenues on this property showed considerable improvement in 1916 and the net receipts were better than in recent years. The fixed charges are relatively light and therefore the company has usually reported a very substantial surplus on its stock. During the year just closed, this surplus was equal to over 18%.

Comment: There were no capitalization changes on this property during the year ended June 30, 1916. The property is not heavily capitalized in view of its earning power, and it will be noted that during the past ten years the net income on net capital has invariably ranged at a high rate. The capital stock is all owned by the Reading Company, and in the past two years unusually heavy dividends have been paid to the latter company.

Yard tracks and sidings, June 30, 1916, 75.81 miles.

Comment: Both freight and passenger density underwent sharp increases on this property during the year ended June 30, 1916. The average freight train load was also far higher than previously, and there was some improvement in the train mile earnings. It will be noted that the freight tonnage of this property is very widely diversified, the company not depending primarily on any particular type of business for its tonnage. During the year just closed the high grade freight, such as manufactures and miscellaneous articles represented nearly 33% of the total business done.

Note: Above table is based on average mileage operated for each year. Margin of safety is the proportion of surplus left over after providing for all fixed charges. For example, in 1916 the "balance for charges" (per mile) was $17,498; fixed charges consumed $5,858, or 34%, leaving $11,640, a "margin of safety" of 66%.

Fixed charges include rentals, interest, etc. Dividends include 9% on all the classes of stock. This includes $1,316,900 of voting common; $3,600,100 of non-voting; $481,100 guaranteed 7% stock, and $19,300 guaranteed 6% stock. Payments have been made at equal rate on all classes for many years.

Profit and Loss Account, year ended June 30, 1916: Credit balance on June 30, 1915, $1,193,377; credit balance transferred from income, $594,202; unrefundable overcharges, $516; miscellaneous credits, $999,460; total, $2,787,555. Contra: Dividend appropriations of surplus, $2,177,184; miscellaneous debits, $729; credit balance carried to balance sheet, $609,642; total, $2,787,555.

Comment: Both gross and net revenues underwent substantial improvement on this road during the year ended June 30, 1916. The balance available for charges was far in excess of that reported in any earlier year, and the surplus after payment of charges was equal to nearly 19% on the increased outstanding stock. The company paid during the year dividends of 9% regular and 50% in scrip.

The above statement includes three issues of capital stock: $481,100 being guaranteed 7 per cent. stock; $19,300 guaranteed 6 per cent. stock; $1,316,900 voting common stock, and $3,600,100 non-voting "dividend" obligations. All stocks, including the "dividend obligations," stand on an equal footing as regards dividends, and all pay the full 9 per cent. per annum.

Comment: There were no capitalization changes of importance on this property during the year ended June 30, 1916, except a substantial increase in the outstanding stock which resulted from the payment during the year of a 50% stock dividend. The net capitalization of the property now appears to be unusually heavy. However, the earning power of the company is so great that this increased capitalization is carried without any difficulty whatever, and in the year just closed the net income on net capital equaled nearly 18%.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

REFERENCE NOTES ON BOND ISSUES

1. Auth., $2,000,000; outstanding, $500,000 (closed). Dated April 1, 1890; due April 1, 1940. Int. paid New York, Philadelphia, or Richmond. Second lien on 81.92 miles from Richmond to Quantico, Va., and James River Branch, terminals in Richmond, etc., following first lien of the 6% and 7% guaranteed stocks. Underlies No. 2, with provision to retire. All deposited under the Richmond-Washington col. 4s of 1943. Coupon, $1,000. Listed on Richmond Stock Exchange.

2. Auth., $4,000,000; outstanding, $2,680,000. Dated April 1, 1903; due April 1, 1943. Follows No. 1 on same property. Entire issue owned by Richmond-Washington Co., and pledged under that company's coll. trust mortgage.

Capital Stock: Outstanding, $1,316,900 "voting" common, $3,600,100 non-voting dividend obligations, $481,100 7% guaranteed and $19,300 6% guaranteed. The guaranteed stocks are secured by a first mortgage (ahead of the bonds) on the 81.92 miles owned by the company. Although called "6% and 7%," they receive the same dividend rate as the common stock, which is now 9%. Dividends have been paid in recent years as follows: 1895 and 1896, 7%; 1897, 6½%; 1898 and 1899, 7%; 1900 to 1904 inclusive, 8%; 1905 to date, 9% per annum. In 1907, 25% extra was paid in scrip. In 1916 paid 50% extra dividend in scrip. The Richmond-Washington Co. owns $947,200 of the "voting" common stock. TRANSFER AGENT, D. K. Kellogg, Richmond, Va. Legal for S. B. in N. H. Net Rating, Aa.

SAN ANTONIO & ARANSAS PASS RAILWAY COMPANY

Origin: Incorporated under the laws of Texas, August 28, 1884, as the successor of a former company of the same name. The company was formerly controlled by the Southern Pacific Company, which owned the majority of the capital stock, but this control was declared illegal, and, since 1903, the property has been independently controlled and operated. In 1903, under the ruling of the Railroad Commission of Texas, the company reduced its capital stock outstanding from $5,000,000 to $1,000,000, and bought in and canceled $1,356,000 of its first mortgage bonds.

Location: The lines of road operated on June 30, 1916, consisted of 724.40 miles, of which all was owned, with the exception of 0.60 mile, which was operated under traffic rights. The main line extends from San Antonio to Houston, Texas, 238 miles, and the branches radiating throughout this same territory consist of 485.80 miles. Sidings, 174.53 miles.

Management: OFFICERS: Wm. H. McIntyre, Pres.; J. S. Peter, First Vice-Pres. and Gen. Mgr.; R. J. Boyle, Second Vice-Pres.; H. F. Smith, Treas.; J. W. Terry, Sec. DIRECTORS: W. H. McIntyre, G. E. Comment: The operating exhibits of this company have shown little or no improvement in recent years. It will be noted that both passenger and freight density are light, while the train load is now only slightly larger than it was ten years ago. The amount of tonnage carried was heavier than usual in 1916, but did not show increase enough to make the operations profitable.

Profit and Loss Account, year ended June 30, 1916: Debit balance, June 30, 1915, $3,834,997; debit balance transferred from income, $600,471; loss on retired road and equipment, $66,064; miscellaneous debits, $12,882; total, $4,514,414. Contra: Profit on road and equipment sold, $4,776; donations, $1,169; miscellaneous credits, $16,772; debit balance carried to balance sheet, $4,491,697; total, $4,514,414.

Comment: This property, which was formerly operated by the Southern Pacific Company, but a good many years ago was separated from the latter, has made a very poor showing in recent years. It will be noted that even in 1916 there was only a nominal recovery in the gross revenues, although the net operating receipts in this latter year were much better than in 1915. The balance available for charges is to-day ranging at low figures, and the company has now been reporting a deficit for three years. The only reason why the company has not defaulted on its outstanding bonds is that the latter are guaranteed principal and interest by the Southern Pacific Company. Evidently there is not very much future for this road.

Comment: There were no important changes in the San Antonio & Aransas Pass property in 1916. It will be noted that the capital stock is very small, but there is an unusually heavy outstanding bonded debt as compared with the average earning power of the property. In recent years the company has reported a very low net income on net capital.

ST. LOUIS SOUTHWESTERN RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated Jan. 12, 1891, under Missouri laws, as successor to the St. Louis, Arkansas & Texas Ry. The system is divided into two companies, known as the St. Louis Southwestern Ry. Co. and the St. Louis Southwestern Ry. Co. of Texas, this division being necessary in order to conform to Texas laws. The company owns the entire stock of the Gray's Point Terminal Ry. and of the Eastern Texas R.R.; it owns a majority of the stock of the Shreveport Bridge & Terminal Co. and of the Paragould Southeastern Ry. Co. and all the stock and bonds of the Pine Bluff Arkansas River Ry. and of the Dallas Terminal & Union Depot Co. It owns the Southern Illinois and Missouri Bridge Co. jointly with five other companies; also owns one-fifteenth of the capital stock of the Terminal Railroad Association of St. Louis. In April, 1910, the entire capital stock of the Stephenville North & South Texas R.R. was acquired, and in July, 1910, the Central Arkansas & Eastern R.R. was acquired by a thirty-year lease, under which the latter company's bonds are guaranteed by the St. Louis Southwestern Ry. On Jan. 1, 1914, the Paragould Southeastern Ry. was leased and its bonds guaranteed.

Location: The directly operated lines of the system consisted, June 30, 1916, of $1,753.8 miles, the average mileage operated during the year being 1,754. The mileage is classified as follows: Maine lines, Delta to Texarkana, Cairo branch, New Madrid branch, Gray's Point Terminal Ry., etc., 616.2 miles; Central Arkansas & Eastern (leased), Stuttgart, Little Rock & Shreveport branches, and other leased lines, 200.9 miles; trackage rights, 241.5 miles; St. Louis Southwestern Ry. of Texas, including main lines and branches, 695.2 miles. Mileage mainly in Missouri, Arkansas, and Texas. Population of these States in 1890, 6,042,886; in 1900, 7,466,929; in 1910, 8,764,326.

Management: OFFICERS: Edwin Gould, Chairman and Pres.; J. M. Herbert, Vice-Pres.; Nelson B. Burr, Vice-Pres.; D. H. Morris, Vice-Pres.; A. J. Trussell, Sec.; G. K. Warner, Treas. DIRECTORS: Edwin Gould, J. M. Herbert, D. H. Morris, A. J. Hemphill, Winslow S. Pierce, David H. Taylor, Geo. H. Macy, Murray Carleton, Tom Randolph. Annual meeting, first Tuesday in October. Comment: During the year ended June 30, 1916, a sharp recovery was reflected by the operating results of the St. Louis Southwestern Railway. While the freight density is still light as compared with earlier years of the decade, yet it is showing steady improvement and the average freight train load has been substantially advanced. The company's freight tonnage is widely diversified, and the company is now depending less on forest products for its tonnage than in earlier years.

Note: Above table is based on average mileage directly operated for each year, including leased lines, trackage rights, etc. Margin of safety is the proportion of surplus left over after deducting all charges. For example, in 1916, "balance for charges" (per mile) was $2,564; fixed charges consumed $1,841 per mile, leaving $723, a "margin of safety" of 28%. Included in dividend column are interest payments on income bonds. No dividends paid on stock in 1915 and 1916.

Comment: Both net and gross revenues underwent sharp advances on this property during the year ended June 30, 1916, the net revenues being better than those of any year since 1913. Fixed charges tended to advance moderately, but nevertheless the company was able to report a very substantial surplus, which equaled more than 6½% on the outstanding stock. Since the close of the fiscal year, the results have continued to be very favorable.

Note: In the above comparative exhibit, the outstanding income bonds are included in the stock column and not the bond column, and the interest payments on these incomes are shown as "income dividends." The original amount of these incomes was $10,000,000, but all but $3,042,500 have now been deposited under the St. Louis Southwestern 4% consolidated mortgage. The stock column of course includes only those which are still outstanding in the hands of the public. The actual investment position of these incomes is a strong one, as shown in the Table D exhibit on the following page. They have steadily paid the full 4% throughout the entire decade.

Note: The funded debt of the company was increased in 1914 chiefly by the issue of additional equipment trusts. The securities owned by the company on June 30, 1915, amounted to $16,212,333 in par value and $15,434,931 in book value. Most of these securities were pledged. In this condensed balance sheet the income bonds are included in the funded-debt item.

Comment: There were only slight capitalization changes on the property during the year ended June 30, 1916. The company's net capitalization has shown no tendency to increase during the past few years, but on the other hand has shown a decline as measured on a mileage basis. Net income on net capital for 1916 was better than that for any year during the decade except 1913. The payment of dividends was not resumed on the preferred stock during the year, but in view of more recent results seems now justified.

INDUSTRIALS The Public Utility and Industrial Edition of "Moody's Analyses of Investments" covers the field of industrial enterprises in the same broad way that Steam Railroads are covered in this edition. No banker or investor can afford to be without this very important book. The price is the same as that of the Steam Railroad Edition, $15 per copy net.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

THE SEABOARD AIR LINE RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated under laws of South Carolina in October, 1915, as a consolidation of the Carolina, Atlantic & Western with the Seaboard Air Line Railway (see "Consolidation" below). The latter company was incorporated under Virginia laws, April 10, 1900, as successor to the Richmond, Petersburg & Carolina R.R., the latter operating a line from Richmond, Va., to Norlina, N. C., about 102 miles. Additional properties, which were known as parts of the "Seaboard Air Line" were then acquired, including the Seaboard & Roanoke R.R., the Carolina Central R.R., the Georgia, Carolina & Northern R.R., the Durham & Northern Ry., the Raleigh & Augusta Air Line R.R., and the Raleigh & Gaston R.R. These latter companies together formed a through line from Portsmouth, Va., to Atlanta, Ga., with branches from Wilmington to Rutherfordson, N. C., and aggregated about 960 miles in all. A line was then constructed from Cheraw to Camden, S. C.; the lines of the Florida Central & Peninsula R.R. and the Georgia & Alabama R.R. were absorbed in November, 1901. In 1903, a traffic contract was arranged with the Savannah & Statesboro Ry., and the bonds of this company were guaranteed. In the year 1908, the company, on its own application, was placed in receivers' hands, and its finances underwent reorganization and readjustment without foreclosure. In September, 1909, the Atlanta & Birmingham Air Line Ry., the Florida West Shore Ry., the Catawba Valley Ry., the Arcadia & Gulf Ry. and the Tallahassee, Perry & Southeastern Ry. were merged into the Seaboard Air Line Ry. In 1910 the property of the Atlantic, Suwannee & Gulf Ry. was acquired. The company also holds an interest in the Macon, Dublin & Savannah R.R., and in the Old Dominion Steamship Co., and controls through stock ownership the Baltimore Steam Packet Co. The Chesterfield & Lancaster R.R. is also controlled by stock ownership. In the fiscal year 1912, the Roanoke & Tar River R.R. was merged, and the company also acquired all the capital stock of the Raleigh & Charleston R.R. and the Tampa Northern R.R.

Location: The directly operated lines of The Seaboard Air Line Railway Company now embrace 3,449.29 miles of which 3,369.67 miles are owned, 57.65 leased and 79.62 operated under trackage rights. The system forms a direct line from Richmond, Va., to Tampa, Fla., with branches radiating throughout the States of North and South Carolina, Florida, and Georgia and west to Birmingham, Ala. Over the lines of the Richmond-Washington Co. it makes through connection with the latter city, Baltimore, Philadelphia, and New York, and has its direct water line to Baltimore, etc. Mileage mainly in States of Virginia, North and South Carolina, Georgia, and Florida. Population of these States in 1890, 6,653,891; in 1900, 7,833,183; in 1910, 9,145,039.

Dissolution of Seaboard Company: Prior to 1912 a majority of the stocks of the Seaboard Air Line Ry. was owned by the Seaboard Company, a New Jersey "holding corporation" formed in 1905. In 1912, however, the Seaboard Company was dissolved and the holdings of the railway stock distributed to the stockholders of the company. At the same time, Baltimore & New York interests acquired $12,000,000 common and $9,000,000 preferred stock of the Seaboard Air Line Ry. from the Cumberland Corporation, thus obtaining a dominating interest.

Consolidation: In October, 1915, a new company was formed by the direct consolidation of Seaboard Air Line Railway and The Carolina, Atlantic & Western Railway Co., the property of the latter embracing about 416 miles not heretofore directly included in the system. In this merger the stocks of the old Seaboard Air Line were exchanged share for share, and a new general 6% mortgage was created. See details in notes on stocks and bonds on following pages.

Yard tracks and sidings on June 30, 1916, 934 miles.

Comment: Operating results on the Seaboard Air Line during the year ended June 30, 1916, underwent substantial improvement and the freight density was restored to the high figures of a few years ago. Average freight trainload was also better than at any previous time, while train mile earnings reached a new high figure. As usual the tonnage was well diversified, the proportion of high grade freight being 35% of the business done.

Note: Above table is based on average mileage directly operated for each year, whether such lines be owned, leased, or otherwise controlled or used. Margin of safety is the proportion of total net income left over after deducting all charges including taxes. For example, in 1916 the "balance for charges" (per mile) was $2,268; fixed charges consumed 85% or $1,924 per mile, leaving $344, a "margin of safety" of 15%.

Note: Fixed charges in 1916 included interest on bonds and equipment trusts, $4,325,598; leased-line rentals, $51,000; joint-facility rents, $122,047; interest on adjustment bonds, $1,250,000, etc. The above income statement for 1916 covers the income account of the Seaboard Air Line Ry. from July 1, 1915 to Nov. 30, 1915, and the Seaboard Air Line Ry. Co. from Dec. 1, 1915 to June 30, 1916.

Profit and Loss Account of the reorganized company for the seven months Dec. 1, 1915 to June 30, 1916: Credit balance Dec. 1, 1915, $6,618,714; credit balance transferred from income, $1,040,118; profit on road and equipment sold, $2,870; unrefundable overcharges, $33; donations, $9,885; miscellaneous credits, $1,516,611; total, $9,188,231. Contra: Surplus appropriated for investment in physical property, $10,421; debt discount extinguished through surplus, $666,338; miscellaneous appropriations of surplus, $7,082; loss on retired road and equipment, $5,448; miscellaneous debits, $451,917; credit balance carried to balance sheet, $8,047,025; total, $9,188,231.

Comment: Gross revenues on the Seaboard Air Line in the year ended June 30, 1916, were nearly up to the high figures of 1913, while net revenues were far higher than ever bfore. Although the fixed charges advanced substantially, it will be noted that a heavy surplus was finally carried forward which equalled no less than 4½% on the preferred stock. Since the close of the fiscal year results have been even better and the current outlook for the property is of a most favorable character.

Note: Working assets in 1916 included, $3,452,084 cash.

Comment: There was a substantial increase in the funded debt of the Seaboard Air Line Company during the year ended June 30, 1916, but as measured on a mileage basis the increase was not heavy. The net capitalization of the property is practically no heavier today than it was a few years ago, when measured by the mile, and the company has recently reported a net income on net capital fully up to the average of the decade. During the year the company added substantially to its surplus accounts.

SOUTHERN PACIFIC COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated March 17, 1884, under special charter from the State of Kentucky, authorizing the company to acquire and hold stocks, bonds, and other securities of corporations, and to make contracts and agreements covering the leasing, maintenance, or operation of railroads, public utilities, steamship lines, and other properties. The company was one of the earliest of "holding" corporations. On March 1, 1885, the so-called "Omnibus lease" went into effect. This lease embraced nearly all the lines forming the "Sunset" route between San Francisco and New Orleans by rail, and thence to New York by steamer, including the many branches. The Southern Pacific Co. agreed to maintain said roads, to pay all fixed and other charges, and to divide the surplus profits between the parties to the agreement on the following basis: Southern Pacific R.R. of Cal., 44%; Southern Pacific R.R. of Ariz., 10%; Southern Pacific R.R. of New Mexico, 6%; Louisiana Western R.R., 7%; Morgan's Louisiana & Texas R.R. and Steamship Co., 23%; Southern Pacific Co., 10%. This lease was for 99 years. On July 1, 1889, in conformity with the laws of Texas, all leases of railroads in that State were canceled, and the properties have since been operated by their own officers. On Dec. 31, 1901, the lease of Morgan's Louisiana & Texas R.R. and S.S. Co. was also terminated. The Southern Pacific Co., however, continued to control these Texas companies through stock ownership. In April, 1898, the California Pacific R.R., the Northern Ry. of Cal., and the Northern California Ry. were merged into the Southern Pacific R.R. Co. of California, but this consolidation did not annul the original leases. The property of the Central Pacific Railway was leased to the Southern Pacific on Feb. 17, 1885, and modified Jan. 1, 1888. On Jan. 1, 1894, the old lease was canceled, and a new one for 90 years entered into. By the terms of this new lease, the Southern Pacific Co. was to pay from net earnings all charges and any surplus up to 6% on the stock of the Central Pacific to the latter, but any further surplus to be divided.

The "Omnibus lease" was abrogated Dec. 31, 1901, and the railroads embraced in it are now operated chiefly as proprietary lines. Other lines aside from those in the lease have been acquired from time to time.

Location: On June 30, 1916, the lines embraced in the Southern Pacific Co. system included 10,956.49 miles of first main track, 551.62 miles of extra main track, and 3,982.07 miles of sidings; the average mileage operated during the year was 10.554.24 miles. The main track mileage (less 43.41 miles leased to other companies) is classified as follows: (1) Mileage of lines belonging to companies whose capital stocks are principally owned by the Southern Pacific Co.: Central Pacific Ry., 2,267.82 miles; Oregon & California R.R., 1,101.10 miles; Southern Pacific R.R. Co., 3,489.80 miles; South Pacific Coast Ry., 106.69 miles; Morgan's Louisiana & Texas R.R. and S.S. Co., 400.67 miles; Louisiana Western R.R., 207.74 miles; Lake Charles & Northern R.R., 71.52 miles; Texas & New Orleans R.R., 468.14 miles; Galveston, Harrisburg & San Antonio Ry., 1,360.95 miles; Houston East & West Texas Ry., 190.94 miles; Houston & Shreveport R.R., 40.72 miles; Houston & Texas Central R.R., 894.63 miles; Ariz. Eastern R.R., 377.74 miles; (2) lines whose stock is principally owned by Morgan's L. & T. R.R. & S.S. Co.: Iberia & Vermillion R.R., 21.44 miles. Rail lines extend west from Ogden, Utah, to San Francisco, north to Portland, Ore., south to Los Angeles, and east to New Orleans, La. Mileage chiefly in California, Oregon, Nevada, Arizona, New Mexico, Texas, and Louisiana. Population of these States and Territories in 1890, 5,134,983; in 1900, 6,689,540; in 1910, 9,216,774.

Litigation on Title to Oil Lands: On June 22, 1914, the Supreme Court of the United States decided in favor of the defendants the suit of Edmund Burke and others against the Southern Pacific R.R. Co. and the Kern Trading & Oil Co. The object of this suit was to recover some 3,200 acres of the oil lands of defendants in California, on the ground that, by reason of the provision in the Act of Congress containing the land grant excepting mineral lands, and especially by reason of a so-called mineral reservation clause in the railroad company's patents, the subsequent discovery of oil under the lands made the patents inoperative and defeated the railroad company's title to the lands. In deciding against claimant, the Supreme Court decided that the subsequent discovery of oil did not cause the lands to revert to the Government, and that the mineral reservation in the patents was unauthorized and inoperative. The Court, in effect, held that the patents could be avoided only by proving that they had been fraudulently obtained, and that suit to set aside such patents must be brought within six years from date of issuance of the patents. Litigation still continues. For all current news consult our Special Service.

Litigation on Oregon and California Land Grant: In 1908 the United States brought suit against the Oregon and California Railroad Company and the Southern Pacific Company, to forfeit to the Government the unsold portion of the lands granted by act of Congress to aid in the construction of the Oregon and California Railroad. The ground of forfeiture mainly relied on was that some of the lands included in the grant had been sold in disregard of the requirements of the granting act, namely, that the lands should be sold to actual settlers only, for not more than $2.50 per acre, and in quantities not exceeding 160 acres. The quantity of land involved amounted to about 2,300,000 acres. The lower court decided in favor of the Government but the U. S. Supreme Court reversed the decision and referred the matter to Congress for legislation empowering the railroad to dispose of lands unsuitable for settlement purposes for their timber value. Congress, however, passed a law revesting title to unsold lands in the Government on payment to company of $2.50 per acre. The company maintains that this law is inconsistent with the Supreme Court decision in that the company has the right to sell timber apart from the land. The litigation is still pending.

Relations with Union Pacific Railroad Co.: Under the decree of the United States Supreme Court in Dec. 1912, the Union Pacific R.R. was obliged to dispose of its stock interest in the Southern Pacific Co. Under the modified plan approved by the United States District Court, June 30, 1913, the Union Pacific exchanged $38.292.400 of its Southern Pacific stock for the entire holdings of the Pennsylvania R.R. in Baltimore & Ohio stock ($42,547,200, of which one-half was preferred). The remaining $88,357,600 Southern Pacific stock owned by the Union Pacific was deposited with the Central Trust Company of New York, as trustee, which issued "certificates of interest" in the stock. Certificate holders have no voting rights and receive no dividends until their certificates are converted into stock, and such conversion can only be made upon affidavit that the owner owns no Union Pacific stock, and is not acting for or in behalf of any stockholder thereof or in concert, agreement or understanding with any one seeking to control the Southern Pacific Co. in the interest of the Union Pacific. The Southern Pacific stock thus held can be voted by the trustee only under the direction of the Court. If, by Jan. 1, 1916, any certificates remain outstanding, the Court may direct the trustee to sell the stock represented thereby and pay the proceeds to the lawful owners.

In carrying out this dissolution plan the, Union Pacific stockholders were offered the right to subscribe for $84,426,700 out of $88,357,600 of these certificates at 92, the offer being underwritten. In January, 1916, practically all of the certificates had been exchanged for stock. See, for further details, Union Pacific Railroad.

Relations with Central Pacific: On February 11, 1914, suit was brought by the United States Government to compel the Southern Pacific Company to dispose of its control of the Central Pacific Ry. The main line of the Central Pacific extends from the connection with the Union Pacific at Ogden, Utah, to San Francisco, Cal., but in addition a large system of branches is owned or otherwise controlled. Total mileage, 2,168 miles. At present, the Central Pacific is leased to the Southern Pacific Co. from Mar. 1, 1894, to Jan. 1, 1984 (except certain branches recently absorbed), the lessee to pay from the earnings thereof, all operating expenses, taxes, and other charges, including sinking funds and $10,000 per year for organization expenses, and surplus up to 6% on the preferred and common stock to be paid over to the Central Pacific Ry.; but the lessee is to retain one-half of any surplus in excess of 6% on the stock issues. All of the stock of the Central Pacific (both preferred and common) is owned by the Southern Pacific, all but $1,300 being pledged under the latter's 4% C. P. collateral mortgage. See Central Pacific R.R. under its own heading.

Interest in Other Companies: The Southern Pacific Co. owns a half interest in the stocks of the Northwestern Pacific R.R. and the Sunset Ry.; also owns the entire capital stock of the Pacific Electric Ry., and other properties in California. Also did own a majority of the stock of Pacific Mail Steamship Co., which has since been sold and company reorganized. Still owns an interest in the Associated Oil Co. and other industrial properties. See "Moody's Analyses of Public Utilities and Industrials."

Oil Land Suits: In April, 1908, the United States Government began a series of suits to recover various petroleum-bearing lands alleged to have been improperly patented by this company. The area involved was about 2,273,000 acres, out of a total of something like 9,000,000 acres held by the company and subsidiaries. The original suits were based upon the so-called "mineral reservation clause," which provided that mineral-bearing lands could not be patented by a railroad. In this contention the government lost, the result of which was that it could regain title to none of the Southern Pacific lands except through alleging and proving fraud. At the end of 1913, there were said to be in all six suits pending, four of which, involving 7,500 acres, were based upon the allegation of fraud. The total area involved was stated to be 89,500 acres.

On June 10, 1915, Judge Bean, in the United States District Court of Los Angeles, held that about ten sections, amounting to about 6,400 acres in Kern County, Cal., had been fraudulently patented. The government contended that this parcel of land was worth over $15,000,000. Probably this valuation was exaggerated, and while accurate information is not available its true value has been estimated at $6,500,000. Kern County is a big oil producer, and first-class oil lands there are very valuable. Some such lands in the State of California sell as high as $3,000 per acre, while other lands can be had for $500.

Canal Competition: Aside from the oil land suits, the difficulty of the company which most appeals to the imagination is the competition with the Panama Canal. Thus far, there is no means of learning just how much this competition will amount to. Traffic through the canal began practically at the beginning of the fiscal year 1915, but it is by no means to be assumed that the company's $10,000,000 loss in gross business was due to this competition. Some of the principal articles which are going *via* canal are: Cotton, fuel oil, sugar, general merchandise, canned goods, dried fruits, iron and steel, agricultural implements, castings and machinery and lumber.

Southern Pacific's loss in lumber traffic should not be very large. This traffic amounts to nearly 6,000,000 tons per annum, or about 18 per cent. of the total traffic. But much of this moves north and south along the Pacific Coast, and much of the balance moves locally between points in Texas and Louisiana, where it is not subject to competition. It should lose none at all of its petroleum traffic; but this point is insignificant, since petroleum represents only about 1.5 per cent. of the total traffic. In fruit and vegetables—which are rather important—it should lose but little, because most of these will not stand the delay of canal transportation.

In manufactures and merchandise, however, the losses due to the canal are likely to amount to something. Quite a considerable proportion of this traffic is likely to be diverted to the canal, and the traffic is important. Manufactures, in 1914, represented 14.88 per cent. of the total traffic, and merchandise and miscellaneous represented 8.98 per cent.

The canal traffic has not yet become developed enough to show just what it is going to do, but upon the basis of the incomplete data available I am inclined to think that during 1916 or 1917 the canal may take from the Southern Pacific a tonnage sufficient to be equivalent to about 3.6 per cent. of the company's freight earnings of 1914. This would mean a gross business of $1,457,500, whereas the company's total gross earnings from railroad and other property in 1914 were $138,520,259. According to this estimate, then, the canal competition will reduce gross earnings by only a little over 1 per cent.

The freight tonnage of the company is well diversified on this system although in recent years the property has been depending to a larger extent on mining products for its tonnage. Agricultural products range at approximately the same figures shown throughout the decade, while forest products also indicate little change.

Comment: During the year ended June 30, 1916, the freight density of the Southern Pacific Company rose to far higher figures than have ever before been reported. The average freight train load was also well above earlier years, while the train mile earnings were held up at the recent averages. This exhibit was a satisfactory one in view of the substantial value in the average freight and passenger rates. The freight tonnage of the company was well diversified during the year, and there was a substantial increase in the proportion of high grade freight.

* Dividends of $16,361,086 (6%) charged in profit and loss account in 1916.

Note: In above exhibit, prior to 1914, the net profit in "outside operations" is added to the net earnings, but the gross receipts and expenses are disregarded. Fixed charges include, in 1914, interest on bonds of parent company, of directly operated proprietary companies, and of guaranteed securities; also sinking fund payments, etc.; less net profit on accounts representing lease of joint tracks, yards, other roads, etc. The fixed charges do include, however, taxes of the holding company itself, which amounted to $464,300 in 1914 with expenses; in 1914, there was also included in fixed charges, $1,024,221 for depreciation of rolling stock leased to other companies.

Profit and Loss Account, year ended June 30, 1916: Credit balance June 30, 1915 (Southern Pacific Co., $112,926,447; proprietary companies, $35,239,080), $148,165,527; credit balance from income, $29,950,416; profit on road and equipment sold, $142,477; delayed income credits, $1,348,906; unrefundable overcharges, $80,230; donations, $111,569; miscellaneous credits, $589,685; total, $180,388,810. Contra: Surplus applied to sinking and other reserve funds, $621,291; dividend appropriations, $16,361,086; surplus appropriated for investment in physical property, $161,913; debt discount extinguished through surplus, $2,342; loss on retired road and equipment, $351,045; delayed income debits, $999,734; miscellaneous debits, $2,112,905; credit balance carried to balance sheet (Southern Pacific Co., $117,219,274; proprietary companies, $42,559,220), $159,778,494; total, $180,388,810.

Comment: Gross revenues on the Southern Pacific System underwent a very sharp advance during the year ended June 30, 1916, and there was also a very heavy increase in the net operating revenues. This increase, however, was offset to some extent by a sharp fall in the outside income, and therefore the total net income while heavy, did not show the same proportionate increase as that of operating revenues. Nevertheless, the balance carried forward after deducting fixed charges was 50% greater than in the previous year and equaled no less than 11.3% on the outstanding stock.

Note: In the above exhibit, the stock column covers the Southern Pacific Co. stock only; the bond column, however, includes the direct bonded debt and all the outstanding debt of the many "proprietary" lines which are directly operated; rental charges are nominal, and therefore are disregarded. The investments include all stocks and bonds owned by the Southern Pacific Co., including, in recent years, those pledged, as the proprietary debts are fully included, whether owned by the parent company or otherwise. The balance-sheet of the company was completely reconstructed in 1914, as shown below, but for comparative purposes, the figures are presented above in the usual form.

Note: Changes in balance sheet in 1914, as shown above, involving the large addition to "funded debt," are due chiefly to a revision of bookkeeping methods, and the inclusion of a net amount of "non-negotiable debt to affiliated companies." This item amounted to $68.809,558 in 1914; $70,724.783 in 1915; $78,982,230 in 1916. The company's own direct debt in 1916 was $204,835,110 as compared with $206,175,910 in 1915, and $203,226,336 in 1914, and $165,581,910 in 1913.

Comment: There was a further moderate increase in the funded debt of the Southern Pacific Company during the year ended June 30, 1916. The capitalization of the property, however, as figured on a mileage basis is not unusually high, and the net capitalization in the year just closed was considerable lower than in recent years. Net income on net capital rose to 13½%, which was higher than any year in the past decade, except 1910.

For Reference Notes on Bond Issues, see next page.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

REFERENCE NOTES ON BOND ISSUES

Note: In the preceding table, the bond issues are arbitrarily arranged in accordance with the relative position and security, so far as can be done in view of the magnitude of the system, the multiplicity of issues, etc. Those of the original Central Pacific Lines are given first preferenee; the mortgage issues which are fully guaranteed as to both principal and interest by the Southern Pacific Company are placed next; then follow mortgage issues of proprietary companies guaranteed as to interest only; then follow the unguaranteed issues of proprietary companies, then follow the direct obligations of the Southern Pacific Company. Interest or sinking fund payments on all the above issues are charged in the general income account of the Southern Pacific Company. No issues on which interest is not charged (even though they may be guaranteed) are here included. For all such, see the separate statements of the companies.

In the "interest requirement per mile" in above table, only the interest on the amounts not held by the Southern Pacific Company are considered. While full interest is charged in the income account, that on securities owned comes back as "other income."

CENTRAL PACIFIC RAILWAY

Origin: Incorporated under laws of Utah, July 29, 1899. Acquired title to all properties formerly owned by the Central Pacific R.R. On Feb. 29, 1912, acquired the property of the Oregon Eastern Ry. The property is leased to the Southern Pacific Co. from March 1, 1894, to Jan. 1, 1984, with the exception of the property acquired from the Chico & Northern R.R. and the Sacramento Southern R.R., the rental being all expenses of operation, fixed and other charges, sinking fund requirements, dividends, and $10,000 for organization expenses. For full details, see page 659. Entire capital stock of the company is owned by the lessee.

On Feb. 29, 1912, the following properties were acquired: Central California Ry. Co., Fernley & Lassey Ry., Chico & Northern R.R., Modoc Northern Ry., Nevada & California Ry., Sacramento Southern Ry., Goose Lake & Southern Ry., and the Oregon Eastern Ry. The company assumed the bonds and stocks of these acquired properties, and they are held in the Southern Pacific Company's treasury.

This subject is fully covered in a small volume entitled "*How to Invest Money Wisely*," by John Moody, which we have recently published. For many years Mr. Moody has made a careful study of this subject in connection with his work as an analyst and advisor for bankers, financial institutions and investors, both at home and abroad. These principles for wisely and intelligently diversifying investment capital have been adopted within the past few years by numerous institutions and several thousand individual investors with satisfaction and profit.

SOUTHERN RAILWAY

SOUTHERN RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated under Virginia laws, Feb. 20, 1894, as successor, by reorganization, of the Richmond & West Point Terminal Ry. & Warehouse Co., and various affiliated corporations. The company acquired additional properties from time to time and now directly operates an extensive system of lines radiating throughout the Southern States, and extending from Washington, D. C., and Richmond, Va., southward to the Atlantic and the Gulf. With the separately operated lines, all the Southern States east of the Mississippi are crossed or penetrated.

Location: The total mileage of directly operated lines on June 30, 1916, was 7,038.86 miles, classified as follows: Lines owned, 4,245.15 miles; lines controlled by ownership of securities, 1,590.99 miles; lines leased, 795.90 miles; lines operated under agreement, 11.40 miles; lines operated under traffic rights, 495.42 miles. Mileage operated is mainly located in Virginia, North and South Carolina, Tennessee, Georgia and Alabama. Population of these States in 1890, 9,542,964; in 1900, 11,153,954; in 1910, 12,715,702.

Controlled Lines: In addition to its directly operated lines, the Southern Railway controls through stock ownership the following companies: Alabama Great Southern R.R., Georgia Southern & Florida Ry., Northern Alabama Ry., Mobile & Ohio R.R., Augusta Southern R.R., Blue Ridge Ry., Danville & Western Ry., Tallulah Falls Ry., Virginia & Southwestern Ry. (See these companies under their own heads.) In addition, the Southern Ry. and the Louisville & Nashville R.R. jointly control the Chicago, Indianapolis & Louisville R.R., while, jointly with the Cin., Hamilton & Dayton, the Southwestern Construction Co. is controlled, the latter controlling the Cincinnati, New Orleans & Texas Pacific Ry. The New Orleans Terminal Co. is also controlled. The Southern Railway also has a one-third interest in the Kentucky & Indiana Terminal R.R., a one-eighth interest in the Jacksonville Terminal Co., a one-sixth interest in the Richmond-Washington Co., and a full interest in the St. John's River Terminal Co. In 1916 control of the New Orleans & Northeastern R.R. was acquired from the Alabama, New Orleans, Texas & Pacific Junc. Rys., Ltd., an English holding company. The purchase was made by J. P. Morgan & Co. in the interest of the Southern Ry. On July 1, 1916, the company leased the Virginia & Southwestern Ry. (formerly operated separately) and is now operating the property as the Appalachian division.

Comment: Both freight and passenger density improved on the Southern Railway property during the year ended June 30, 1916, the increase in freight density being especially notable. There was also considerable improvement in average freight train load and the train mile earnings ranged much higher than in earlier years notwithstanding the fact that average freight rates tended to fall off. As usual about 40% of the freight tonnage was represented by mining products, and 30% by high grade freight.

Note: Above table is based on average mileage operated for each year, including mileage used under lease or otherwise. Margin of safety is the proportion of surplus left over after deducting all fixed charges. For example, in 1916, the "balance for charges" (per mile) was $3,533; fixed charges consumed $2,195, or 62% of this, leaving $1,338 a "margin of safety" of 38%.

Note: In above exhibit fixed charges include rentals of leased lines and of joint facilities, losses on separately operated properties, interest, etc. In 1916. interest on bonds amounted to $10,329,592; on equipment, $650,629. Lease rentals amounted to $1,778,528; joint facility rents, $1,054,241.

Profit and Loss Account, year ended June 30, 1916: Credit balance on June 30, 1915, $19,772,955; credit balance transferred from income, $9,245,704; profit on road and equipment sold, $34; unrefundable overcharges, $18,958; donations, $92,147; miscellaneous credits, $1,156,419; total, $30,286,217. Contra: Surplus appropriated for investment in physical property, $76,762; debt discount extinguished through surplus, $80,996; loss on retired road and equipment, $44,794; miscellaneous debits, $1,755,711; credit balance carried to balance sheet, $28,327,954; total, $30,286,217.

Comment: Gross revenues increased substantially on the Southern Railway during the year ended June 30, 1916, and were above those of 1914. The most important increase, however, was in the net receipts which were approximately 60% higher than those of 1915. The total income available for charges reached the best figures of the decade, and enabled the company to carry forward a final balance which equaled no less than 15 2/3% on the outstanding preferred stock. Conditions since the close of the fiscal year have continued to show marked improvement.

Note: Funded debt for 1916, as shown above, includes $232,142,200 of mortgage bonds, $14,158,500 collateral trust bonds, $15,000,000 short term notes, $17,435,000 equipment bonds and $1,200,000 dividend certificates; $5,650,-200 stock trust certificates. This balance sheet does not include the outstanding securities of leasehold estates on which interest and dividends are paid as "rental for leased lines."

Comment: During the fiscal year ended June 30, 1916, the Southern Railway reported only nominal changes in its capitalization exhibit. As measured on the mileage basis, the net capital of the road appears high, and has tended to rise during the past ten years. But the net income on net capital has also kept pace with this increase, and in 1916 was the best reported during the decade.

Our Investors Service. We are often asked by those not familiar with our institution to execute orders for them in the security markets; to buy or sell securities or to act as brokers or investment bankers. *We never do any of these things.* It is the business of the broker to execute orders; of the investment banker to sell securities to investors or buy securities from them. Our business is to investigate, to analyze and pass upon the values of securities or properties, to report on lists of investment holdings, to suggest changes in investment lists with a view to strengthening the position of the investor; and as supplementary to all this, to keep the subscriber to the Service constantly informed of every development in any way affecting his interests and keep him in close touch with the trend of the security markets, of business conditions, and the numerous other factors which bear on the financial markets. We do this work by means of a news bulletin service, a direct correspondence system, weekly reviews of conditions, special analyses of different properties, quotation and valuation records, etc.; these being regularly mailed to all subscribers.

Our Organization. "*Moody's Investors Service*" has some feeble imitators, but it is the only efficient organization of its type in this country. Among its clients are included the largest banks, trust companies, insurance companies, and other investing institutions in the country, besides several thousand individual investors, trustees of estates, etc. It also does a large business in expert investigating work and is frequently retained by notable banking interests for such work. The organization embraces a corps of experts and analysts, headed by Mr. Moody. Mr. Moody has had an unusually wide experience in these fields, having entered the statistical field seventeen years ago, prior to which he had ten years' practical banking experience with Messrs. Spencer Trask & Company. Within the past year we have prepared special reports and analyses on over $300,000,000 of securities.

Note: "Average Income available" is the average net income available per mile for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

Comment: During the year ended June 30, 1916, the Alabama Great Southern Railway reported a very sharp improvement in its freight density, and also increased its average freight train load to a new high figure. The train mile earnings were better than ever before, and reached a figure which reflects substantial prosperity for the company. It will be noted that the proportion of high grade freight during the year equaled nearly 40% of the total business done.

Profit and Loss Account, year ended June 30, 1916: Credit balance, July 1, 1916, $2,930,705; credit balance transferred from income, $1,067,133; delayed income credits, $33,236; unrefundable overcharges, $165; miscellaneous credits, $7,634; total, $4,038,873. Contra: Dividend appropriations of surplus, $391,500; miscellaneous debits, $3,320; credit balance carried to balance sheet, $3,644,053; total, $4,038,873.

Comment: Gross revenues on this property in 1916, even exceeded those of 1913, while the net operating revenues were more than 50% higher than those of the previous year. The total net income available for charges was more than three times the fixed charge requirements, and the surplus finally carried forward exceeded 43% on the preferred and nearly 16% on the common stock. The increased dividends paid during the year were therefore fully justified.

Comment: There was a considerable increase in the outstanding funded debt of the Alabama Great Southern Railway during the year ended June 30, 1916, but as measured on the mileage basis there was a slight decrease. While the net capitalization per mile appears high, yet the net income on net capital has continued to grow, and in the year just closed was equal to about 12.2% which is far higher than the average for the decade.

Comment: During the year ended June 30, 1916, the freight density on the Georgia Southern & Florida property rose to much better figures, and was higher than in any year during the decade except in 1913. The average freight train load was moved up to a new high total, and the train mile earnings were also better than for many years past. The freight tonnage of the road was as usual widely diversified.

Profit and Loss Account, year ended June 30, 1916: Credit balance, June 30, 1915, $1,517,283; credit balance transferred from income, $131,386; profit on road and equipment sold, $2,214; unrefundable overcharges, $80; donations, $2,008; miscellaneous credits, $220; total, $1,653,191. Contra: Dividend appropriations of surplus, $44,200; surplus appropriated for investment in physical property, $575; loss on retired road and equipment, $19,526; miscellaneous debits, $24,699; credit balance carried to balance sheet, $1,564,191; total, $1,653,191.

Comment: Gross revenues on the Georgia Southern & Florida during the year ended June 30, 1916, were much better than in 1915, while the net revenues reached the best figures of the decade. The balance available for charges was very high and enabled the company to report a final surplus which exceeded that of any year since 1911. Results on the property since the close of the fiscal year have continued to be very favorable indeed.

Note: This small property has not shown any improvement in earning power in recent years, and the deficit after deducting charges has tended to be very heavy. It is doubtless of traffic value to the Georgia Southern & Florida, but as an investment has not proven very satisfactory. The position of the outstanding bonds, however, is assured by the guaranty.

Bonded Debt: (1) $586,000 Hawkinsville & Florida Southern Ry. first 5s; in Series A and B, of which Series A are dated April 1, 1902, and Series B, Aug. 1, 1913; due April 1, 1952; int. paid at Union Savings Bank & Trust Co., Cinn. Coupon. $1,000. First lien on all mileage owned, consisting of line from Hawkinsville to Camella. Of those outstanding, $571,000 are guar. prin, and int. by Georgia Southern & Florida Ry. Interest paid without deduction for normal income tax. Rating, Baa.

Capital Stock: Auth. and issued, $100,000; par $100. All owned by Georgia Southern & Florida Ry.

MOBILE & OHIO RAILROAD COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated under Alabama laws, Feb. 3, 1848; main line completed in 1861. The division from Montgomery, Ala., to Columbus, Miss., was opened in 1898. In 1903, the Mobile & Bay Shore Ry. was acquired. In 1913, the company acquired the St. Louis & Cairo R.R., which had been operated under lease. The Warrior Southern Ry. is controlled by ownership of both its stock and bonds. Also controls the Mobile Docks Co. and is jointly interested with the Southern Ry. in the Gulf Terminal Co.

Location: The directly operated lines of the Mobile & Ohio consist of 1,122.48 miles, as follows: Main line, Mobile, Ala., to East St. Louis, Ill., 641 miles; Artesia, Miss., to Montgomery, Ala., 181.18 miles; Mobile & Bay Shore branch, 38.36 miles; smaller branches owned, 59.23 miles; Warrior Southern line, 13.60 miles; trackage rights, 189.12 miles. Mileage mainly in Mississippi, Alabama, Tennessee and Illinois. Population of these States in 1890, 8,396,486; in 1900, 10,222,133; in 1910, 11,758,587.

Control: The Southern Railway owns $5,670,200 out of $7,730,000 stock of the Mobile & Ohio R.R., and has issued its own stock certificates, par for par, against this stock, 4% per annum being paid on these certificates.

Comment: During the year ended June 30, 1916, there was substantial recovery in the freight density of the Mobile & Ohio Railroad, and the freight train load rose very rapidly. Train mile earnings were also better than in any previous year. The tonnage of the company was as usual very widely diversified and the amount of tonnage transported also underwent a substantial increase.

Note: Fixed charges in 1916 included joint facility rents, $558,573; interest on bonds, notes, etc., $1,386,103; interest on equipment notes, $134,638.

Profit and Loss Account, year ended June 30, 1916: Credit balance on June 30, 1915, $5,191,466; credit balance transferred from income account, $847,739; donations, $5,259; miscellaneous credits, $47,546; total, $6,092,010. Contra: Dividend appropriations of surplus, $240,672; surplus appropriated for investment in physical property, $7,881; loss on retired road and equipment, $3,187; delayed income debits, $2,224; miscellaneous debits, $15,194; credit balance carried to Balance Sheet, $5,822,852; total $6,092,010.

Comment: Gross revenues on this property during the year ended June 30, 1916, were substantially better than in 1915, while the net operating revenues rose to the best figures of recent years. As outside income also underwent substantial improvement the balance available for charges was higher than in any recent years. The surplus carried forward fully covered the dividend requirements, and enabled the company to report a substantial balance.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

Yard tracks and sidings, June 30, 1916, 104.64 miles. Main line and second track are laid with 75-lb. steel rails; balance with 75-lb. and 60-lb. rails.

Comment: This property has recently come under the control of the Southern Railway, but for the year ended June 30, 1916, was operated independently of that company. The passenger and freight density both underwent improvement during the year, while the freight train load rose to a new high total. Train mile earnings were also better than at any previous time, and are now ranging far higher than at any time in the decade, the proportion of high grade freight representing nearly one-third of the total during the year recently closed.

Profit and Loss Account for year ending June 30, 1916 shows credit balance on June 30, 1915, $1.351,263; credit balance transferred from income, $683,354; unrefundable overcharges, $1,275; donations, $739; miscellaneous credits, $3,763; total, $2,040,394. Contra: Dividend appropriations of surplus, $60,000; surplus appropriated for investment in physical property, $739; debt discount extinguished through surplus, $6,066; loss on retired road and equipment, $37,267; miscellaneous debits, $845; credit balance carried to balance sheet, $1,935,477; total, $2,040,394.

Comment: Gross revenues underwent substantial improvement on the New Orleans and North Eastern during the year ended June 30, 1916. The total income avilable for charges was more than double the fixed charge requirements, and enabled the company to report 11.4% earned on the outstanding stock as compared with less than 3½% during the previous year.

Note: In the dividend record shown above, the rate is that paid out of the earnings of the prior year. Thus, although the company disbursed 6½% on its stock in the fiscal year 1911, this amount was really taken out of the earnings of 1910; that paid out of the 1911 income was 5%, disbursed in September, 1912. The 5% dividend charged against 1913 was disbursed in September of that year. Working assets in 1916 included cash, $1,930,357.

Comment: There was a slight increase in the outstanding funded debt of the New Orleans & North Eastern property during the year ended June 30, 1916. As measured on the mileage basis the property is heavily capitalized, but the earning power has always been substantial and for the year just closed, the net income on net capital exceeded 9%. Under present conditions it would seem that a return to the former substantial dividend rates is now justified.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

VIRGINIA & SOUTHWESTERN RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years.
For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated under Virginia laws, Jan. 19, 1899, as a consolidation of the Bristol, Elizabethton & North Carolina Ry., and the South Atlantic & Ohio Ry. In April, 1908, acquired the Holston River R.R., and the Black Mountain Ry. The company leases a line from Bull's Gap to Rogersville, Tenn., from the Southern Ry.

Location: The directly operated lines of the Virginia Southwestern Ry. consisted on June 30, 1916, of 225.14 miles as follows: Lines owned, Mountain City, Tenn., to St. Charles, Va., 151.30 miles, and Moccasin Gap., Va., to Persia, Tenn., 37.76 miles; lines leased, 14 miles; trackage rights, 22.08 miles.

Control: The Southern Railway acquired all the capital stock of this company on May 1, 1906, from the Virginia Iron, Coal & Coke Co. Lease: Effective July 1, 1916, the Southern Ry. began to operate the property under lease as the Appalachia division of the middle district. Lease is for one year and thereafter for periods of one year until terminated. Lessee is to maintain and operate property, paying as rental all taxes and interest charges.

Management: OFFICERS: Fairfax Harrison, Pres.; H. W. Miller, Vice-Pres.; J. M. Culp, Vice-Pres.; H. B. Spencer, Vice-Pres.; E. H. Coapman, Vice-Pres. and General Manager; F. S. Wynn, Secretary; H. C. Yard tracks and sidings, 95 miles. * 10-year average.

Comment: During the year ended June 30, 1916, there was a sharp increase in the freight density on the Virginia & Southwestern Railway, and the average freight train load was also moved up to a new high figure. Train mile earnings were substantial notwithstanding the fact that average freight rates tended to decline. As usual the company depended primarily on the transportation of soft coal for its tonnage.

The volume of business has shown a progressive increase ever since it came under the control of the Southern Railway in 1909. It will be noted that the total tonnage last year was nearly twice that reported in 1910. The tendency has been toward a steady improvement in the amount of coal carried each year, and a falling off in the amount of tonnage and other items. Freight rates are apparently profitable, as is indicated by the growth of train mile earnings.

Note: Above table is based on average mileage directly operated for each year. Margin of safety is the proportion of surplus left over after providing for all fixed charges. For example, in 1916 the "balance for charges" (per mile) was $2,854; fixed charges consumed 65% of this, or $1,862 per mile, leaving $992, a "margin of safety" of 35%.

Note: Fixed charges in 1915 included $350,000 as interest on bonds, $53,920 as interest on equipment notes, $46,864 as rentals, misc. charges, $1,977.

Profit and Loss Account, year ended June 30, 1916: Credit balance at beginning of year, $656,379; credit balance transferred from income, $229,089; donations, $1,067; miscellaneous credits, $1,958; total, $888,493. Contra: Dividend appropriations of surplus, $200,000; surplus appropriated for investment in physical property, $1,067; loss on retired road and equipment, $830; delayed income debits, $5,147; miscellaneous debits, $1,449; credit balance carried to balance sheet, $680,000; total, $888,493.

Comment: Both gross and net revenues underwent substantial improvement on this property during the year ended June 30, 1916. There was a tendency toward lower fixed charges, and therefore the final balance carried forward was more than double that of the previous year. The property is now directly operated by the Southern Ry. under lease as part of the main system.

Comment: There were practically no changes in the capitalization exhibit in the Virginia & Southwestern Railway during the year ended June 30, 1916. In view of its volume of business the net capitalization is really not high, although it ranges at far higher figures than it did ten years ago. Net income on net capital equals 7½%.

Comment: While this company has shown a considerable improvement in its freight density and train load during the past few years, yet the average train mile earnings have ranged at low figures. Freight rates are today very much lower than ten years ago, and there seems little prospect of improvement. A large proportion of the company's business is represented by products of mines, but the hauls are short and therefore the margin of profit apparently is not heavy.

This property has never been a success and there does not appear to be much possibility of developing enough volume of tonnage to make it really profitable. Possibly, with a radical scaling down of capital, and far lower fixed charges, it might develop into a moderately successful enterprise.

Profit and Loss Account, year ended June 30, 1916: Donations, $6.809; miscellaneous credits, $98; debit balance carried to Balance Sheet, $4,985,013; total, $4.991.920. Contra: Debit balance at beginning of year, $4.468.380; debit balance transferred from income. $512,248; surplus appropriated for investment in physical property, $7,172; loss on retired road and equipment, $3,841; miscellaneous debits, $279; total, $4,991,920.

Comment: Gross and net revenues on this property improved substantially during the year ended June 30, 1916, but still continue to range far below the figures of half a dozen years ago. Fixed charges are unusually heavy, and in the past eight years the company has at no time reported a surplus above its fixed charges. The position of the bonds on this property therefore are purely speculative.

Comment: This heavily capitalized property reported no change of importance in capitalization in 1916. In view of its light earning power the capitalization is very high, and it will be noted in recent years there has been no tendency toward reduction. The property has been reporting each year a larger profit and loss deficit, and at the present time appears to be in a completely insolvent condition.

TERMINAL RAILROAD ASSOCIATION OF ST. LOUIS

Origin: Incorporated under the laws of Missouri in July, 1889, as a consolidation of the Terminal Railroad of St. Louis and the Union Railway & Transit Company. The Association is a corporation jointly controlled by fifteen railroad companies which have their terminals in St. Louis, and include the C. C. C. & St. Louis, Louisville & Nashville, Wabash, Missouri Pacific, Baltimore & Ohio, St. Louis & San Francisco, Rock Island, Chicago & Alton, C. B. & Q., M. K. & T., Southern Ry., Illinois Central R.R., Vandalia, St. Louis, L. M. & S., St. Louis Southwestern. These fifteen companies agree, under contract, to use the property forever, and pay as tolls all interest, taxes, rentals, and other charges, each line contributing its proportion to the extent of 1-15, to make up any possible deficiency. The company controls, in addition to its trackage in and about St. Louis, all the properties of the Union Depot Co., of St. Louis, together with those in East St. Louis held under lease by the St. Louis Bridge Co. Under contract, the tenant lines use the St. Louis passenger station, paying as rental 5% per annum on the original cost, and cost of additions and betterments and all expenses of maintenance and operation. In 1902, the East St. Louis & Carondelet Ry. was leased, and the St. Louis Belt & Terminal Ry. was acquired by purchase. The Terminal Association also leases the St. Louis Bridge Co., and owns all the capital stock of the St. Louis Merchants' Bridge Terminal Ry., the Interstate Car Transfer Co., and the Wiggins Ferry Co.

Location: Mileage operated in and about St. Louis consists of 55 miles of main track, with 113.57 miles of second tracks and sidings. Equipment owned: Locomotives, 109; passenger cars, 10; service cars, 151.

Management: OFFICERS: Julius S. Walsh, Chairman of Board; W. S. McChesney, Pres.; C. A. Vinnedge, Secy. and Aud.; F. C. Daab, Treas.; I. L. Burlingame, Gen. Mgr., St. Louis, Mo. DIRECTORS: C. E. Profit and Loss Account, year ended June 30, 1916: Credit balance June 30, 1915, $4,883,388; credit balance transferred from income, $532,702; miscellaneous credits, $192; total, $5,416,282. Contra: Loss on retired road and equipment, $14,942; miscellaneous debits, $1,143; credit balance carried to balance sheet, $5,400,197; total, $5,416,282.

Comment: This property is both a leasing company and an operating company. It will be noted that the gross and net operating revenues in recent years have been maintained at a substantial level, and in 1916 were better than at any time during the past nine years. Income from rentals and other sources in 1916 was above the average for the decade.

Comment: The Terminal Railroad Association property has in the past few years shown only slight changes in its capitalization figures. The capitalization is extremely heavy as measured on a mileage basis, but the revenues on the property are also large and in 1916 the net income on net capital was above the average during the past decade. The position and credit of the property is strong for the reason that practically all the outstanding bond issues are protected by strong guaranties, and the sources of income are very stable.

Yard track and sidings, June 30, 1916, 33.84 miles.

Comment: During the year ended June 30, 1916, the Texas Midland R.R. reported a moderate improvement in its freight density in train load. It will be noted, however, that during the past ten years, there has been no real expansion of business on this property, and although the average freight and passenger rates are high, the train mile earnings have not moved up radically. The tonnage of the road is well diversified, and the amount of business transported has recently substantially improved.

* Deficit.

Note: Above table is based on average mileage directly operated for each year. Margin of safety is the proportion of surplus left over after deducting all fixed charges. Since 1907 the Texas Midland has never shown a surplus above fixed charges, and therefore has no "margin of safety."

Comment: Gross and net revenues underwent a moderate improvement on the Texas Midland Railroad during the year ended June 30, 1916. The surplus available for charges, however, while better than in 1915, was considerable below that reported in earlier years and the company therefore once more was obliged to report a final deficit. There does not seem to be much possibility of this property developing sufficient new earning power to place it substantially on its feet.

Note: The above table is based on the average mileage directly operated.

Comment: While the Texas Midland Railroad is lightly capitalized as measured on the mileage basis, yet the earning power is also very light, and in recent years there has been no distinct improvement. The company does not appear to be in a very strong financial condition as it has been unable to accumulate any surplus.

THE TEXAS & PACIFIC RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated March 3, 1871, under United States and Texas laws. The company acquired the Memphis, El Paso & Pacific R.R., the Southern Pacific of Texas Ry., and the Southern Transcontinental Ry. In 1881, the New Orleans Pacific Ry. was acquired. The company now also controls the Denison & Pacific Suburban Ry. and the Weatherford, Mineral Wells & Northwestern Ry. On April 1, 1915, the Opelousas, Gulf and Northwestern Railway was directly merged.

Location: The directly operated lines of the company consist of 1,944.07 miles, as follows: Main lines, New Orleans to Shreveport, Texarkana to Fort Worth, Fort Worth to El Paso, Reisor to Marshall; branches, including Port Allen to Ferriday, La., Cyprus to Shreveport, etc., 1,851.92; trackage rights, 92.15 miles. Mileage mainly in Texas and Louisiana. Population of these States in 1890; 3,344,110; in 1900, 4,430,335; in 1910, 5,521,930.

Affiliations: Of the total outstanding stock ($38,763,810), the Missouri Pacific Ry. owns $6,525,000 and the St. Louis, Iron Mountain & Southern Ry. $30,000. Further, the Second consolidated income 5s of the Texas Pacific (see Table D) have nearly all been exchanged for St. Louis, Iron Mountain & Southern refunding 4s at 65% of their par value.

Receivership: J. L. Lancaster and Pearl Wight were appointed receivers of the company by Judge Foster in the U. S. District Court at Shreveport, La., in Oct., 1916, on application of B. F. Bush, receiver of the St. Louis, Iron Mountain & Southern Ry. for an unpaid judgment against the company. For details as to reorganization, etc., consult our Investors Service.

Yard tracks and sidings, 625 miles.

Comment: A substantial improvement was shown in the freight density and train load of the Texas & Pacific Railroad during the year ended June 30, 1916. There was no change of importance in the freight or passenger rates, but there was considerable improvement in train mile earnings. As usual the freight tonnage was widely diversified and in 1916 the proportion of high grade freight was larger than has been the case in recent years.

Securities Owned, at book value, on June 30, 1916, amounted to $1,969,191. Working assets in 1916 included $791,490 in cash.

Comment: There were practically no financial changes on the Texas & Pacific during the year ended June 30, 1916. As measured on the mileage basis, the capitalization today is lower than in earlier years, and in 1916, the net income on net capital was higher than at any time during the past decade. The company during the year was able to eliminate its former profit and loss deficit, and reported a considerable surplus.

Contra: Miscellaneous credits, $23,-317; debit balance carried to Balance Sheet, $862,426; total, $885,743.

Comment: Gross revenues improved moderately while net operating revenues underwent much expansion on the Toledo, Peoria & Western road in the year 1916. Outside income was also better than usual and therefore the company's net income available for charges reached the best figure reported in some years past. Fixed charges, however, continued high, and the company was obliged to report a further profit and loss deficit.

Comment: The only change in the financial statement of this property for the year ended June 30, 1915, was a moderate increase in the total funded debt. While the property is not very heavily capitalized as measured on a mileage basis, yet the earning power is very poor and in recent years the net income on net capital has been declining to nominal figures.

Diversified Investing

Price of the Book, $2.00 per copy net

This subject is fully covered in a small volume entitled "*How to Invest Money Wisely*," by John Moody, which we have recently published. For many years Mr. Moody has made a careful study of this subject in connection with his work as an analyst and adviser for bankers, financial institutions and investors, both at home and abroad. These principles for wisely and intelligently diversifying investment capital have been adopted within the past few years by numerous institutions and several thousand individual investors with satisfaction and profit.

Comment: During the fiscal year ended June 30, 1916, the Toledo, St. Louis & Western reported a substantial improvement in its train load but the freight density rose to a new high figure. The company's passenger business was also better than for many years past and although passenger rates feel sharply, the train mile earnings were marked up to a new high figure. The company's freight business is well diversified and the proportion of high-grade freight is now much larger than formerly.

Profit and Loss Account, year ended June 30, 1916: Credits, credit balance July 1, 1915, $2,213,628; credit balance transferred from income, $309,169; donations, $10; miscellaneous credits, $28,578; total, $2,551,385. Contra: debit discount extinguished through surplus, $85; loss on retired road and equipment, $17,597; miscellaneous debits, $4,060; credit balance carried to balance sheet, $2,529,643; total, $2,551,385.

Comment: Both gross and net revenues underwent a very sharp advance in the Toledo, St. Louis & Western property during the year 1916. The net operating revenues were nearly twice those of the previous year and as fixed charges increased only moderately, the company was able to report a very substantial surplus as compared with a heavy deficit in 1915. Although the company is still in receivers' hands, it will be noted that there has been a very substantial improvement in its position.

Comment: The Toledo, St. Louis & Western property is heavily capitalized as measured on the mileage basis and during the recent years there has been little tendency toward improvement in the net income on net capital. In 1916, however, the exhibit made was an unusually favorable one. It is expected that when reorganized, the fixed charge requirements of the property will be radically reduced.

Comment: For the year ended June 30, 1916, the Chicago & Alton property reported a very substantial improvement in its freight density and the average nearly reached the high figures of 1913. Train load and train mile earnings were also better than usual, while freight and passenger rates were maintained near the recent averages. The company as usual reported a wide diversification of its freight tonnage.

Note: Fixed charges, as shown above, include hire of equipment, interest and rentals, and discount on securities. The dividend item in 1912 income account is the 4% payment from profit and loss on the small issue of prior lien and participating stock, of which there is $868,700 outstanding. In 1916, rental guarantees amounted to $366,056; interest on bonds, $3,244,743; facility rents, $391,208; hire of equipment, $447,822.

Profit and Loss Account, year ended June 30, 1916: Profit on road and equipment sold, $78,649; delayed income credits, $19.805; unrefundable overcharges, $4,044; donations, $85,171; miscellaneous credits, $24,239; debit balance carried to Balancc Sheet, $8,094,027; total, $8,305,935. Contra: Debit balance at beginning of year, $7,674,340; debit balance from income account, $171,578; surplus appropriated for property, $142,091; debit discount, $728; loss on retired road and equipment, $199,352; delayed income debits, $108,293; miscellaneous debits, $9,552; total, $8,305,935.

Comment: The best gross revenues ever reported were shown by the Chicago & Alton property during thc year ended June 30, 1916. The net revenues were also better than during any ycar since 1910 and as outside income also increased, the company was able to show surplus profits almost equal to the heavy fixed charges.

No progress has been made in the reorganization of this property but as the controlling interests are continuing to advance funds for the payment of current obligations, the securities still remain on a fairly substantial basis.

Note: In above balance sheet the guaranteed capital stocks of subsidiaries as well as that of the main company are included. In bonded debt the obligations of subsidiaries are not includcd. The main increase of funded debt in 1913 was causcd by the issue of new general mortgage 6s. This issue amounted to $11,880,000 and was partly used to replace short term notes, equipment trusts, and floating debt. In 1914, further general mortgage 6s were issued.

Comment: The Chicago & Alton property is very heavily capitalized and bonded debt during recent years has shown a steady advance. It will be noted that net income on net capital is very low as compared with requirements and if it were not for the fact that the finances of the company have been taken care of by the Union Pacific interests, the company would long ago have gone into bankruptcy. As matters stand, it is apparently the intention of the management to try to work the property back to a sound financial basis.

Note: "Average income available" is the average net income per mile available for interest charges after deducting taxes for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

It will be noted that after providing for dividends on the preferred stock, the surplus carried forward was equal to over 14% on the common stock.

Diversified Investing

Price of the Book, $2.00 per copy net

This subject is fully covered in a small volume entitled "*How to Invest Money Wisely*," by John Moody, which we have recently published. For many years Mr. Moody has made a careful study of this subject in connection with his work as an analyst and adviser for bankers, financial institutions and investors, both at home and abroad. These principles for wisely and intelligently diversifying investment capital have been adopted within the past few years by numerous institutions and several thousand individual investors with satisfaction and profit.

Comment: The Tonopah & Goldfield Railroad is very lightly capitalized as measured on a mileage basis, and it will be noted that the bonded debt outstanding now represents only about 12% of the total capitalization. The bonds have been steadily retired through sinking fund payments and in the course of another year the issue will be completely retired.

Comment: During the fiscal year ended June 30, 1916, the Ulster & Delaware reported a considerable decline in its volume of passenger and freight business and the average freight train load fell to relatively low figures. There was, however, substantial improvement in the train mile earnings, which improvement was partly due to an increase in average freight rates. As usual about two-thirds of the company's freight business was represented by mining products.

Profit and Loss Account, year ended June 30, 1916: Credit balance, June 30, 1915, $799,552; credit from income account, $93,690; miscellaneous credits, $100. Contra: Loss on retired road and equipment, $4,312; delayed income debits and miscellaneous debits, $193; credit balance carried to balance sheet, $888,837.

Comment: Gross revenues fell off on the Ulster & Delaware Railroad in 1916 to a moderate extent, but as operating costs were sharply reduced, the net revenues were far in excess of those of the previous year. There was a slight further decrease in fixed charges and therefore the company succeeded in reporting a surplus of an important amount as compared with a serious deficit during 1915. Dividends were paid during the year at the rate of 3% on the outstanding stock.

Comment: There were no capitalization changes in the Ulster & Delaware property for the year ended June 30, 1916. The property is really not heavily capitalized, and during the past ten years has been able to show an average of about 6% net income on net capital. The company appears to be in a substantial credit position.

UNION PACIFIC RAILROAD COMPANY

Note: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated under laws of Utah, July 1, 1897, as successor by reorganization of the Union Pacific Railway Company. Under this reorganization the Oregon Short Line and the Oregon Railway & Navigation Co., were independently reorganized, but in 1899 their control was acquired by the new company. In February, 1901, the Union Pacific acquired $75,000,000 common stock of the Southern Pacific, giving it virtual control. The holdings were later still further added to, until at the end of 1912 the Union Pacific (through the Oregon Short Line) owned over $126,650,000 Southern Pacific stock, out of a total of $272,672,405. Still other lines were acquired or constructed from time to time.

Location: On June 30, 1916, the directly operated lines consisted of 7,934.08 miles, as follows: Lines owned by Union Pacific R.R. Co., 3,551.32 miles; lines owned by Oregon Short Line R.R. Co., 2,073.73 miles; lines owned by Oregon-Washington R.R. & Navigation Co., 1,857.43 miles; lines operated under leases from companies whose entire capital stock is owned by Union Pacific R.R. Co., 122.65 miles; other leased lines of 9.54 miles; lines owned jointly with other companies, 78.69 miles; lines operated under trackage rights, 240.72 miles. The Oregon-Washington Railroad & Navigation Co. conducts water transportation service over a distance of 187 miles. Mileage mainly in States of Nebraska, Kansas, Colorado, Wyoming, Idaho, Oregon and Washington. Population of these States in 1890, 3,713,451; in 1900, 4,262,437; in 1910, 5,968,501.

Interests in Other Companies: Aside from its interest in "proprietary, affiliated, and controlled companies," the Union Pacific R.R. owns $13,800,000 and the Oregon Short Line R.R. $8,700,000 stock of Illinois Central R.R. and through the Railroad Securities Co. controls $8,000,00 more Illinois Central stock. Also owns $10,343,100 preferred stock and $8,417,000 6% bonds of Chicago & Alton R.R., while Oregon Short Line owns $4,018,700 Chicago & North Western common stock, $1,845,000 Chicago, Milwaukee & St. Paul preferred stock and $20,000,000 New York Central stock.

Separation of Union Pacific and Southern Pacific: Under the decree of the United States Supreme Court in Dec., 1912, the Union Pacific R.R. was obliged to dispose of its stock interest in the Southern Pacific. This was done partly by an exchange with the Pennsylvania R.R. for the stock holdings of the Baltimore & Ohio of the latter, and partly through a subscription offer, as outlined below.

$38,292,400 of the Southern Pacific Co. stock was on July 16, 1913, exchanged for the entire holdings of $42,547,200 Baltimore & Ohio stock (one-half preferred) owned by the Pennsylvania Railroad and subsidiaries. The remaining $88,357,600 Southern Pacific stock formerly owned has been deposited with Central Trust Co., of New York, as trustee, which has issued certificates of interest in the stock. Certificate holders will have no voting rights and will receive no dividends until they exercise the optionto convert their certificates into Southern Pacific Co. stock, after first making affidavit to the effect that the applicant owns no Union Pacific stock and is not acting for any stockholder thereof or in concert, agreement, or understanding with any one seeking to control the Southern Pacific

Co. in the interest of the Union Pacific. The Southern Pacific stock is to be voted by the trustee only under direction of the Court. If by Jan. 1, 1916, any certificates of interest remain outstanding, the Court may direct the trustee to sell the stock represented thereby and pay the proceeds to the lawful holders. Union Pacific stockholders in 1913, under an offer, which was underwritten, subscribed for $84,426,700 of said $88,357,600 certificates of interest at 92.

Distribution of Baltimore & Ohio Stock: On Jan. 8, 1914, the directors of the company voted to distribute to the common stockholders on April 1, 1914, 12% in Baltimore & Ohio preferred and 22% in Baltimore & Ohio common, then held in the treasury, and also $3 per share in cash; and at the same time to reduce the dividend on the common stock from 10% to 8% per annum. These dividends in Baltimore & Ohio stock called for $25,996,248 preferred and $48,746,925 common of the Baltimore & Ohio, thus disposing of all the Union Pacific's stock interest in that property, except $3,594,035 common and $1,805,992 preferred stock. The final distribution was made in July, 1914.

Comment: A very substantial improvement occurred in the freight density of the Union Pacific System during the year ended June 30, 1916. There was also an important increase in both train mile earnings and average freight train load. Average freight and passenger rates both tended to decline as compared with earlier years.

Note: In above Income Account, for all years except 114, outside operations are included in gross revenues and operating expenses. "Other Income" in 1916 included interest on bonds and notes owned, $6,528,971; dividends on stocks owned, $4,331,904; other interest, $839,878; rental income, $1,208,491; hire of equipment, $220,155. Fixed charges included $13,810,313 for interest on bonds; $1,348,895 for rentals; $179,038 for other charges.

Profit and Loss Account, year ended June 30, 1916: Credit balance June 30, 1915, $96.962.242; credit balance transferred from income account, $13,487,950; net profit from sale of Southern Pacific Co. stock, $16,099,-190; proceeds from sale of bonds of Union Pacific Coal Co. to its sinking fund, $210,000; difference between proceeds of sale of property and book value thereof, $12,153; liabilities written off, being unclassed, $57,909; miscellaneous credits, $5,471; total, $126,825,915. Contra: Loss on retired road and equipment, $117,267; cost of surveys of projected lines not constructed, $47,205; difference between investment in the Oreg. & Wash. R.R. Co. and appraised value of lands owned by said company, $2,150,000; loss arising from liquidation of Occidental & Oriental S.S. Co., $310,199; uncollectible account, $8,191; adjustment in accounts, $5,548; miscellaneous debits, $10,695; credit balance carried to balance sheet, $124,176,810; total, $126,825,915.

Comment: Gross and net revenues of the Union Pacific for the fiscal year ended June 30, 1916, were far in excess of any ever reported before. The surplus available for fixed charges was more than $10,000,000 larger than during the previous year and after payment of all charges and preferred dividends, the final surplus left over was equal to over 16 1-3% on the outstanding capital stock. Results since the close of the fiscal year have continued to show moderate improvement.

Note: The securities owned by Union Pacific on June 30, 1916, amounted to $241,311,088 of which $60,140,700 were pledged and balance unpledged. See details on next page.

Comment: There were practically no changes in the financial statement of the Union Pacific System for the year ended June 30, 1916. As measured on a mileage basis there has been a tendency toward a moderate increase in net capitalization during the past ten years, but it will be noted that the net income on net capital has continuously ranged at high figures. During the year just closed this net income was equal to 12½%.

Note: "Average income available is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation see "Introduction." For Key to Bond Ratings, see pages 19 to 21.

Note: Fixed charges, in 1914 and 1915, included interest, rentals and miscellaneous deductions.

Comment: The gross revenues of this property were the best ever recorded, while there was also a very sharp improvement in the total net revenues. As fixed charges underwent practically no change, the surplus carried forward was a very heavy one, and equaled over 5% on the outstanding capital stock. Since the close of the fiscal year the operating revenues have continued to improve.

Comment: There were practically no capitalization changes on this property during the year 1916. As measured on the mileage basis, the net capitalization of the property is high and it has tended still higher in recent years, but the net income on net capital has steadily advanced, and it will be noted now ranges at the best figures in the history of the company.

REFERENCE NOTE ON BOND ISSUE

1. Auth., $70,000,000; outstanding, $57,053,000. Dated July 1, 1911; due July 1, 1961. Int. paid at Guaranty Trust Co., New York. Coupon and reg., $1,000. Callable at 105 and interest on 90 days' notice. Of those outstanding, $28,526,000 (one-half the issue) are owned by Oregon Short Line R.R. Covers by direct lien entire property, consisting of 1,009 miles, being a first lien on all but 279.81 miles. On the latter, the Oregon Short Line 5s of 1946 are a first lien, the Oregon Short Line A and B incomes are second and third lien respectively. The latter bonds are nearly all retired, so that practically this issue is a second lien on this section of the line. The total mileage covered is as follows: Los Angeles to Salt Lake City, 681.14 miles; Sandy to Lynn, Utah, 120.68 miles; Lehi Junc. to Boulder, Utah, 43.48 miles; East San Pedro to Los Angeles, 27.11 miles; Milford to Newhouse, Utah, 23.37 miles; Los Angeles to Millard Canyon, 14.31 miles; Tintic branch, 11.51 miles; Caliente to Pioche, Nev., 32.72 miles; Moapa to St. Thomas, Nev., 21.64 miles; Glendale Junc. to Verdugo, Cal., 7.11 miles; short branches, 25.35 miles. The sections covered by the Oregon Short Line mortgages as prior liens (included in above) include 226.07 miles, from Sandy to Frisco, Utah, the Tintic branch, and other short spurs in Utah. Interest paid without deduction for normal income tax.

Capital Stock: Auth. and issued, $25,000,000; par $100. All but 12 shares owned by Oregon Short Line R.R. TRANSFER AGENT: W. H. Comstock, Sec., Los Angeles, Cal.

THE ST. JOSEPH & GRAND ISLAND RAILROAD COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated Feb. 23, 1897, under laws of Kansas and Nebraska, as successor to the St. Joseph & Grand Island Railroad. The company owns a half-interest in the St. Joseph Terminal R.R. and a one-tenth interest in the St. Joseph Union Depot Co.

Location: The operated lines of the St. Joseph & Grand Island Railroad consist of 257.93 miles, as follows: St. Joseph, Mo., to Grand Island, Neb., 251.14 miles; Stouts to Highland, Kansas, 6.79 miles. Population of Kansas and Nebraska in 1890, 2,486,006; in 1900, 2,536,995; in 1910, 2.883,163.

Control: The Union Pacific Railroad Company owns $1,558,850 out of $5,499,400 first preferred, $3,309,079 out of $3,500,000 second preferred, and $4,239,700 out of $4,600,000 common stock of the St. Joseph & Grand Island Railroad. In December, 1910, a committee was organized to protect the interests of the first and second preferred stocks, and on Nov. 6, 1911, suit was filed by this committee against the Union Pacific Railroad. Extensive litigation has followed and a decision was rendered May 27, 1914, by the United States District Court for the District of Nebraska, holding that the Union Pacific R.R. Co. and this company were competitors for interstate traffic amounting to some $48,000 in annual revenue to this company and some $18,000 in annual revenue to the Union Pacific R.R. Co.; that, although the whole amount of this traffic carried by both roads was less than one-tenth of 1% of the total revenue of the Union Pacific R.R. Co. and was only 3.88% of the total revenue of this company, it constituted a substantial amount of traffic subject to competition; and that, therefore, the ownership by the Union Pacific R.R. Co. of a majority of the capital stock of this company constituted a violation of the Federal anti-trust law. The decree of the court enjoined the voting of said stock by the Union Pacific Railroad Company, and the exercise of any control, direction or supervision by it over the affairs of this company; enjoined this company from making any further expend-

itures for the reconstruction of that portion of its line lying between Upland, Kan., and Hastings, Neb., or acquiring by purchase or lease the railroad of the Hastings & Northwestern Ry. Co., extending from Hastings to Gibbon, Neb., except upon authority of a board of directors chosen by stockholders other than the Union Pacific R.R. Co., and provided that unless within sixty days from the entry of the decree the management and control of this company should be surrendered to a board of directors chosen by stockholders other than the Union Pacific R.R. Co., a receiver of this company and of all its property and franchises would be appointed by the court. An appeal from this decree to the United States Circuit Court of Appeals was taken both by this company and by the Union Pacific R.R. Co. and the decree was superseded and its enforcement stayed pending the appeal. The appeal has been perfected and was set for argument in the Court of Appeals in January, 1915. In July, 1915, the decision was reversed and further litigation by minority stockholders has been discontinued.

Yard tracks and sidings, 57 miles on June 30, 1916.

Comment: During the year ended June 30, 1916, the operating exhibit of the St. Joseph & Grand Island Railroad underwent remarkable improvement. The freight density was nearly 60% higher than that of the previous year and the passenger density also improved. Average freight train loads rose to a figure which indicated a heavy business, while the train mile earnings, also increased a very profitable basis. The company's tonnage was widely diversified, and improved in practically all departments.

* Surplus.

Fixed charges, as shown above, include rentals, interest, hire of equipment, etc.

Profit and Loss Account, year ended June 30, 1916: Credit balance at beginning of year, $436,097; credit balance from income account, $199,679; unrefundable overcharges, $688; miscellaneous credits, $569; total, $637,033. Contra: Loss on retired road and equipment, $50,168; miscellaneous debits, $31,291; credit balance at close of year, $555,574; total, $637,033.

Comment: Both gross and net revenues underwent substantial improvement during the year ended June 30, 1916, and the surplus carried forward available for charges was far in excess of that of any recent years. The fixed charges themselves seemed to further decline with the result that a very substantial surplus was finally reported. The radical change in the conditions of this property during the past two years have greatly strengthened its credit and the outstanding bond issue is now protected by a substantial margin of safety.

Comment: There were no capitalization changes on the St. Joseph & Grand Island Railroad during the year ended June 30, 1916. The net capitalization is a heavy one, but the bonded debt represents only 23% of the total and therefore the company has found no difficulty in carrying its capitalization. During the year just closed, the net income on net capital was better than in any year since 1908.

Note: "Average income available" is the average net income available per mile for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see Introduction. For Key to Bond Ratings, see pages 19 to 21.

THE VIRGINIAN RAILWAY COMPANY

Note: The analysis is based on official documents of the company, including its annual reports of the past eight years. For Definitions and Key to Ratings, see pages 19-26.

Origin: Incorporated under laws of Virginia, Feb. 20, 1904, as the Tidewater R.R. Co., name changed as above on March 8, 1907. The property of the Deepwater Ry. Co. was acquired on April 22, 1907. Has since leased the White Oak Railway and the Piney River & Paint Creek Ry. Leases the property of the Norfolk Terminal Railway jointly with the Norfolk & Western Ry. and the Norfolk Southern R.R.

Location: The operated lines of the company on June 30, 1916, consisted of 505.25 miles, as follows: From Norfolk to Deepwater, W. Va., and branches, 471.38 miles; leased lines: Virginian Terminal Railway, 1.75 miles; White Oak Railway Co., 10.34 miles; Piney River & Paint Creek R.R., 6.69 miles; trackage rights, 15.09 miles.

Road taps the Pocahontas and New River coal fields, and forms the "shortest possible route to tidewater over the lowest grades." From Princeton, the main coal-gathering yard, 350 miles west of Sewell's Point, the eastbound grade does not exceed 0.2 of 1%, or 10½ feet per mile, except for a 9-mile section over the Allegheny Mountains, where the maximum grade is 0.6 of 1%, or 32 feet per mile; on this section a pusher will be used. One locomotive will haul 80 loaded 50-ton coal cars, or 4,000 tons of coal per train.

Management: Officers: C. W. Huntington, Chairman; Raymond DuPuy, Pres.; Geo. H. Church, Treas.; James Clarke, Sec. Directors: Raymond DuPuy, H. H. Rogers, U. H. Broughton, E. S. Marston, W. E. Benjamin, W. R. Coe, C. W. Huntington, Saml. McRoberts, G. M. Hyams, Samuel L. Fuller, John W. Sterling. Annual meeting, Saturday after fourth Tuesday in January. Main Office: Norfolk, Va. Comment: During the year ended June 30, 1916, the Virginian Railway reported a very remarkable increase in both its freight density and raised its average freight train load to the high figure of 1,578 tons. There are few railroads of any size in the United States which show such heavy tonnage as this. Although the average freight rates still continue very low, the train mile earnings have steadily climbed and in 1916 were about double those reported in 1910. As the tonnage table indicates the company's business is chiefly that of the transportation of soft coal, this tonnage representing during the year just closed over 90% of the total business done.

Note: Above table is based on average mileage directly operated for each year. Margin of safety is the proportion of surplus left over after deducting all fixed charges. For example, in 1916 the "balance for charges" was $7,092; fixed charges consumed $3,392, or 46% of this, leaving $3,700, a "margin of safety" of 54%.

Note: Fixed charges include interest on bonds, and on equipment trusts, joint rentals, etc. The reduction in fixed charges in 1913 was due to the exchange of $9,800,000 first 5s and $3,000,000 Virginian Terminal Railway 5s for preferred stock.

Current Earnings: The monthly bulletin, mailed free to each subscriber to this book, contains monthly reports of earnings since the close of the fiscal year.

Profit and Loss Account, year ended June 30, 1916: Credit balance at beginning of year, $3,590,176; credit balance transferred from income account, $1,868,254; profit on road and equipment sold, $1,019; unrefundable overcharges, $379; donations, $50,527; miscellaneous credits, $976; total, $5,511,331. Contra: Loss on retired road and equipment, $92; miscellaneous debits, $496; credit balance transferred to balance sheet, $5,510,743; total, $5,511,331.

Comment: Both gross and net revenues underwent very sharp advances on the Virginian Railway during the year ended June 30, 1916. The surplus available for fixed charges was more than double the requirement and the company reported a final balance equal to 6.7% on the outstanding stock.

Comment: There was a slight increase in the funded debt of the Virginian Railway during the fiscal year ended June 30, 1916. As measured on a mileage basis, this property is heavily capitalized, but the bonded debt represents only about 1/3 of the total capitalization, and therefore the company has no difficulty in carrying its obligations. During the past half dozen years it will be noted that the net income on net capital has tended to steadily advance.

WABASH RAILWAY COMPANY

NOTE: The analysis is based on official documents of the company, including its annual reports of the past ten years. For Definitions and Key to Ratings, see pages 19-26.

History: Incorporated under the laws of Indiana, October 2, 1915, as successor to the Wasbash Railroad, which was sold under foreclosure on July 21, 1915; the new company taking possession of the property on November 3, 1915.

Plan of Reorganization: Under the plan of reorganization of the old company, the bond issues were all left undisturbed except the First Refunding and Extension 4s, which were foreclosed. Three-year notes, due May 1, 1913, also foreclosed. The holders of the First Refunding and Extension 4s were offered 120% in Preferred Stock B; the old preferred stockholders, on payment of $30 per share, were offered 50% in new preferred stock A, and 50% in new common stock; the old common stockholders, on payment of $30 per share, were offered 50% in new preferred stock A and 45% in new common stock. The assessment not paid and the stock not taken by the old stockholders was underwritten by the holders of the First Refunding and Extension bonds, the latter being called upon to pay $684.82 per $1,000 bond, payable Oct. 8, 1915, or optionally 10% then and the remaining 90% on Jan. 8, 1916, with interest at 6%, for which each bondholder would receive, per $1,000 bond, $1,091.38 in new preferred A and $1,027.50 in new common. As very few of the stockholders paid the assessment, the bondholders received practically all the stock.

In addition to the stock issues, the new company created an issue of five-year 4% gold notes, due May 1, 1920 (pre-payment optional) and secured by 2,400 shares of Belt Railway of Chicago stock and 1,217 shares American Refrigerator Transit Co. stock. The new stock issues consist of $46,200,000 preferred A, $48,720,000 preferred B and $43,549,000 common stock. For further details see Reference Notes on Stock Issues, page 763.

Comment: The new Wabash Railway made a very satisfactory exhibit during the year ended June 30, 1916. The freight density underwent improvement and its freight train load rose to a new high figure. It will be noted also that the train mile earnings are apparently on a profitable basis. As usual the freight tonnage of the property was widely diversified.

Note: The above income statement for 1915 is that of the property as operated by the receivers. The above income statement for 1916 includes the accounts of the Wabash R.R. Co. for the period July 1, 1915, to Oct. 31, 1915, and the accounts of the Wabash Ry. Co. for the period Nov. 1, 1915, to June 30, 1916.

Profit and Loss Account of the Wabash Railway Co. for the period Nov. 1, 1915, to June 30, 1916: Credit balance transferred from income account, $2,846,881; miscellaneous credits, $1,593; total, $2,848,474. Contra: Debt discount extinguished through surplus, $75; loss on retired road and equipment, $3,744; miscellaneous debits, $2,828; credit balance carried to balance sheet, $2,841,827; total, $2,848,474.

Comment: During the year ended June 30, 1916, the Wabash Railway reported a very substantial increase in its gross revenues, while its net operating revenues nearly doubled, as compared with the previous year. The fixed charges of the reorganized property were materially less than those of the old company and whereas in 1915 a very heavy deficit was reported, in 1916 we find a surplus in excess of $3,300,000. Conditions since the close of the fiscal year have continued to improve and the recent declaration of dividends on the "A" preferred stock seems justified for the time being.

Note: The above balance sheet for 1916 is that of the reorganized company.

Comment: For the year ended June 30, 1916, the new Wabash Railway presented its financial statement for the first time. It will be noted that in the reorganization of the property very radical changes were made in the capitalization figures, the stock outstanding increasing to 67% of the total capitalization and the bonds outstanding being reduced to 33%. This change in character of the capitalization has materially improved the credit of the property and although the net capitalization still remains high, yet the company should now have no difficulty in taking care of its obligations. The net income on net capital for the year recently closed equalled nearly 6%.

Public Utilities

If you are interested in any way in the securities of Gas, Electric Light, Electric Traction, Telephone and Telegraph or Power Companies, the "Public Utilities and Industrials" Edition of "MOODY'S ANALYSES OF INVESTMENTS" will prove indispensable. This whole field is covered in the same comprehensive and accurate way that Steam Railroads are covered in the Railroad Edition. In fact, the two volumes constitute a complete Service for the Banker and Investor. Separately, the editions sell at $15 each; in combination, they are supplied at $25, when ordered in advance.

Note: "Average income available" is the average net income per mile available for interest charges, after deducting taxes, for the ten years ending June 30, 1916. "Interest requirement" is the current requirement. The ratings are based not only on the statistical exhibits and averages, but other considerations are given due weight, such as the general financial condition of the property, character of its business, relative position of the issue, etc. For full explanation, see "Introduction." For Key to Bond Ratings, see pages 19-21.

Comment: During the year ended June 30, 1916, the Western Railway of Alabama reported a substantial recovery in its freight density and the freight train load was also better than during the previous year. The train mile earnings averaged well notwithstanding the fact that the average freight rates tended to decline. As usual the tonnage was broadly diversified.

Profit and Loss Account, year ended June 30, 1916: Credit balance at beginning of year, $521,988; credit balance from income account, $270,040; unrefundable overcharges, $24; donations, $3,115; miscellaneous credits, $433; total, $795,600. Contra: Dividends, $180,000; loss on retired road and equipment, $1,191; delayed income debits, $357; credit balance at close of year, $614,052; total, $795,600.

Comment: A slight improvement occurred in the gross revenues of the Western Railway of Alabama in 1916, while the net operating revenues underwent a very sharp advance. Outside income also was better than in the previous year. The balance carried forward was therefore far in excess of all fixed charge requirement. The final balance was equal to 9% on the outstanding capital stock.

Comment: There were no capitalization changes in the Western Railway of Alabama in 1916. As measured on a mileage basis, the property is lightly capitalized and the funded debt represents only about one-third of the total capitalization. The company has in recent years been steadily reporting a heavy net income on net capital and its credit at the present time is very high.
